

A Second Treasury
of
Knitting Patterns

Barbara G. Walker

Introduction

My previous book, *A Treasury of Knitting Patterns*, was a collection of more than five hundred and fifty patterns—which seemed like a good many. But since the publication of that book, hundreds more have been added to my collection. These additional patterns are unusual and exciting, well worth sharing with my readers. In fact, many of them have come to me through the kindness of my readers themselves. My thanks go out to all the generous, industrious, and creative knitters whose contributions appear in these pages.

Some of the patterns in this book are contemporary originals, representing the constant and continuous flow of creative ideas in knitting. There is literally no end to this flow; it goes on forever because new ideas are always possible. Other patterns are traditional, representing the best efforts of past centuries. There are many lovely patterns that were popular a hundred years ago, and have since fallen into disuse because modern knitters do not know them. I have resurrected these from old, forgotten books, and translated them into modern terminology so that they can be used again, lending their beauty to new works as to old. Still other patterns have come from other areas of the world—from Europe, South America, and the Orient. Like music, knitting truly is a universal language.

This book is not just for the experienced knitter. It is for the beginner as well. There are many simple patterns here, which can be worked as easily as stockinette stitch and still give the novice knitter a feeling of having accomplished something original. The beginner usually makes a “first garment” in stockinette stitch—knit on the right side, purl on the wrong side—and if it comes out not *too* many sizes too big or too small, and *does* possess two sleeves more or less the same length and width, she gains the impression that she has learned to knit. Alas, she has not—not yet. She has *begun* to learn to knit.

Stockinette stitch is the *canvas* of the knitting artist. Upon either one of its two surfaces, knit or purl, the creative knitter arranges and displays her designs. Like canvas, it is a universal background for the play of line, shape, color and texture.

Though it may appear in large areas of a garment, it should not be used unrelieved for the entire garment. All-over plain stockinette stitch is dull to look at and boring to work, even for the beginner. Though it may be done entirely by hand, it lacks the inimitable flavor of hand-knitting. A machine can make it very nicely, but the hand-knitter is not a machine and should not try to imitate one.

This being so, there is no reason to spend the time and care of hand-knitting on a garment of stockinette stitch. It is a waste of both. The finished garment, which ought to display the knitter's taste and skill, displays nothing but poverty of invention. There are hundreds of easy pattern stitches with which the beginner can put that essential touch of originality into her garments. The beginner should learn to use some of them right away; this is the only route to real mastery of the subject of knitting. It doesn't take much—just a simple pattern or two, either all over the garment or in panel formation. With just a few lines, provided they are well-chosen and well-placed, the plain canvas becomes a work of art.

Another good reason for learning to use patterns properly is that today's yarns really deserve it. Modern fiber technology has resulted in a quality explosion in both natural and synthetic yarns. Manufacturers present the knitter with a limitless choice of excellent material, spun with a perfection that most knitters of past centuries could only dream about. Yet those knitters created patterns and designs of soaring beauty, even when they had nothing to work with but coarse homespun wool. How much more admirable our workmanship ought to be, with such superb material at our disposal! Having spent good money (often quite a lot of it) on the high-quality product that is a modern yarn, we should never insult and degrade it by using it badly. Rather let it lend its intrinsic beauty to a well-planned and well-executed design with the aristocratic air of real hand-knitting.

With the help of this book, even a "first garment" can be an original. Put a bit of texture, a band, or a panel of pattern into that drearily unadorned first sweater. The knitting will be far less tedious, and the result far more satisfying.

How to do it? Work from stitch gauge and stitch multiples. First of all, make a practice swatch of the pattern you would like to use, being sure that the yarn and needles are the same as those to be used in the garment. Block the swatch and take its *gauge*: so many stitches to the inch. If the gauge is the same as that of a commercial garment pattern you'd like to use, then you can go ahead and make the garment by following that pattern. If the gauge is *almost* the same, adjust it by changing needle sizes. Sometimes, a radical change in gauge is not feasible because it spoils the pattern. You would not want to work a lace pattern, for instance, with needles so small that the knitting will become tight and close up the holes in the lace. In such a case, determine the right needle size for the pattern stitch and then knit to your own measurements by multiplying your gauge by the number of inches desired. This is the best way to insure a perfect fit. The proportions of a commercial garment pattern may not suit *your* figure; so although you use such a pattern as a guide, you should not follow it slavishly if it does not match the measurements that *you* require. Women who sew know that no two figures are exactly alike, therefore dress patterns sometimes need to be altered to the individual taste; it is the same with knitting. It isn't hard to create your own garment pattern, simply by measuring a garment that does fit you well, then multiplying your stitch gauge to those measurements. (See the Stitch-Count Guide at the end of this introductory section for a general idea of how this is done.)

Having ascertained the number of stitches needed for the width of your garment,

then figure the number of pattern repeats, or multiples, that will go into it. Let's assume that your gauge is 5 stitches to the inch, and you require 20 inches, or 100 stitches. The pattern you want to use has a multiple of 10 stitches plus 5. This will give 95 stitches in pattern, 5 stitches are left over, an uneven number. In order to center the pattern, you should cast on either one more or one less stitch (101 or 99), then work 3 (in the first case) or 2 (in the second case) stitches plain at each side edge. If the multiple is too large to fit comfortably into the number of stitches you require, then work on your practice swatch until you learn the pattern well enough to omit *part* of a repeat and still keep the pattern correct. You have to do this when shaping the garment anyway, so it is just as well to learn it from the beginning. Some knitters do not think in terms of the number of *stitches* required, but rather in terms of the number of *pattern repeats* required; this is a good system too. If you know that one repeat of the pattern is 2 inches wide, then you know that 10 repeats will make 20 inches.

With some patterns it is possible to ignore the multiples—just cast on the required number of stitches and work across until you run out of stitches, stopping the pattern wherever it happens to be. Mosaic patterns lend themselves to this sort of treatment, as do knit-purl combinations where the wrong-side rows copy the right-side rows (“knit all knit sts and purl all purl sts”) and other patterns where wrong-side rows are purled plain and the stitch count remains the same on every row. It is even possible to work lace patterns this way—those that are purled plain on the wrong-side rows—but in this case you must be sure that the last yarn-overs have corresponding decreases, so that the number of stitches remains the same. Of course if you work this way the pattern will not be “centered” on the fabric—the right-hand edge will have a whole repeat and the left-hand edge a partial one. But there *are* patterns in which this is not a crucial matter.

A very easy way to insert stitch-pattern interest into a garment is to use some of the many vertical-panel or insertion patterns. A panel can be worked between two markers on the needle, so there is no question about where to begin and end it. Narrow vertical patterns can be worked at the center of a front or a back or a sleeve, placed next to the borders of a cardigan, or spaced between the shaping lines of a skirt. When working with vertical panels, you can place them out of range of the shaping decreases (or increases) and have no worry about keeping the pattern correct in shaping. Horizontal pattern changes, or “bands”, are easily and effectively placed on yokes, skirt hems, sleeve cuffs, or straight across the body of the garment. Slip-stitch color patterns used in one or two repeats of the pattern rows make fancy horizontal stripes of contrasting color, and add a lot of sparkle to an otherwise plain garment. You can also use several different color patterns in several different colors against a plain background: a few repeats of Pattern 1, a few rows of background color, a few repeats of Pattern 2, a few more rows of background color, and so on.

There are many ways in which a beginner can use patterns without any commercial design to follow. Just an enlarged practice swatch can become a lovely stole, scarf, baby blanket, shawl, table mat, luncheon cloth or apron. Anyone can make a plain knitted rectangle (varying the length-to-width proportions) for any of these items. Even children can knit little samples of the more dense pattern stitches to make hot-dish mats and potholders, or of simple lace to make a doll's skirt, evening wrap or head scarf. Lace curtains, decorative hangings, and pillow covers can also be made as flat pieces, with no shaping at all. Edges can be finished with fringe, crochet, seed stitch, garter stitch, strips of a different pattern, or any one of the Edgings from the

last chapter—there are many of them, ranging from very simple to very fancy. The beginner can make things like afghans and bedspreads out of pattern “strips”, perfectly straight, even *before* she has learned anything about shaping! But every new pattern stitch you try has something to teach you, so no one could look upon this kind of knitting as “non-learning”. On the contrary, it does much to increase the beginner’s confidence and skill in handling the needles. The great thing about learning a large number of patterns is that it actually increases the learner’s imaginative capacity. Each pattern seems to suggest possible uses for itself as the worker tries it out and watches it develop.

Try it out—those are the most important words in any system of developing knitting skills. Don’t just look at these patterns; don’t just read about them. *Try* them. Any experienced knitter knows that *her fingers understand* what her eyes and her mind sometimes fail to grasp. An unfamiliar technique sounds puzzling when you read it; but when you *try* it—it works! Knitting is a tactile experience, in which ideas come from the hands through the intellect, and not from the intellect alone. The novice knitter should make swatches and swatches and more swatches, trying all sorts of patterns and always watching carefully what her hands are doing. This is the only way to effect the unique union of hand and mind that turns a novice into a master craftsman. Besides, this kind of learning is wonderful fun!

Even the accomplished knitter, who already knows most of the things mentioned in the preceding paragraphs, can still learn much by trying out unfamiliar patterns. Patterns can be altered, divided, enlarged or reduced—played with, in short, until the knitter achieves a totally new effect that satisfies her own creative instinct. No matter how many different patterns you know, there are always more to be learned; and no matter how many you have learned, there are always new ways to use them. The larger your vocabulary of patterns, the more freely you can select and combine them in novel ways to suit any purpose. To knit creatively, you have only to let your imagination go. Combine cables, lace panels and textures in the same garment—why not? Combine a dozen different color patterns in a dozen different bands of color! Put lace patterns together, as many as can fit into your stitches! Enjoy yourself, and while doing so you can become a true artist of the needle, creating magnificent one-of-a-kinds that do justice to your skill. Remember that you are a hand knitter, with a brain that no knitting machine can ever imitate.

Handicrafts of all kinds hold a deep, unspoken philosophy, which contributes to the satisfaction of their practitioners even though the latter may not be conscious of it. Thousands of years of history have passed over human civilization, and during all that time human beings have fought, killed, plundered, and wronged each other in every possible way. Of such stuff history is made. But also during all that time, *other* human beings have quietly and patiently persevered in the development of arts, crafts, inventions and ideas. From these millions of creative workers, most of them unnoticed and unknown in the upheavals of history, have come the good and lasting things in the sum total of human culture. The builders, the weavers, the artisans, the carvers and smiths, the poets and musicians, the inventors of new techniques in all fields—these were, and are, the *makers* of civilization. The eternal calm figure of the needleworker looms large among them, for the arts of thread and yarn have been with us since the beginning.

When you embroider, crochet, or knit, there are centuries in your hands. You are a *maker*, doing the same thing that others have done for several thousand years. Their ideas created the techniques you now use. Who knows what pair of hands first cabled

some stitches across some other stitches? Who knows where and when the first yarn-over strand was put on a needle to make an opening? All that matters is that these things *were* done, somewhere, by someone. Now they are a part of the very ancient craft called knitting. This craft has endured, for the same reason that all such crafts endure: because people have loved it.

Right now, in the twentieth century, handicrafts in general and needlework in particular are flourishing in a new Golden Age of popularity. Perhaps the hectic pace of modern life leads people to seek moments of peaceful satisfaction in the ancient disciplines of *making*. Perhaps today's more cultivated tastes prize the inimitable beauty of hand work above the lesser charms of machine-made goods. Perhaps new techniques and ideas have given impetus to needlework as a highly versatile medium of self-expression. Perhaps the labor of the needle seems more attractive to more people because it is now a luxury rather than a necessity—for luxuries always outshine their poor plain sisters the necessities.

For any or all of these reasons, the fact remains that the age-old pleasures of knitting are being enthusiastically re-discovered all over the civilized world. The modern discoverers are not all women, either. Men too are finding enjoyment in following the footsteps of their predecessors, the millions of male knitters whose skill contributed so much to the past growth of this unique craft. Anyone who loves knitting—or any other form of needlework—should feel glad to be alive in this time, which rivals or even surpasses previous “great periods” of creativity in the field. The traditions produced in such periods are still with us. The patterns that grew out of them are still available; many are here, in this book. Use these patterns to refine and embellish your own ideas, and you become one of the *makers* of the world. Your hands too can hold and transmit the legacy of one of civilization's most beloved arts.

ABOUT NOMENCLATURE

Knitting pattern names are a collector's nightmare. Different localities know the same pattern by different names, or different patterns by the same name; though some of the oldest patterns do have definite titles that have stuck to them through their wanderings. The majority of contemporary patterns are nameless. The author of this book has retained names that appear to be widely known, or that contributors have given to their own patterns, and freely invented names for the others. This collection also includes many patterns that are the author's own originals. These, of course, bear names that were devised for them at the time of their creation.

Adapting Patterns for Circular Knitting

Directions for pattern stitches almost always are given in terms of straight knitting—that is, for working back and forth on single-pointed needles. But if you want to use any particular pattern stitch for an article knitted in rounds—such as a sock, a skirt, a seamless sweater or a tubular dress—it is an easy matter to convert the pattern rows into rounds. There are only two major steps to this process.

The first step is to omit the edge stitches. Most patterns have extra stitches at the beginning and end of each row, for finishing off the sides of a straight-knit piece. These are the “plus” stitches in “Multiple of ____ plus ____”. In circular knitting, you do not want to interrupt the continuous spiral of rounds with extra stitches that contribute nothing to the development of the pattern. So the number of stitches in a round should be the multiple required for the pattern only—plus none. For example, if a pattern takes a multiple of 10 stitches plus 3, you cast on a multiple of 10 stitches and forget the extra 3. Pattern rounds are worked from the directions given *after* the asterisk, ignoring what comes before it. Likewise, the ending material, if any, that follows “rep from * ” is ignored. This is a simple matter when the pattern has the same number of edge stitches on every row.

But what if the edge stitches vary in number? Perhaps you want to use a pattern in which you see “k2” before the asterisk in one right-side row, and “k7” before the asterisk in the next right-side row. Clearly, it will throw your pattern out of kilter if you omit the 5 extra stitches and begin your next “right-side” round at the asterisk. So you must subtract the same “k2” as before, and begin your round with “k5”—i.e., the stitches left over after the same 2 edge stitches are removed. If you are in doubt about where the actual pattern starts and finishes, you can chart one or two repeats of the pattern on graph paper, including both edges, then draw a vertical line down each side of the actual pattern repeat to slice off stitches that are not needed. In this way it is easy to see just where to begin and end each round. Of course if you are working on a series of panels, this problem will not exist because there are no edge stitches to worry about.

The second step is to convert wrong-side rows into right-side rows. You are always on the right side of the fabric in circular knitting, so the wrong-side rows must be worked inside-out. There are different ways of doing this, depending on the type of pattern you are using.

In the first place, all wrong-side *knit* stitches must be worked as *purl* stitches, and vice versa. Since a purl stitch is only a backward knit stitch, it follows that the purl side of the stitch must be on the *outside* of the fabric if the wrong side is knit. Conversely, the knit side of the stitch must show if the wrong side is purled.

When using slip-stitch patterns, the wrong-side “with yarn in front” and “with yarn in back” must be reversed. If a wrong-side row calls for a stitch to be slipped with yarn in front, then that strand of yarn is to cross the stitch on the wrong side, where it will not show. Obviously this means slipping the same stitch with yarn in *back* when you are working in rounds. If a wrong-side stitch should be slipped with yarn in back in flat knitting, then in circular knitting it must be slipped with yarn in front.

The easiest kind of pattern to convert is a bisymmetrical one: that is, a pattern in which the right-hand edge of the row is the same as the left-hand edge, but in reverse. When rows become rounds, they all go from right to left, with none returning from left to right. So in a bisymmetrical pattern, you can read the wrong-side rows just as they are given, from the beginning to the end, reversing knits and purls and other pattern operations as required. But if the pattern is *not* bisymmetrical, instead going off-center in some way, then all wrong-side rows must be read *backward*, from the end to the beginning. Remember that a wrong-side row in flat knitting works from left to right (looking at it from the right side of the fabric), whereas your “wrong-side” *round* progresses from right to left. Unless you are very experienced, or the pattern is very simple, it is not advisable to try reading these rows straight off from the end of the row to the beginning. It is too easy to miss things when you are reading this way. A better method is to re-write the pattern for yourself on a separate piece of paper, turning the wrong-side rows around as you write them. Then you can work from this revised set of directions with much less likelihood of mistakes.

Most patterns are very easily converted to circular knitting. A cable pattern in which the wrong-side rows call for “knit all knit sts and purl all purl sts” is very simple; you still do exactly that on every alternate round. A lace pattern in which all wrong-side rows are purled is very easy, too; you just knit (instead of purl) the alternate rounds. Those laces that have yarn-overs and decreases on *both* sides of the fabric are even easier; most of them were intended for circular knitting in the first place. “P2 tog”, being a right-slanting decrease on the right side, is the same thing as “k2 tog”, and is so worked. “P2 tog-b” similarly converts to “ssk”—a left-slanting decrease. In conformity with the rule of reading wrong-side rows backward, the yarn-over-decrease unit that reads “yo, p2 tog” on the wrong side is worked in a *round* as “k2 tog, yo”. In the same way, “p2 tog-b, yo” becomes “yo, ssk”.

In circular knitting you will have some kind of a marker on the needle to tell you where you finish one round and begin the next one. This can be a commercial ring marker, a safety pin, or a little hoop of sewing thread. It is carried right along with the knitting, being slipped from the left needle point to the right needle point each time you come around to it again and begin the next round. Sometimes the novice knitter will be using a pattern that travels diagonally, and will be working cheerfully along until she comes to the point where the diagonal pattern line *crosses* the marker; then she will panic. Here are two stitches that must be knitted *together*, and the marker is squarely in between them! What to do? And to which round does the decrease belong—the round just finished, or the round just starting?

What to do is easy. Slip one or the other of the two stitches temporarily in order to release the marker, take it off the needle, and replace it one stitch over to the left or to the right so the two stitches can be worked together as required. If the working unit is “k2 tog, yo”, for instance, and the marker is between the two stitches, you take it off, knit two together, put it back, then work the yo. This replaces the marker in exactly the same spot where it was before. If the two stitches are to be twisted or cabled, then you remove the marker one stitch away from its place, work the twist or cross, and continue with the next round, not forgetting to move the marker *back again* to its original place the next time you come around to it. Once a diagonal pattern has crossed the marker, it belongs to the round *where it is now*, even though the action of crossing it may have taken place on the other side of the marker.

Slip-stitch color patterns adapt very well to circular knitting. The strands are changed at the point where the rounds start and finish, unused strands being simply dropped there and left hanging, to be picked up when they are needed again. When

changing colors, always pick up the new stand on the *same* side where you picked up all the others—to the left or to the right of the old strand, either way. Then the loose strands will be neatly twisted around each other as they spiral upward from round to round. Pattern stripes will not meet precisely at the point where the rounds change, so it is a good idea to place your marker where a slight jog in the pattern will not be obvious—at a “side seam”, for instance, or the underarm line on a sleeve.

One rather intriguing problem in circular knitting is presented by the seamless skirt, which tapers toward the waist and grows wider toward the hem. This cannot be made like a straight tube, with pattern repeats in the same order all along the way. There will be decreases if the skirt is being worked from the bottom up, or increases if it is being worked from the top down. These shaping units must be kept in a strict vertical line, and the pattern must be altered evenly on either side of them, just as the grain lines in a sewn skirt are matched across a dart or seam. There may be 8 or 10 decreases (or increases) evenly spaced around a decrease (or increase) round. If you really understand how your pattern stitch works, you can incorporate these shaping units without difficulty, keeping the pattern correct on either side. But if you are not sure of yourself on this point, you can restrict your pattern to 8 or 10 *panels* around the skirt, each panel having and keeping the same number of stitches, while the shaping units are worked between the panels as very long and very skinny triangles of purl, stockinette stitch, garter stitch, or some other simple texture. Some pretty ribbed effects can be obtained by this means. For example, a pattern made primarily of knit stitches, like a lace or eyelet pattern, can be shaped with purled panels: these will “retreat” around the lower edge and give the appearance of pleats. Cable and twist panels make beautiful ribbed skirts that will keep their shape and resist “sit-out bulge”.

The easiest way to make a skirt like this is to begin at the waist and work down. Cast on the multiple required for the waist measurement, work the waistband straight in ribbing or whatever, then start the pattern panels and add one more stitch *between* these panels with each increase round. The pattern panels are kept intact on the same number of stitches, but they spread apart from each other as new stitches are added. Commercial garment patterns seldom give directions for a skirt worked from the waist down. Usually, they go from the bottom up. But there are definite advantages to working in the other direction. A skirt worked from the top down can be tried on and checked for fit and length while the work is still in progress. It isn't even necessary to take it off the circular needle in order to try it on. Just slip half of the stitches onto *another* circular needle temporarily, so the skirt can be spread out around the hips. Furthermore, if the bound-off edge is at the bottom, the skirt can be much more easily shortened or lengthened according to fashion's changing hemlines. Knitting can be unraveled quickly from the bound-off edge to pull out a few inches or add more inches. But to unravel from the cast-on edge is tricky work, nearly impossible for the novice to accomplish successfully.

Another kind of circular knitting is called “medallion knitting”. It is used for making flat, decorative articles such as doilies, table centerpieces, mats or shawls in circular, octagonal, pentagonal or square shapes. Usually it is begun at the center, by casting on just one or two stitches to each needle in a set of double-pointed needles. The medallion grows outward from the center, like a spider web, by working increases in every round or every other round. The increases are yo's if the medallion is made of lace. Medallion knitting can become exceedingly intricate. Some of the world's finest examples of “art knitting” are done in the medallion form. In the last century, exquisite articles were created in fine lace medallion knitting, to serve as the ever-

popular doilies, antimacassars, bonnet caps and table dressings. This delicate art is not so widely practiced today, but it is by no means dead. There are still people who love to do fine medallion knitting, and use it to create heirloom tablecloths and bedspreads as well as single-medallion pieces. Simpler medallion work, too, is within the grasp of any knitter. Small medallions in heavy yarn make excellent potholders, hot-dish mats, or round cushion covers. Any sort of pattern can be worked into the segments of the knitted medallion as it grows, using the same principles that apply to other kinds of circular knitting. New repeats of the same pattern, or panels of different patterns, can be added as the segments enlarge. *En passant*, here's a small hint for devotees of medallion knitting in fine lace, who may have noticed that their double-pointed needles tend to fall out of the few beginning stitches. Don't use needles—use toothpicks.

The vast majority of patterns are very easy to adapt to circular knitting, so don't be afraid to try it. You can make socks, tubular scarves and ties, seamless skirts, sweaters and dresses in any pattern that you find appealing. The important thing is to *know your pattern*. Always make your practice swatch and study it as you go, thinking in terms of omitting the edge stitches later and working the wrong-side rows from the right side instead. If you know exactly how any pattern is formed, you should be able to make it flat, round, backward, forward, or upside down. You can make any pattern in any shape, size, or type of article. One of the most fascinating qualities of knitting is its infinite flexibility with regard to shape. To acquire the skill to manipulate this flexibility as you wish, all you have to do is—try!

Number of sts on sleeve at underarm	91	95	98	102	105	109

NOTE: These figures can be used only as a *rough* guide. They are based on the *average* knitter's *average* gauge in stockinette stitch. If you normally knit to a different gauge, or if you use a pattern stitch that is tighter or looser than stockinette stitch, then you must make up your own stitch count by multiplying the desired number of inches by *your* gauge. This is not difficult to do; a few minutes' study of this chart will show how it is done. The size measurements given above are also approximate; for best results, take your *own* measurements and adjust the stitch count accordingly. Measure a sweater or dress that fits you well, then use these measurements to design your knitwear originals.

A NOTE ON CONTINENTAL-STYLE KNITTING

A number of people who knit in the continental style (i.e., with the yarn held in the left hand, wrapped over the left forefinger) have written to me, asking how to convert pattern stitches to this style. In all cases their confusion arises from a misunderstanding of their own way of knitting. Since this misunderstanding seems to be widespread, it should be pointed out that there is no method of “converting” from American style to continental style because it *makes no difference* which style is used, as far as the finished result is concerned. Every swatch in this book was knitted continental-style, because the author happens to use that style by preference.

The misunderstanding lies in the manner of making purl stitches. In continental-style knitting it is very easy to wrap the yarn the wrong way around the needle when making a purl stitch—that is, under the needle instead of over it. When stitches are purred in this way, they are turned on the needle, so that on the following knit row it is necessary to knit all stitches through the back loops in order to straighten them out again. It is possible to make perfectly good knitted articles in this manner as long as they are worked in plain stockinette stitch. But when pattern stitches are attempted, it becomes clear that this way of knitting is an error.

If you are a continental-style knitter who thinks it “makes a difference”, try this simple test. Purl one row of a stockinette-stitch fabric in your usual way. Then turn the work and knit the next row in your usual way *half way across* and stop. Look at the stitches on the right-hand needle. Each stitch will have the *right-hand* side of its loop on the front of the needle, toward you. This is the correct position. Then look at the stitches on the left-hand needle. If these stitches have the *left-hand* side of their loops on the front of the needle, then you have been purling the wrong way. Every stitch should have the right-hand loop on the front of the needle, both knit and purl rows; and stitches are never knitted in the back unless the pattern specifically calls for this action.

The right way to purl, in either style, is to pass the yarn from the front *over* the needle and down behind it. In continental-style knitting the yarn is pushed down *between* the needle points by the left forefinger (around which the yarn is wrapped) each time a purl stitch is made. If you are one of the continental-style knitters who purl with the yarn passing under the needle and up, it is necessary for you to learn to wrap the yarn in the other direction. Then you can work all knit stitches in the *front* loops in the correct manner.

Glossary of Terms and Abbreviations

I. BASICS

K—Knit.

P—Purl.

St—Stitch. Sts—Stitches.

B—Work through the back loop of the stitch. “K1-b” means: knit one stitch through its back loop, inserting the needle into the stitch from the right-hand side. “P1-b” means: purl one stitch through its back loop, placing the right-hand needle point behind the stitch as if to insert the needle between the first and second stitches from the back, then inserting it, instead, into the *back* loop of the first stitch from the left-hand side, and wrapping the yarn around the needle point in front to complete the purl stitch as usual.

Sl—Slip. To pass a stitch or stitches from the left-hand needle to the right-hand needle without working them. The right-hand needle is always inserted into a stitch that is to be slipped *as if to purl* (i.e., from the right-hand side), unless directions specify “as if to knit” or “knitwise” (i.e., from the left-hand side).

Sl-st—Slip-stitch. A stitch that has been slipped.

Wyib—With yarn in back. Used with slip-stitches, it means that the yarn is carried across *behind* the stitch, on the side of the fabric that is *away from* the knitter. Whether this is a right or wrong side makes no difference.

Wyif—With yarn in front. When a stitch is slipped, the yarn is carried across in *front* of the stitch, on the side that is *facing* the knitter.

Rep—Repeat.

Rep from *—Repeat all material that comes after the *, in the same order.

) Parentheses—Indicates a repeat of material within the parentheses (or brackets) as many times as specified immediately after them, i.e., “(k2 tog, k1) 3 times” means: k2 tog, k1, k2 tog, k1, k2 tog, k1.

II. DECREASES

K2 tog—Knit two stitches together as one stitch.

P2 tog—Purl two stitches together as one stitch.

K2 tog b—Insert the needle from the right into the back loops of two stitches at once, and knit them together as one stitch.

P2 tog-b—Turn the work over slightly and insert the needle from the left into the back loops of the second and first stitches, in that order, then wrap yarn around needle in front to complete the purl stitch. Same action as “p1-b” performed on two stitches at once. **NOTE:** In some circumstances, and for some knitters, “p2 tog-b” is awkward to work. The same effect can be obtained if desired by working the two stitches in the following manner: p1, sl the resulting st back to left-hand needle, then with point of right-hand needle lift the *next* stitch over the purled st and off the left-hand needle; then sl the same st back to right-hand needle and proceed. This is like a “psso” in reverse.

Sl 1, k1, pss0—Slip 1 st w/ib, knit 1 st, and pass the slipped stitch over; that is, insert the point of left-hand needle into the slipped stitch and draw it over the knit stitch **and off the right-hand needle.**

Ssk—Slip, slip, knit. This abbreviation is used almost always throughout this book, *instead of* the more usual “sl 1, k1, pss0”, because it is shorter, less easily confused with “sl 1, k2 tog, pss0”, and when done as directed makes a neater-looking decrease. Work “ssk” as follows: slip the first and second stitches *knitwise*, one at a time, then insert the tip of the left-hand needle into the *fronts* of these two stitches from the left, and knit them together from this position. (If, after trying this, the knitter still prefers to use “sl 1, k1, pss0” for every “ssk”, it is quite permissible to do so.)

Double decreases—These are k3 tog, p3 tog, k3 tog-b, sl 1—k2 tog—pss0, all of which are self-explanatory; and p3 tog-b, which can be worked as described above under “p2 tog-b”, by purling two stitches together, returning the resulting stitch to the left-hand needle, and passing the next stitch over. A double decrease makes 1 stitch out of 3.

NOTE. To work “k3 tog” so that it is the *exact opposite* of “sl 1—k2 tog—pss0”, do it this way: ssk, then sl the resulting st back to left-hand needle, then with point of right-hand needle pass the *next* stitch over the “ssk” stitch and off left-hand needle, then sl the st back to right-hand needle. This makes a double decrease slanting to the right, which will precisely match the left-slanting “sl 1—k2 tog—pss0”. It is a valuable trick especially for bisymmetrical lace patterns, where the **decreases should always match.**

Sl 2—k1—p2sso—This is a double decrease that is used when it is desirable to have the central stitch prominent. It is worked as follows: insert the needle into the fronts of the second and first stitches on the left-hand needle, as if to k2 tog; do not knit these stitches together, but *slip* them, both at once, from this position. Knit the next stitch on left-hand needle, then insert left-hand needle point into *both* slipped stitches at once and draw them *together* over the knit stitch and off right-hand needle, **just as in “pss0”.**

Sl 2—p1—p2sso—This double decrease is worked from the wrong side of the fabric, and is the corresponding opposite of “sl 2—k1—p2sso”, likewise producing a dominant central stitch on the right side. Though it is not widely known, it should be in every knitter’s repertoire of techniques because it is the only way to obtain this effect from the wrong side. Work “sl 2—p1—p2sso” as follows: turn the work over slightly, keeping yarn in front, and insert the needle from the left into the back loops of the second and first stitches, in that order, as if to p2 tog-b; do not purl these stitches together, but *slip* them, both at once, from this position. Purl the next stitch on left-hand needle, then insert left-hand needle point into *both* slipped stitches at once and draw them *together* over the purled stitch and off right-hand needle. The “p2sso” is just the same as when the decrease is worked from the right side.

III. INCREASES

Inc—Make two stitches out of one, by knitting into the front and back of the same stitch. This also may be done purlwise, by purling into the front and back of the same stitch, or it may be worked by (k1, p1) into one stitch, or (p1, k1) into one stitch.

M1—Make One. A method of adding a new stitch without leaving a hole or bump. Unless otherwise specified, it is done as follows: insert needle from behind under the *running thread* (which is the strand running from the base of the stitch just worked to the base of the next stitch) and lift this thread onto the left-hand needle; then knit one stitch into the *back* of it. “M1” can also be done purlwise, by purling into the back of the running thread, or by other methods which are explained in the **patterns where they occur**.

Knit next st in the row below. This is an increase *only* when followed by “then knit the st on needle.” To knit in the row below, instead of working the loop that is on the needle, work into the loop that is immediately *under* the needle—i.e., the same loop that was on the needle in the preceding row. “Purl next st in the row below” is done the same way.

Yo—Yarn over. Take the yarn over the top of the needle once before making the next stitch. If the next stitch is to be knitted, then the yarn is simply taken over the top of the needle to the back, where it is in position to knit. If the next stitch is to be purred, then the yarn is taken over the needle to the back, then under the needle to the front, where it is in position to purl. (Note: English knitting directions distinguish between these by calling a yo before a knit stitch “wf”—wool forward—and a yo before a purl stitch “wrn”—wool round needle.) A yo also may be worked in reverse: i.e., under the needle to the back, then over the needle to the front. **This reverse yo is sometimes used on purl rows.**

Yo1 twice, yo2, or 00. All these mean the same thing: a double yarn over. The yarn passes over the needle to the back, under the needle to the front, and over the needle to the back again before making the next stitch, so that there are *two* extra strands on the needle. A double yarn-over is usually worked as two new stitches on the return row, by working (k1, p1) or (p1, k1) into the long loop.

K1, yo, k1; in next st, (k1, p1, k1) in next st, (k1, yo, k1, yo, k1) in next st—these are various ways of making three or more stitches out of a single stitch. All material within the parentheses is to be worked in the *same* stitch before passing on to the next one.

IV. SPECIAL KNITTING ACTIONS

RT—Right Twist. K2 tog, leaving sts on left-hand needle, then insert right-hand needle from the front *between* the two sts just knitted together, and knit the first st again, then slip both sts from needle together. (For alternative method, see the **introduction to chapter on Twist-Stitch Patterns**.)

LT—Left Twist. With right-hand needle behind left-hand needle, skip one st and knit the second st in *back* loop, then insert right-hand needle into the backs of both sts (the skipped st and the second st) and k2 tog-b. (For alternative method, see the **introduction to chapter on Twist-Stitch Patterns**.)

FC—Front Cross. In cabling, the double-pointed needle carrying a stitch or stitches is held in *front* of the work (toward the knitter) while other stitches are being worked **behind it. This produces a cable cross to the left.**

BC—Back Cross. In cabling, the double-pointed needle carrying a stitch or stitches is held in *back* of the work (away from the knitter) while other stitches are being worked **in front. This produces a cable cross to the right.**

FKC, BKC, STC, SBC, FPC, BPC, etc.—These are arbitrary abbreviations given with cable patterns when there are a number of different types of crossings in the same

pattern, to distinguish one from another. Explanations are given in the individual pattern notes.

MB—Make Bobble. Usually done by increasing in one stitch, then working back and forth on the increased stitches for a specified number of short rows. Methods vary according to pattern.

V. GENERAL

Turn—This means that the work is turned around in the knitter's hands at some point *before* the end of a row, in order to work backward over the most recent stitches **for a specified distance.**

Short row—This is the knitting that is done after a turn. It may involve only a few stitches, or many—according to pattern—but in all cases the number of stitches in a short row is less than the total number of stitches on the needles.

Drop stitch—A stitch dropped off the needles. In some patterns it is picked up again after some other stitches have been worked, in other patterns it is unraveled downward for a certain number of rows and then picked up; in still other patterns it is simply left off the needles and ignored.

Dip stitch—A new stitch created by knitting into the fabric a certain number of rows below the stitches on the needle. The dip-stitch loop is drawn by the right-hand needle point through to the front and up, to be slipped on to the left-hand needle. Usually it is worked together with the next stitch on the needle.

Dpn—Double-pointed needle or cable needle.

Motif—The dominant figure or design unit in a pattern.

Panel—A portion of the knitting that develops a narrow vertical pattern, such as a cable, or an insertion in lace. For panel patterns directions are given in the number of stitches required to make the width of a single panel, rather than in multiples of stitches.

Spot-pattern or allover pattern—An arrangement of motifs all over the fabric, alternating at even intervals both vertically and horizontally.

Half-drop—A method of converting a panel pattern into a spot-pattern, by working the first half of the pattern rows in one panel along with the second half of the pattern rows in the adjoining panel.

MC—Main Color. The predominating color in a pattern of two or more colors.

CC—Contrasting Color. The “accent” color that is played against the main color.

Stockinette Stitch—“plain knitting”. Knit right-side rows, purl wrong-side rows. For circular knitting, knit all rounds.

Reverse Stockinette Stitch—“purl fabric”. Purl right-side rows, knit wrong-side rows. For circular knitting, purl all rounds.

Garner Stitch—knit all rows, both right and wrong sides. For circular knitting, knit one round, purl one round.

CHAPTER ONE

Knit-Purl Combinations

Of all types of knitting patterns, knit-purl combinations are the simplest in technique—though not necessarily naive or crude in design. On the contrary, many knit-purl patterns are highly sophisticated. The fancier ones require just as much care and patience on the part of the knitter as do the intricate figures in lace or cable stitches.

However, because of the simplicity of technique, most knit-purl patterns work very quickly. The new knitter will find them useful as an introduction to pattern work in general, even though she may know nothing more than “knit” and “purl”; she can still create handsomely designed fabrics and in so doing gain practice in stitch counting and shaping. Nor does the experienced knitter ever consider herself above using simple knit-purl combinations, because many of them give beautiful effects that **cannot be obtained by any other method.**

Any fabric with a knit-purl design should be firm and solid, in order to show the design to best advantage. This means that the needles should not be too large in proportion to the weight of the yarn. Oversized needles make a loose, limp, sloppy piece of knitting, perhaps with small holes at the points of change from purl to knit or from knit to purl stitches. So there is an upper limit on needle size. If you are trying to adjust your gauge to that of a commercial garment design, and require larger needles than the recommended size, be careful! Should your knitting become too loose, keep the smaller needles and cast on an extra inch or two of stitches to make the necessary width measurement in *your* gauge.

Colors should be solid, too, to do justice to a knit-purl pattern. Stripes of contrasting color usually detract from the motifs, which are subtle rather than bold. Variegated or ombre yarns also can “kill” the pattern. Heavy or bulky yarns, however, do quite well in knit-purl combinations, which can give bulky knits just the right amount of texture interest when a bolder pattern might be excessive.

Knit-purl combinations fall roughly into three categories: rib, welt, and scatter patterns. Rib patterns are those in which the motifs are mostly vertical, in knit stitches displayed against a background of purl. Welt patterns are those in which the motifs are mostly horizontal, in purl stitches on a background of knit stitches. In scatter patterns, the two types of stitches are more or less evenly distributed, so that the fabric will incline to lie flat. Some patterns combine these types, like the "basketweave" patterns in which welts predominate for a few rows, then ribs in the next few rows.

These patterns make wonderful sweaters, jackets, coats, dresses, cushions, afghans, baby clothes—anything. Try out as many as you like, and use them where you will. Why make your first sweater a plain, featureless, around-the-house garment, when with just a tiny extra effort you can work it in one of these patterns and make it an "original" that you would be proud to wear anywhere? Why learn to knit on a plain ribbed or garter-stitch scarf, when you could make it of a beautiful pattern stitch in the same amount of time? With knit-purl combinations, pattern knitting comes easily, does not bore the knitter, and yields results so satisfying that the beginner is encouraged to move on and try different techniques later.

Sailor's Rib Pattern

Sailor's Rib Pattern

Like Double Seed Stitch, which it resembles in part, this pattern demonstrates the fact that a design so simple that any child can make it still looks interesting and effective. This attractive rib texture is good for sweaters, coats, scarves—almost anything. It also looks well in panels, combined with cables or other patterns.

Multiple of 5 sts plus 1.

Row 1 (Right side)—K1-b, * p1, k2, p1, k1-b; rep from *.

Row 2—P1, * k1, p2, k1, p1; rep from *.

Row 3—K1-b, * p4, k1-b; rep from *.

Row 4—P1, * k4, p1; rep from *.

Repeat Rows 1-4.

Twin Rib

Twin Rib

The interesting thing about this simple knit-purl fabric is that it looks exactly the same on both sides, even though the two sides are differently worked. It is not sufficiently elastic to be used as a true ribbing, but a beginner could use it as an attractive allover texture for sweaters, jackets, scarves, or baby blankets. It has no curl, and therefore serves well as a border pattern wherever the springiness of a true ribbing is undesirable, such as on button bands, pockets, and coat cuffs.

Multiple of 6 sts.

Row 1—* K3, p3; rep from *.

Row 2—* K1, p1; rep from *.

Repeat Rows 1 and 2.

Steep Diagonal Rib

Left unpressed, this pattern gives an attractive texture of deep rounded ribs running diagonally. This, or variations of it, is often used to make heelless socks such as bed socks, which will adapt to the shape of the foot and ankle without any shaping of the knitting itself.

Odd-numbered rows used on the right side will make diagonal ribs running upward to the right. Even-numbered rows used on the right side will make the ribs run upward to the left.

Multiple of 6 sts.

Row 1—* P3, k3; rep from *.

Row 2 and all other even-numbered rows—Knit all knit sts and purl all purl sts

Row 3—P2, * k3, p3; rep from *, end k3, p1.

Row 5—P1, * k3, p3; rep from *, end k3, p2.

Row 7—* K3, p3; rep from *.

Row 9—K2, * p3, k3; rep from *, end p3, k1.

Row 11—K1, * p3, k3; rep from *, end p3, k2.

Row 12—See Row 2.

Repeat Rows 1-12.

Steep Diagonal Rib

Fluted Rib

This pattern looks the same on both sides, and when left unpressed it makes a fabric that is very gently fluted or “rippled” into wide, soft ribs. It is excellent for straight, gathered skirts, because the flutings will gather themselves nicely at the upper edge and can be drawn together as tightly or loosely as desired. Fluted Rib is good too for scarves, baby blankets, afghans and throws and it is easy for the novice knitter to work.

Multiple of 8 sts plus 1.

Rows 1, 2, and 3—P1, * k7, p1; rep from *.

Row 4—K2, * p5, k3; rep from *, end p5, k2.

Row 5—P3, * k3, p5; rep from *, end k3, p3.

Row 10—Repeat Row 4.

Repeat Rows 1-10.

Fluted Rib

Shadow Rib

Shadow Rib

Just the very simplest kind of knitting makes this neatly ribbed fabric for all kinds of sweaters, skirts, coats and dresses. It will not "draw in" like a true ribbing, and it gives the general appearance of a purl fabric ornamented with slim vertical bars.

Multiple of 3 sts plus 2.

Row 1 (Wrong side)—Knit.

Row 2—P2, * k1-b, p2; rep from *.

Repeat Rows 1 and 2.

Belt Welt

Easy enough for the rawest beginner to work, yet attractive enough for the expert to choose on occasion, this pattern gives a pleasing texture to sweaters, scarves, and baby things. The wrong side is interesting, too. Belt Welt is also one of the best patterns in the world for garments that are worked sideways—from the right side seam to the left side seam or vice versa.

Multiple of 6 sts plus 2.

Rows 1 and 3 (Right side)—Knit.

Rows 2 and 4—Purl.

Broken Block Pattern

This simple pattern makes wavy ribs without any effort at all. Left unpressed, it takes on quite a deep texture that looks as though it might have been created by some much more intricate knitting.

Seeded Rib Check

Here is an easy texture pattern that is very handsome in sport sweaters, jackets, and casual dresses. The Variation, below, gives a softly ribbed fabric similar to Mistake-Stitch Ribbing, not elastic enough for a true ribbing but very attractive for an entire garment. Both patterns are reversible.

Multiple of 4 sts plus 3.

Square Lattice

This charming rectilinear design is very simply constructed of knit ribs, purl welts, and seed stitch blocks. It will make beautifully tailored suits, coats, and jackets, or easy afghan squares and baby blankets.

Multiple of 14 sts plus 2.

Seed-Pearl Block Stitch

Seed-Pearl Block Stitch

Definitely a pattern, yet definitely understated, this subtle arrangement of tiny purl dots can be worked by any person capable of counting up to 8. It is appropriate for almost any kind of knitwear. It can also be worked crosswise, as in a garment that is knitted in the length from one side to the other. If desired, a strand of contrasting color can be threaded through the purl stitches in the vertical rows and through the knit stitches in the horizontal rows, to make a plaid effect.

Little Pyramid

Here is a handsome little texture pattern that is really a six-row development of Double Seed Stitch. The “little pyramids” are wide, short triangles of knit and purl stitches. If the odd-numbered rows are used on the *right* side, then the knit triangles will point

upward and the purl triangles will point downward (Knit Pyramid). If the odd-numbered rows are used on the *wrong* side, then the effect is reversed (Purl Pyramid). The forward-and-backward alternation of the same three rows to form the pattern is interesting. The fabric is flat, firm, and shapely, requiring little or no blocking.

Rib and Welt Diagonals

The interesting thing about this fabric is that it is entirely reversible—the same on both sides—except that the diagonals run in opposite directions. If odd-numbered rows are used as right-side rows, the diagonals slant to the right. If even-numbered rows are used as right-side rows, the diagonals slant to the left.

This pattern is perfect for a simple scarf, such as a beginner might make as soon as she has learned to knit and purl. Such a scarf shows the same attractive texture any way it is turned, and looks very “professional” despite the simplicity of the pattern.

Simple yet handsome, this pattern makes dramatic coats, suits, and sweaters. Since the stitch gauge is approximately the same as stockinette stitch, the novice knitter can substitute this pattern for a “plain” garment with satisfying results.

Seaweed

ABOVE: Even-numbered rows on right side

BELOW: Odd-numbered rows on right side

Seaweed

This pattern makes two quite different designs, depending on whether the odd-numbered or even-numbered rows are shown. With the even-numbered rows on the right side, it looks more “seaweedy”, with off-center ribs waving gracefully to the left. With odd-numbered rows on the right side, the motifs become gently curved knit blocks tending upward to the right.

Thunderbird Pattern

The "thunderbirds" are shallow peaked triangles with a knit rib in the center. Arranged in this way, they make a horizontal type of peating that is pretty when worked from the top down because the peaks then roll under slightly at the bottom as if the fabric were tucked horizontally. The thunderbird motifs also can be worked at a distance from each other, spaced apart on a stockinette fabric.

Imitation Aran Pattern

This pattern is a real “cheat”. With only simple knit and purl stitches it endeavors to capture the flavor of the classic Aran Diamonds with Moss Stitch. The Moss Stitch is there; but since there is no cabling, the knit borders of the diamonds lack the highly embossed beauty of the real thing. However, the pattern is not unattractive, and could be well used in a sweater that is not as fancy as a true Aran knit but where a little texture interest is desired.

Moss Stitch Zigzag

Here is a simple texture panel that can be used in combination with fancier panels or continuously all the way across a fabric. When two panels of Moss Stitch Zigzag are worked on either side of a common center, one of them should be started on Row 1 and the other on Row 9 so that the design will balance.

Moss and Rib Block Stitch

Two versions of the block stitch are given—two different patterns, actually, but both having moss and ribbing elements. Both can be shown either way round. The odd-numbered and even-numbered sides of the fabric are different, but equally attractive. Beginners may enjoy either version, the pattern rows are easy to remember and plain to see, but changeable enough to prevent boredom while knitting.

Rib and Chevron

Garter Stitch Diamonds and Ribbing Diamonds

A comparison of these two patterns is instructive in the matter of vertical and horizontal motifs. Although both patterns are arranged so as to have the same number of rows and stitches, yet their shapes differ. The Ribbing Diamonds appear larger and higher, and—naturally, since they are composed of ribbing—they draw the fabric together more. The Ribbing Diamonds fabric has a very beautiful wrong side consisting of diamonds outlined by purl, which could serve as well as the right side in many cases. But the wrong side of Garter Stitch Diamonds is not particularly interesting, since purl and garter stitch do not offer much contrast to each other.

Both patterns can be rearranged in a multitude of ways. They can be made bigger or smaller, taller or wider, or even combined—ribbed motifs can alternate with garter stitch motifs either vertically, horizontally, or diagonally.

Two Double Pennant Patterns

Both of these patterns consist of vertical ribs with pointed "pennant" motifs branching off from each side alternately; and both have extremely attractive designs on the "wrong" side of the fabric, so the knitter can use either pattern either way round.

Fancy Lozenge Pattern

Moss Diamond and Lozenge Pattern

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

This pattern is ideal for scarves, because it is exactly alike on both sides. It is a rather ingenious arrangement of Moss Stitch “diamonds”—which aren’t true diamonds, as they are off-center by one stitch—with lozenges of knit and purl. A smaller version, which splits the lozenges across the middle and places the diamonds in vertical alignment, can be had in either of two ways: by working Rows 1—24 only, or Rows 25—44 only. In either case, the back and front are still identical.

Moss Diamond and Lozenge Pattern

Blind Buttonhole Stitch

Blind Buttonhole Stitch

Deeply sunk in a heavy purl fabric, these buttonless “button holes” make winter sweaters and sportswear with plenty of texture. The wrong side is a surprise bonus—an attractive design of horizontal welts formed of slipped strands and purl stitches.

Blocks and Bars

Blocks and Bars

This fabric must be felt to be appreciated. It is so dense and cosy as to seem almost like a double knit. With its attractive checkerboard design, it makes wonderful coats, lap robes, cushions, and heavy outdoor sweaters. The wrong side looks like stockinette stitch, with tighter and looser stitches arranged in blocks between purled scallops.

Multiple of 24 sts plus 3.

Jewel Cross-Rib

This is a beautiful old pattern derived from a simple Block Stitch, making a very sophisticated texture that resembles small cables enclosing ovals of garter stitch. Its curved and interwoven lines draw the eye into intricate designs, but the pattern is very simple to work.

Slip-Stitch Patterns

Slip-stitch knitting is easy, fast, and fascinating. Many beautiful effects can be created with slip-stitches, either in a solid color or in combinations of two or more colors. Patterns for the former will be found in this chapter; patterns for the latter will be found in the following chapters.

Two special terms—*wyf* and *wyb*—have been coined by the author to clear up a certain ambiguity previously associated with slip-stitch patterns. The plain, bald “sl 1” so often encountered in other knitting directions usually implies with yarn in *back* (*wyb*) on a right-side row, and with yarn in *front* (*wyf*) on a wrong-side row. But quite a few patterns require a reversal of this procedure. Therefore the directions in these chapters have no reference to the right or wrong side of the fabric at all. “Front” is the side that is *toward* the knitter at the moment when the stitch is slipped, whichever side it may be; “back” is the side that is *away from* the knitter. With this distinction clearly in mind, you should have no difficulty in working a large variety of delightful slip-stitch patterns.

Most of these patterns make dense, firm fabrics. Slip-stitches tend to draw the rows more tightly together than plain knitting, and so in most cases more rows will be required to reach a given length. Some patterns do all sorts of fancy things with the slipped stitches, to create intricate designs; others are exceedingly simple. Any knitter can find a slip-stitch pattern to suit her own level of ability and her own taste. It is interesting, too, to try these patterns in different types of yarns and different needle sizes. Sometimes several completely different effects can be obtained from the same pattern under these circumstances. Thus the reader is advised *not* to accept every photographed swatch as an invariable picture of the pattern. Follow directions carefully, but do it *your* way, with *your* yarn, and don't be surprised if the pattern comes out with a new and unusual appearance.

Rank and File Stitch

This is a nice little texture pattern with a soldierly arrangement of slip-stitches marching in disciplined formation across the fabric. Use it in chunky sweaters, hats, jackets, coats or slippers.

Even number of sts.

Cartridge-Belt Rib

Although this is not a ribbing, in the sense of possessing horizontal elasticity, it does make vertical flutings that are gently rounded out from the fabric. It is close, firm, non-curling, and looks the same on both sides. The pattern makes simple but beautiful borders, well-mannered sportswear, and easy-to-knit afghans.

Swag Stitch, or Scallop Stitch

This is an easy pattern showing embossed horizontal strands. It enjoyed considerable popularity in the U.S. during the 1940's. It is attractive in blouses (especially yokes), baby wear, collars, pockets, and other accent areas.

Twice-Turned Stitch

This attractive, deep-textured fabric has stitches that are turned once as slipped, and a second time as they are knitted through the back. (See Twice-Turned Check.) The variation, below, is even deeper in texture and has the appearance of a ribbing, though not much elasticity. Either version is nice for thick, cosy jackets, coats, and blankets.

Slip-Stitch Weave

Contributed by Toshiko Sugiyama, Oakland, California

This simple pattern gives a flat, shapely fabric that is slightly nubby in texture, very nice for suits, coats and dresses. The two-color version, below, is a small-patterned tweed.

Odd number of sts.

Fluted Fabric Stitch

This version of Fabric Stitch (*A Treasury of Knitting Patterns*, p. 99) is really different. It gives softly-rounded little columns of woven strands, very beautiful in coats, suits, and jackets. The wrong side resembles a ribbing on a seed-stitch background. The pattern is pretty in one, two, or three colors. Simply repeat the same two pattern rows for each color, when working with more than one—changing strands at the beginning of each right-side row.

Jacquard Stitch

This handsome, well-bred “weave” can be varied in many ways. Its lines need not zigzag—they can be worked as continuous diagonals simply by repeating the first six rows only (for a left diagonal) or the last six rows only (for a right diagonal). Or, the zigzag pattern can be made larger, by continuing the diagonals for a greater distance before turning (i.e., work the first six rows twice, then the last six rows twice, making 24 rows to a repeat). The pattern can be worked also on different multiples, with 3, 5, or 6 plain knit stitches between the slipped stitches; or the woven strands can span 3 stitches instead of 2. Any version is good for making a quietly elegant fabric that will enhance suits, coats, tailored dresses, classic sweaters, cushions, gloves, etc.

Slip-Cross Double Cables

These are pretty cables, easy to work, and done without any actual cabling. Other arrangements of slipped and slip-crossed stitches in the cable form are possible, but these three will serve as a demonstration. If desired, the twist row may be omitted from Versions I and II, by working Row 2 in these versions the same as Row 2 of Version III.

All three versions: Panel of 12 sts.

NOTES: Right Slip-Cross (RSC), worked on 4 sts: drop 1st sl-st off needle to front of work, sl the next 2 purl sts, drop 2nd sl-st off needle to front of work, then with left hand needle pick up the 1st dropped st, then sl the same 2 purl sts back to left-hand needle, then with right-hand needle pick up 2nd dropped st and place it on left-hand needle; then k1, p2, k1 across the 4 sts.

Jacquard Diamonds

Jacquard Diamonds

These are not "real" diamonds. They are adjoining chevrons, worked horizontally, alternating so as to touch at each crest. If a plain horizontal-wave effect is wanted, Rows 1-10 will give the single chevron pattern.

Double Knit Fabric

Double Knit Fabric

Contributed by Eugen K. Beugler, Dexter, Oregon

This pattern resembles ribbing on the right side, and a purl fabric on the wrong side. Actually, it is neither. It is a very soft, thick, cosy fabric for warm winter sweaters and really cuddly afghans. This is not the same thing as Double Knitting which has two separate sides to it (See *A Treasury of Knitting Patterns*, p. 99).

Bud Stitch

In both Bud Stitch and Cornflower Pattern, each motif consists of five "made" stitches, like a bobble, but these increased stitches are differently handled. In Bud Stitch they are drawn all together to make a clump, five rows later. In Cornflower Pattern they are fanned out to each side. Both patterns make a novel and intriguing texture, the Bud Stitch being a little more highly embossed.

NOTE: The 3 stitches slipped knitwise in Rows 6 and 12 of this pattern are slipped all together, *not* one at a time. Insert needle into 3rd, 2nd, and 1st stitch in that order, and slip them off.

Saracen's Crown

This beautiful pattern makes a unique panel decoration for any sweater. Though the directions may seem complicated, it is simple to work. After making just one Crown, the knitter can easily see just how to make the next, without any further reading of the directions. Saracen's Crown can be arranged as a spot pattern, as well as a panel.

Panel of 17 sts.

NOTES: K1-2w—K1 wrapping yarn twice around needle.

Dw—drop wrap, that is, drop extra wrappings off needle as the stitch is slipped.

RSC—Right Slip-Cross—sl 2 purl sts, drop next (elongated) st off needle to front of work, sl the same 2 purl sts back to left hand needle, pick up dropped st and place it on left hand needle, then k1, p2 across these 3 sts.

LSC—Left Slip-Cross—drop the elongated st off needle to front of work, sl next 2 purl sts, pick up dropped st and place on left hand needle, sl the same 2 purl sts back to left hand needle, then p2, k1 across these 3 sts.

CHAPTER THREE

Slip-Stitch Color Patterns

Many knitters like to use the “Fair Isle” method of forming designs in color, changing the colors as required for each stitch, and stranding the unused colors across the back of the fabric. But there are no patterns for “Fair Isle” knitting in this book. “Fair Isle” knitting is plain stockinette stitch, with no texture interest; the designs are made **only by alternating colors**.

Slip stitch color knitting, on the other hand, presents true stitch patterns which are embellished and enhanced by contrasting colors. It is easier for the novice to master, because it does not require careful regulation of tension. It does not even require two yarns of the same weight and thickness. Exciting effects can be obtained by combining not only different colors, but also different textures of yarn: a heavy weight with a lightweight, a wool with a cotton, or a standard yarn with a ribbon. Metallic yarns, too, can be combined with the non-gartering kind to make delightfully dressy fabrics. These patterns are to *create* with. Modern knitting yarns offer a wide variety of colors, textures, and fiber types to work with, and slip stitch color patterns offer an equally wide variety of wonderful ways to put them together.

Even if you have never tried patterns of this type before, you will have no difficulty in understanding them and using them. There is nothing to remember about the knitting technique except the distinction between “with” and “w/ith”. *Front* is always the side of the knitting that *faces* you as you knit, and *back* is always the side that faces away from you. It does not matter whether you are looking at the right or wrong side. Colors are changed at the end of a row, simply by dropping the strand that was just used and picking up a different strand from below. Thus, no strands ever have to be cut or broken. It is a good idea to drop the old strand in *front* (i.e., toward the knitter) of the new one, so that all will be woven neatly around the side edge of the finished knitting.

No black-and-white picture can do justice to a pattern that is intended to be worked in color. So it is particularly important in color work to take up yarn and needles and actually try the patterns. You will like the rapidity and ease with which most of them can be worked, and you will enjoy seeing the design as it should look—that is, colorful!

Ridge Check Pattern

Ridge Check Pattern

Slipped-stitch ridges, translated into two colors, make this beautiful easy-to-work check that goes well in any sweater, jacket, skirt, or dress. The long slipped stitches carry each color upward against a stripe of contrasting color.

Blended Stripes

Blended Stripes

The unusual touch here is the working of slip-stitches on the purl side of the fabric, which imparts enough tension to prevent curling, and makes a nice firm knit piece. Since the purled colors alternate on every row, the stripes are blended together at the edges. This is a "beginner's pattern", useful for almost any kind of garment.

Multiple of 4 sts plus 3. Colors A and B.

Long-Slip Stripes

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

This pattern looks nicest when worked in many colors, using the same 4 rows for each color in turn. Because of the long slip-stitches, the fabric will curl while the work is in progress, but it can be pressed flat when finished.

Black Forest Pattern

Black Forest Pattern

This three-color variation on the endlessly-variable Three-and-One theme comes from southern Germany and Austria. It makes charming sport sweaters, caps and mittens for children or adults, and is so easy to work that it might well serve as the beginner's first attempt at a three-color garment.

Carrousel Check

Carrousel Check

Here is a very attractive three-color pattern that is easy to work, novel, and striking. It makes a firm, non-curling fabric that is suitable for almost any type of garment. It is gay enough for children's wear, yet sophisticated enough for high-fashion clothing.

Multiple of 8 sts plus 5. Colors A, B, and C.

American Beauty Tweed

This pattern is the opposite of English Rose Tweed, although it alternates colors in the same way. Instead of a loose fabric, the American Beauty makes a tight, dense one, suitable for coats and other outdoor garments. It is cheerful and gay when worked in three bright, strongly contrasting colors, subtle when worked in three different shades of the same color.

Two-Tone Lattice

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

Here an ordinary check pattern is transformed into a superbly graceful latticework design, by the simple expedient of straining stitches—that is, by stretching the same pairs of slip stitches over 4 rows instead of the usual 2. As is always the case when stitches are so treated, the fabric is very dense and sturdy. Use this pattern to make a beautiful pair of mittens, or a sofa cushion in your choice of decorator colors. A third color can be introduced, if desired, on Rows 5 and 6

Two-Tone Lattice

Twice-Turned Check

This easy-to-work pattern makes a firm, flat, close fabric for suits, coats, cushions, casual dresses and sweaters. The slipped stitches are the ones that are “twice-turned”—the first time by the way in which they are twisted when slipped, the second time by being knitted through the back loops. As a result the pattern takes on an appearance of small cross-hatched diagonals, though in fact there are no such diagonals because the slip stitches really go straight up.

Twice-Turned Check

Ribbon Bow

This is a charming, easy-to-work pattern for little girls' dresses, baby sweaters, and dainty blouses. The Color B yarn resembles ribbon woven vertically through the fabric and tied at intervals. Rows 1 and 2 can be worked with real ribbon, instead of yarn, for an especially pretty effect.

French Weave, Plain and Fancy

Here are two patterns that incorporate the same two-color motif, a small diamond-shaped figure with a short woven strand of contrasting color in the center. In the Plain version, a lattice like design, this motif is clearly seen. In the Fancy version the pattern goes off-center, to make an intricate and interesting series of diagonal lines, but the little diamonds are still there. Both versions are easy to work.

Wave and Box Stitch

Wave and Box Stitch

This pattern and the ones that follow it are "double-ended" patterns, which means that they are not always turned at the end of a row, but sometimes there will be two consecutive rows on the right side or two consecutive rows on the wrong side. To accomplish this, it is necessary to do the knitting on a *circular needle* or a *pair of double-pointed needles* when working back and forth across the piece. In round knitting, of course, there is no necessity to worry about which strand is dropped on which end of the row, because at the end of a round the knitter can choose either strand to continue.

In Wave and Box Stitch, the stitches are slipped to the other end of the needle after every even numbered or B row, so that the A strand always *follows* the B strand.

Stripe and Rib Pattern

Like all color patterns worked back and forth on double-pointed needles, this one is very easy to do in round knitting. Color B rounds are always worked like Row 2; Color A rounds are always knitted plain. The pattern geometry here is clear, formal, and sharply rectilinear, like a bold plaid.

Multiple of 4 sts plus 3. Colors A and B.

SPECIAL NOTE: This pattern must be worked back and forth on a circular needle or a pair of double-pointed needles.

Row 1 (Right side)—With A, knit.

Row 2—Sl sts to other end of needle, right side still facing, and with B, k1, * sl 1 wyib, k3; rep from *, end sl 1, k1.

Row 3—With A, purl.

Row 4—Sl sts to other end of needle, wrong side still facing, and with B, p1, * sl 1 wyif, p3; rep from *, end sl 1, p1.

Rows 5, 6, 7, and 8—Repeat Rows 1, 2, 3, and 4 again.

Row 9—With B, p1, * sl 1 wyif, p3; rep from *, end sl 1, p1.

Row 10—Sl sts to other end of needle, wrong side still facing, and with A, purl.

Row 11—With B, k1, * sl 1 wyib, k3; rep from *, end sl 1, k1.

Row 12—Sl sts to other end of needle, right side still facing, and with A, knit.

Rows 13 and 14—Repeat Rows 9 and 10.

Repeat Rows 1–14.

Stripe and Rib Pattern

Reversible Two-Tone Pattern

Contributed by Bernice Haedike, Oak Park, Illinois

This fascinating little knitting trick is a form of Double Knit (e.g., 4 *Techniques of Knitting Patterns*, p. 99) and gives two separate layers of soft stockinette stitch, connected at the edges but entirely open throughout the center, like the two sides of a pocket. The difference here is that these two back-to-back layers are worked in different colors, one side in Color A, the other in Color B—and both are worked at the same time. Each color is therefore a “lining” for the other. All kinds of reversible articles can be made with this pattern, jackets, coats, scarves, baby blankets, hats.

The knitting is simple, but watch out for just two points where errors are easy to make. These points are the ends of Rows 2 and 4 when both strands are together at the same edge. Be sure always to pick up the B strand at these two points. Color A always goes to Color B across the rows, after the stitches are slipped to the other end of the needle. When changing colors, be sure to pick up the new strand from *under* the old one, so the two will be twisted together at the edges without leaving any holes.

Reversible Two-Tone Pattern

VARIATION:

GARTER-STITCH STRIPE VERSION

Work the same as Bold Check Pattern above, with the following exceptions:

Rows 5, 9, 17, and 21—With A, knit.

Rows 6 and 10—With A, k1, * (p1, k1) twice, p1, k5; rep from *, end k1.

Rows 18 and 22—With A, k1, * k5, (p1, k1) twice, p1; rep from *, end k1.

Tuscan Pattern

Here is a delightful pattern of big checks in contrasting garter-stitch and woven-stitch textures for beautiful tweedy coats and jackets.

Multiple of 10 sts plus 9. Colors A and B.

Cast on with Color A and purl one row.

Row 1 (Right side)—With B, k2, * (sl 1 wyif, k1) twice, sl 1 wyif, k5; rep from *, end last repeat k2.

Row 2—With B, repeat Row 1.

Row 3—With A, k1, * (sl 1 wyif, k1) 3 times, sl 1 wyif, k3; rep from *, end last repeat k1.

Row 4—With A, k1, * (sl 1 wyif, p1) 3 times, sl 1 wyif, k3; rep from *, end last repeat k1.

Rows 5 through 14—Repeat Rows 1 through 4 twice more, then Rows 1 and 2 again.

Row 15—With A, k3, * sl 1 wyif, k1, sl 1 wyif, k7; rep from *, end last repeat k3.

Row 16—With A, p3, * sl 1 wyif, p1, sl 1 wyif, p7; rep from *, end last repeat p3.

Rows 17 and 18—With B, k1, sl 1 wyif, * k5, (sl 1 wyif, k1) twice, sl 1 wyif; rep from *, end k5, sl 1 wyif, k1.

Row 19—With A, k2, sl 1 wyif, * k3, (sl 1 wyif, k1) 3 times, sl 1 wyif; rep from *, end k3, sl 1 wyif, k2.

Row 20—With A, k1, p1, sl 1 wyif, * k3, (sl 1 wyif, p1) 3 times, sl 1 wyif; rep from *, end k3, sl 1 wyif, p1, k1.

Rows 21 through 30—Repeat Rows 17 through 20 twice more, then Rows 17 and 18 again.

Row 31—With A, k8, * sl 1 wyif, k1, sl 1 wyif, k7; rep from *, end k1.

Row 32—With A, p8, * sl 1 wyif, p1, sl 1 wyif, p7; rep from *, end p1.

Repeat Rows 1-32.

Tuscan Pattern

The double fabric may be closed at the top by binding off all stitches in the usual way, or it may be left open, forming a pouch, by slipping all the A stitches onto one needle and all the B stitches onto another, and binding off each separately. Be generous when casting on; naturally a double-thick fabric comes out about half the width of a single thickness.

Even number of sts. Colors A and B

NOTE: This pattern must be worked on a circular needle or a pair of double-pointed needles.

Cast on with Color A, then join Color B

Row 1—With B, * k1, sl 1 wyif, rep from *. Sl sts to other end of needle and take up A strand.

Row 2—With A, * sl 1 wyib, p1, rep from *. Turn work and take up B strand.

Row 3—With B, * sl 1 wyib, p1, rep from *. Sl sts to other end of needle and take up A strand.

Row 4—With A, * k1, sl 1 wyif, rep from *. Turn work and take up B strand.

Repeat Rows 1–4.

Woven Plaid

Woven Plaid

A 36-row repeat is rather long for a color pattern; but in fact there are only 8 pattern rows here. On the second half (Rows 19–36) the same rows are worked on opposite sides of the fabric. The directions at the end of each row—either “turn” or “sl sts to other end of needle”—are to be considered *part of that row*. Follow these directions as soon as the row is completed, so you will not lose track of which side of the fabric you are working on. Keep the wrong side strands *tense* when slipping each 5-stitch group.

Multiple of 10 sts plus 2. Colors A and B.

Cast on with Color A and purl one row.

SPECIAL NOTE: This pattern must be worked back and forth on a circular needle or a pair of double-pointed needles.

Row 1 (Right side)—With B, k1, * (sl 1 wyif, sl 1 wyib) twice, sl 1 wyif, k5; rep from *, end k1. Sl sts to other end of needle.

Row 2—With A, k1, * k5, sl 5 wyib; rep from *, end k1. Turn.

Row 3—With B, k1, * p5, (sl 1 wyif, sl 1 wyib) twice, sl 1 wyif, rep from *, end k1. Sl sts to other end of needle.

Row 4—With A, k1, * sl 5 wyif, p5; rep from *, end k1. Turn.

Rows 5–8, 9, 10, and 11—Repeat Rows 1, 2, 3, 4, and Row 1 again.

Row 10—With A, k1, * k5, (sl 1 wyif, sl 1 wyib) twice, sl 1 wyif, rep from *, end k1. Turn.

Row 11—With B, k1, * p5, sl 5 wyif, rep from *, end k1. Sl sts to other end of needle.

Row 12—With A, k1, * sl 1 wyif, sl 1 wyib twice, sl 1 wyif, p5, rep from *, end k1. Turn.

Row 13—With B, k1, * sl 5 wyib, k5, rep from * end k1. Sl sts to other end of needle.

Rows 14, 15, 16, 17, and 18—Repeat Rows 10, 11, 12, 13, and Row 10 again.

Row 19—With B, k1, * p5, sl 1 wyib, sl 1 wyif twice, sl 1 wyib, rep from *, end k1. Sl sts to other end of needle.

Row 20—With A, k1, * sl 5 wyif, p5, rep from * end k1. Turn. (I.e., same as Row 4.)

Row 21—With B, k1, * sl 1 wyib, sl 1 wyif twice, sl 1 wyib, k5, rep from *, end k1. Sl sts to other end of needle.

Row 22—With A, k1, * k5, sl 5 wyib, rep from *, end k1. Turn. (I.e., same as Row 2.)

Rows 23, 24, 25, 26, and 27—Repeat Rows 19, 20, 21, 22, and Row 19 again.

Row 28—With A, k1, * sl 1 wyib, sl 1 wyif twice, sl 1 wyib, p5, rep from * end k1. Turn.

Row 29—With B, k1, * sl 5 wyib, k5, rep from * end k1. Sl sts to other end of needle. (I.e., same as Row 13.)

Row 30—With A, k1, * k5, sl 1 wyib, sl 1 wyif twice, sl 1 wyib, rep from * end k1. Turn.

Row 31—With B, k1, * p5, sl 5 wyif, rep from * end k1. Sl sts to other end of needle (I.e., same as Row 11.)

Rows 32, 33, 34, 35, and 36—Repeat Rows 28, 29, 30, 31, and Row 28 again.

Repeat Rows 1–36.

Tiny Check

The little checks in this pattern are made of a single Color B stitch apiece, which means that in flat knitting the pattern must be worked back and forth on a circular needle or a pair of double-pointed needles, as given. For round knitting—as in socks, seamless sweaters, skirts, or other tubular articles, the pattern may be adapted very easily by knitting instead of purling Rows 1 and 4 and slipping sts wyib instead of wyif in Row 4. The “sl sts to other end of needle” direction can be ignored, since at the end of a round either strand may be picked up at will.

Odd number of sts. Colors A and B

SPECIAL NOTE: This pattern must be worked back and forth on a circular needle or a pair of double-pointed needles.

Row 1 (Wrong side)—With A, purl.
 Row 2—With B, k1, * sl 1 wyib, k1; rep from *.
 Row 3—Sl all sts to other end of needle and with A, knit.
 Row 4—With B, p2, * sl 1 wyif, p1; rep from *, end p1. Sl all sts to other end of needle.

Repeat Rows 1–4.

Tiny Check

Sandwich Stitch

A simple variation on a garter-stitch stripe is seen here, which makes a sporty check for children's sweaters, jackets and coats. Recommended for beginning knitters.

Multiple of 16 sts plus 9. Colors A and B.

NOTE: Odd-numbered rows are right-side rows.

Rows 1, 2, 5, 6, 9, 10, 13, and 14—With A, knit.

Rows 3 and 7—With B, (k1, sl 1 wyib) 4 times, * k9, (sl 1 wyib, k1) 3 times, sl 1 wyib; rep from *, end k1.

Rows 4 and 8—With B, (k1, sl 1 wyif) 4 times, * p9, (sl 1 wyif, k1) 3 times, sl 1 wyif; rep from *, end k1.

Rows 11 and 15—With B, k9, * (sl 1 wyib, k1) 3 times, sl 1 wyib, k9; rep from *.

Rows 12 and 16—With B, p9, * (sl 1 wyif, k1) 3 times, sl 1 wyif, p9; rep from *.

Repeat Rows 1–16.

ABOVE: *Sandwich Stitch*
BELOW: *Watergate Pattern*

Watergate Pattern

Like Sandwich Stitch, this pattern has a garter-stitch-stripe basis, but is a little more complicated. Certain background stitches are carried up over the stripes to make motifs that “travel” on a shallow diagonal.

Multiple of 20 sts plus 3. Colors A and B

NOTE: On all odd-numbered (right-side) rows, sl all sl-sts wyib. On all even-numbered (wrong-side) rows, sl all sl-sts wyif. Cast on with A and knit one row.

Row 1 (Right side)—With B, k1, * sl 1, k2, (sl 1, k1) twice, sl 1, k2, (sl 1, k4) twice; rep from *, end sl 1, k1.

Rows 2, 6, 10, and 14—With B, purl all the sts knitted on previous row, slipping all sl-sts wyif.

Row 3—With A, * k13, sl 2, k3, sl 2; rep from *, end k3.

Row 4—With A, k3, * sl 2, k3, p2, k13; rep from *.

Row 5—With B, k1, * sl 1, k4, sl 1, k2, (sl 1, k1) twice, sl 1, k2, sl 1, k4; rep from *, end sl 1, k1.

Row 7—With A, k3, * sl 2, k13, sl 2, k3; rep from *.

Row 8—With A, k3, * p2, k13, sl 2, k3; rep from *.

Row 9—With B, k1, * (sl 1, k4) twice, sl 1, k2, (sl 1, k1) twice, sl 1, k2; rep from *, end sl 1, k1.

Row 11—With A, k3, * sl 2, k3, sl 2, k13; rep from *.

Row 12—With A, * k13, sl 2, k3, p2; rep from *, end k3.

Woven Polka Dot Pattern

Woven Polka Dot Pattern

This is an "easy" version of Swedish Weave; it is simplified because the varns are handled one at a time, instead of both together. The principle remains the same, however; Color B is never worked, only woven: in this case, twice for each "dot", so that there is a double strand showing instead of a single one. The single purl stitch at the beginning of Rows 4 and 8 anchors Color B at the left hand edge. On the right hand edge it is automatically caught as the strands are twisted up the side. With this pattern it is especially important always to pick up a new strand from behind the old one when changing colors.

A three-color version of the pattern might be worked with a Color C introduced in Rows 7 and 8.

Odd number of sts. Colors A and B

Row 1 (Right side)—With A, knit.

Row 2—With A, k1, purl to last st, k1.

Row 3—With B, * sl 1 wyib, sl 1 wyif; rep from *, end sl 1 wyib.
(No sts are knitted in Color B; the strand is simply woven through the Color A sts.)

Row 4—With B, p1, * sl 1 wyib, sl 1 wyif; rep from *

Rows 5 and 6—With A, repeat Rows 1 and 2

Row 7—With B, * sl 1 wyif, sl 1 wyib; rep from *, end sl 1 wyif.

Row 8—With B, carry yarn around side edge of work and p1, * sl 1 wyif, sl 1 wyib; rep from *.

Repeat Rows 1-8.

Two-Color Bind Stitch

Work this pattern with a light hand, being careful not to bind the stitches too tightly. "Squeezing" will spoil its appearance. The wrapped strands should be soft and reasonably loose, though not slack. The pattern is pretty, too, in three colors. Simply alternate the three colors continuously, giving 4 rows to each in turn.

Multiple of 4 sts plus 2. Colors A and B.

Cast on with Color A and purl one row.

Row 1 (Right side)—With B, k1, * sl 2 wyif, put yarn to back and sl the same 2 sts back to left-hand needle, bring yarn to front and sl the same 2 sts wyif again, put yarn to back and k2; rep from *, end k1.

Row 2—With B, p3, * sl 2 wyif, p2; rep from *, end sl 2, p1.

Row 3—With B, k3, * p2, k2; rep from *, end p2, k1.

Row 4—With B, purl.

Row 6—With A, p1, * sl 2 wyif, p2; rep from *, end p1.

Row 7—With A, k1, * p2, k2; rep from *, end k1.

Row 8—With A, purl.

Repeat Rows 1-8.

Swedish Dot Pattern

This charming and simple little pattern is easy to knit in color-reversal stripes, as follows: work Rows 1 through 10 as given. Then work Rows 1 through 4 in Color B, Rows 11 and 12 in Color A, and Rows 1 through 4 in Color B; then begin again at Row 1 with A. This will give dark stripes with light dots, alternating with light stripes with dark dots.

Multiple of 4 sts plus 2. Colors A and B.

Rows 1 and 3 (Right side)—With A, knit.

Rows 2 and 4—With A, purl.

Row 5—With B, k3, * sl 2 wyif, k2; rep from *, end sl 2, k1

Row 6—With B, k1, * sl 2 wyif, k2; rep from *, end k1.

Rows 7, 8, 9, and 10—With A, repeat Rows 1, 2, 3, and 4.

Row 11—With B, repeat Row 6

Row 12—With B, repeat Row 5

Repeat Rows 1-12

Salt and Pepper Tweed

This attractive variation on a two-color Fabric Stitch can be used either way round. The right side is a tweedy mixture; the wrong side shows a series of narrow horizontal stripes. This pattern closes up into a thick, dense fabric, and should be worked with large needles. More than two colors can be used, if desired; simply repeat the same two pattern rows for each color.

Winged Wave Pattern

This charming fabric is thick, warm, non-curling, and beautiful in all types of sportswear. The pattern is easy to work, although the main pattern row (Row 6) seems complicated in the directions; but the technique is soon learned, and is worked in much less time than it takes to tell about it.

Multiple of 8 sts plus 2. Colors A and B.

PREPARATION ROWS:

Four-Color Mix

Four-Color Mix

This pattern is a real mixture. Single stitches of each of the four colors chase each other all over the fabric in rich profusion. All sorts of subtle heathery or tweedy effects are possible with this pattern, depending on how your chosen colors blend or contrast with each other.

Multiple of 4 sts plus 3. Colors A, B, C, and D.

Cast on with Color A and purl one row.

Row 1 (Right side)—With B, k1, * sl 1 wyib, k3; rep from *, end sl 1, k1.

Sherwood Pattern

Sherwood Pattern

This is a simple three-and-one pattern having only eight rows in fact, but in the alternation of colors these 8 rows are repeated 3 times. This makes a fabric with a very pleasing and subtle design that seems more complicated than it really is.

Multiple of 4 sts plus 3. Colors A, B, and C.

Row 1 (Right side)—With A, knit.

Dice Check

Like most of the really ingenious patterns in knitting, this one is created by a small—almost insignificant—change in a commonly known technique. Here, an ordinary two-stitch check is transformed by the simple expedient of carrying a third color back and forth, one row at a time. This enables the knitter to work an elegant, tidy three-color check without breaking any of the three strands. The pattern is so easy to work that a beginner may use it to make a beautiful coat, casual dress, sweater, mittens or baby clothes.

Syncopated Tweed

This beautiful tweed is so simple as to be well within the reach of any beginner; yet the finished fabric seems to be quite a complex arrangement of color spots. It is a dense fabric that tends to curl forward, because of the pull of the long slip-stitches, and so it requires pressing.

Multiple of 3 sts plus 2. Colors A, B, and C.

Holiday Stripes

Holiday Stripes

A drop-stitch technique is used in this stripe pattern, which combines all the best elements of pattern knitting. It is highly ingenious in concept and execution; it is strikingly novel in effect, and it is exceedingly simple to work. If you look carefully, you will see little slip-stitch "cables" embedded in the fabric. These can be brought out, if desired, by working in a single solid color with purl stitches, instead of knit stitches, inserted between them (i.e., on right side rows purl the first stitch and every 4th stitch thereafter). But in two-color knitting, the "cables" form the rick-rack-like stripes and thus do not exist as vertical patterns.

Surprise Pattern

The “surprise” is the way this pattern looks when it is worked in only two colors instead of three. The shapes are entirely different. For the two-color version, simply alternate colors every other row, as follows: Rows 1, 4, 5, 8, 9, and 12 in Color A; Rows 2, 3, 6, 7, 10, and 11 in Color B.

Haystack Stripe

Haystack Stripe

This is a gay and interesting pattern of only eight rows, which are repeated three times in order to alternate the colors. At first glance it appears to be a design of horizontal stripes, which are elongated upward and downward at intervals. But look more closely, and you will see that it is really a pattern of slip-cross cables, worked continuously across the fabric with a half-drop. This true design immediately becomes apparent if the pattern is worked in one solid color, using the basic eight rows only.

Four-Color Progressive Tweed

This pattern is so named because it “progresses” from right to left; each succeeding spot of the same color is moved two stitches over from its previous position. Try it in four gently-shading colors, such as cream, beige, gold and brown, or try it in four wildly contrasting ones—white, orange, emerald and black, for instance. The effect is very pleasing either way.

Four-Color Progressive Tweed

Mosaic Patterns

Mosaic patterns are sophisticated designs in slip-stitch color knitting. The patterns themselves are complicated, but the knitting technique is not. Here, the most straightforward principle of slip-stitch color knitting is applied to a number of complex geometrical shapes, illustrating the enormous variety and flexibility of one simple knitting method. The basic principle is this: portions of each row are hidden behind slipped stitches carried up from a different-colored row below. This means that (1) every slip-stitch is slipped with yarn in *back* on right-side rows, and the same stitch is slipped again, but with yarn in *front*, on wrong-side rows, (2) Colors are alternated every two rows, and (3) each slip-stitch spans two rows and is caught again with **its own color on the third row.**

Most of these patterns call for *knitting* wrong-side rows, which gives the fabric a nubby garter-stitch texture. But *purling* can be substituted at will, if a smooth stockinette-type texture is desired. Some patterns look better one way, some the other, it depends upon the taste of the individual knitter, and upon the individual way of knitting. Remember, though, that if a pattern is shown in garter stitch, a stockinette version of the same pattern will look slightly elongated vertically. Conversely, a stockinette-type pattern will broaden and shorten a little when worked in garter stitch.

There is, then, nothing special about the method of making mosaics. It is a way of using colors which precludes having to change yarns in mid-row and strand across the back, as in "Fan Isle" knitting. Thus there are no bobbins, and no thickening of the fabric due to unused strands lying on the back. The method is superior to "Fan Isle" knitting except for one limitation: each area of "solid" color must contain dots of the opposite color. The reason for this is that the yarn must be caught and knitted at least every third stitch, lest the intervening slip-stitches be unattractively **squeezed together.**

Although the knitting technique is simple and easy, the pattern directions, in most cases, tend to be long. Therefore they must be read carefully as the work progresses. This diversity of rows, however, produces fanciful and charming designs with an

Pin Box Pattern

Pin Box Pattern

To see how this clever pattern is constructed, plot it on graph paper. Put all the slip-stitches in their proper positions, and lo and behold, a diamond appears! Yet the motifs are quite evidently square—or nearly so.

Pin Box Pattern is actually made with pin stripes in a diamond formation. The diamond shapes *can* be seen on the wrong side. The pattern can be varied by knitting, instead of purling, the wrong-side rows; then the “boxes” will come out a little shorter and squarer, and the surface of the fabric will be rough and nubby.

intricate interplay of color. The variety of designs that can be made in this way is incredible; it is literally endless.

Now here is the most fascinating fact about mosaic patterns in general: *they can be worked on any number of stitches at all!* There is no need for the knitter to figure the closest multiple for a given size, or to juggle the pattern so as to work half a repeat or a third of a repeat for the sake of an extra inch. All that is necessary is to cast on the number of stitches that you want, then begin each pattern row at the right-hand edge according to the directions, and work across until you run out of stitches. If the row comes to an end in the middle of a repeat, it makes no difference! The return row is worked by knitting (or purling) and slipping the same stitches that were worked on the preceding row—so the beginning of the wrong-side row is not critical, and there are no special directions for it. All you have to do is look at the work to see which stitches were used in the preceding row, and which were not. You can “center” the pattern by using the recommended multiple of stitches if it is possible. But if, for reasons of size, this is not possible—you can forget it!

The patterns given here do not represent a really thorough exploration of all possible designs in mosaic knitting. On the contrary, they are just a beginning. Once the easy technique of mosaic knitting is clearly understood, any number of new and original patterns can be devised. In knitting as in most other creative crafts, simplicity means versatility. Mosaic knitting features a technique of the utmost simplicity and an application as broad as human ingenuity itself.

Assyrian Stripe Pattern

As Mosaics go, this one is simple to work because the directions are neither long nor complex—just repetitive. Yet it is a stunning pattern for any ski sweater, border, child's jacket, or hat.

Multiple of 16 sts plus 1. Colors A and B.

NOTE: On all right-side (odd-numbered) rows, sl all sl-sts with yarn in *back*.

Rows 1 and 2—With A, knit.

Row 3 (Right side)—With B, k1, * sl 1, k1; rep from *.

Row 4 and all other wrong-side rows—Knit (or purl) all the same sts worked on previous row, with the same color; sl all the same sl-sts with yarn in *front*.

Row 5—With A, k8, * sl 1, k15; rep from *, end sl 1, k8.

Row 7—With B, k2, * (sl 1, k1) twice, sl 1, k3; rep from *, end last repeat k2.

Row 9—With A, k7, * sl 3, k13; rep from *, end sl 3, k7.

Row 11—With B, k4, * sl 1, k7; rep from *, end sl 1, k4.

Row 13—With A, k5, * sl 1, k1, sl 3, k1, sl 1, k9; rep from *, end last repeat k5.

Rows 15, 17, 19, 21, 23 and 25—Repeat Rows 11, 9, 7, 5, 3, and 1.

Rows 27 through 51—Repeat Rows 1 through 25, reversing colors.

Row 52—With B, knit.

Repeat Rows 1-52.

Stripes and Diamonds

Dotted diamonds appear to be embossed on a striped fabric in this pattern, which can be used to make a very handsome two-color garment. Various rearrangements of knits and purls can be applied to make different texture effects.

Multiple of 10 sts plus 1. Colors A and B.

Cast on with Color A and knit one row.

NOTE: On all right-side (odd-numbered) rows, sl all sl-sts wyib; on all wrong-side (even-numbered) rows, sl all sl-sts wyif.

Row 1 (Right side)—With B, k5, * sl 1, k9; rep from *, end sl 1, k5.

Row 2—With B, p5, * sl 1, p9; rep from *, end sl 1, p5.

Row 3—With A, knit.

Row 4—With A, k4, * p3, k7; rep from *, end p3, k4.

Row 5—With B, k4, * sl 1, k1, sl 1, k7; rep from *, end last repeat k4.

Row 6—With B, p4, * sl 1, k1, sl 1, p7; rep from *, end last repeat p4.

Three Reversible-Texture Mosaics: Little Castle, Sliding Block Pattern, and Cage Pattern

All three of these patterns combine knit and purl stitches on the wrong side rows to make varying texture effects. These effects can be reversed, by reading "knit" for "purl" and vice versa on the *wrong side* rows only. Or, a straight stockinette or garter-stitch type of fabric can be achieved by purling all the wrong-side stitches, in the first case, or knitting them, in the second.

I. LITTLE CASTLE

Multiple of 8 sts plus 5. Colors A and B

Cast on with Color A and purl one row

Row 1 (Right side)—With B, k4, * sl 1 wyib, k3; rep from *, end k1.

Row 2—With B, k4, * sl 1 wyif, k3; rep from *, end k1

Row 3—With A, k1, * sl 1 wyib, k1; rep from *

III. CAGE PATTERN

Multiple of 6 sts. Colors A and B.

Cast on with Color A and purl one row.

Row 1 (Right side)—With B, k5, * sl 2 wyib, k4; rep from *, end k1.

Row 2—With B, k5, * sl 2 wyif, k4; rep from *, end k1.

Row 3—With A, k1, * sl 1 wyib, k2; rep from *, end sl 1, k1.

Row 4—With A, p1, * sl 1 wyif, p2; rep from *, end sl 1, p1.

Row 5—With B, k2, * sl 2 wyib, k4; rep from *, end sl 2, k2.

Row 6—With B, k2, * sl 2 wyif, k4; rep from *, end sl 2, k2.

Rows 7 and 8—With A, repeat Rows 3 and 4.

Repeat Rows 1-8.

Vertical Chain

There are really two chains, interlocked with each other, in this pattern—a dark one on a light background, and a light one on a dark background. Thus the pattern is nothing but a simple variation on slipped vertical stripes.

Multiple of 8 sts plus 2. Colors A and B.

Cast on with Color A and purl one row.

NOTE: On all right-side (odd-numbered) rows, slip all sl-sts with yarn in *back*.

Row 1 (Right side)—With B, k3, * sl 1, k2, sl 1, k4; rep from *, end last repeat k3.

Row 2 and all other wrong-side rows—Purl (or knit) the same sts worked on previous row, with the same color; sl all the same sl-sts with yarn in *front*.

Row 3—With A, k1, sl 1, * k2, sl 2; rep from *, end k2, sl 1, k1.

Row 5—With B, repeat Row 1.

Four “Flying Cross” Mosaics: Illusion Stripe, Dogtooth Cross, Diagonal Chain, and Egyptian Cross

ABOVE, LEFT: *Illusion Stripe*
ABOVE, RIGHT: *Dogtooth Cross*
BELOW, LEFT: *Diagonal Chain*
BELOW, RIGHT: *Egyptian Cross*

The flying cross or four-armed cross (of which the swastika is one example) is an ancient and recurrent theme in geometric patterns the world over. Here it can be traced in four fascinating mosaic designs. In each, the basic motif is a small three-stitch square with a dot of contrasting color in the center and four “arms” proceeding from the corners. But this motif is very differently handled in each of the four.

The first two, Illusion Stripe and Dogtooth Cross, are similar but illustrate a small change that makes a big difference. Look at the light-colored shapes against the background of dark-colored ones, then at the dark-colored shapes against the background of the light-colored ones. In Illusion Stripe, both are alike—hence the “illusion”. But in Dogtooth Cross the two colors form very different designs. The contrast between “dark” shapes and “light” shapes is even greater in the third and fourth patterns. Exchange the positions of dark and light rows, and these patterns will alter radically in their appearance. The last pattern, Egyptian Cross, begins and ends with plain knit rows and thus will make a very interesting border design as well as an allover pattern.

NOTES FOR ALL FOUR PATTERNS: On all right-side (odd-numbered) rows, slip all sl-sts with yarn in *back*. On all wrong-side (even-numbered) rows, knit (or purl) the same sts worked on previous row, with the same color; sl all the same sl-sts with yarn in *front*.

I. ILLUSION STRIPE

Multiple of 6 sts plus 2. Colors A and B.

Cast on with Color A and knit one row.

Row 1 (Right side)—With B, k1, * k5, sl 1; rep from *, end k1.

Leaning Stripe Pattern

Swedish Weave

In this pattern Color B is never worked, only passed back and forth between the needles as the knitting is done with Color A. The Color B strand need not be held in the fingers at all, but simply pushed from front to back as required. In this way the strand is kept quite loose, which gives the best results. The fabric has an unusually beautiful purl side.

Odd number of sts. Colors A and B.

Cast on with Color A and purl one row. Join Color B

Arabic Block

This is a slip-stitch adaptation of an ancient Arabic design. The method here has a touch of novelty; in order that the same strand of yarn can be used all the way across each row, the left-hand half of the pattern is always two rows behind the right-hand half. Thus a positive-and-negative checkered effect is achieved, and the blocks of color can be alternated without picking up new strands of yarn in mid-row.

Multiple of 54 sts plus 2. Colors A and B.

Two “Turning” Patterns: String of Purls and Short-Row Pattern

Both of these unusual patterns are made by turning the work around and working back over the most recent stitches, after the manner of a bobble. The String of Purls is akin to the Bubble Bobble, although the extra or “turned” stitches do not protrude so much. The Short Row Pattern picks up two extra stitches at each end of a “turned” row, so that the motif spreads out into a sort of upside-down pyramid.

Fancy Shingle Pattern

Fancy Shingle Pattern

This pattern produces overlapping “shingles” that are raised at the lower edges and decorated with scalloped borders of Color A. The method of avoiding holes on the turning rows is the same as that used by knowledgeable knitters in garment shaping—such as the short rows on shoulders or collars: i.e., “hooking” the yarn around an unworked stitch before turning the work. By trying the pattern both with and without this little trick, the novice knitter can prove its advantages for herself.

Two-Color Star Stitch

Two-Color Star Stitch

This is a remarkably beautiful openwork pattern used for fancy baby clothes, yokes, dress sleeves, evening purses, cushions, place mats, and the like. It may be lined with a fabric matching one of the colors or with a contrasting color. It also looks well when done in ribbon, or a combination of ribbon and yarn.

Odin's Eagles

Odin's Eagles

As its name implies, this pattern is derived from traditional Scandinavian designs. A kinship can be seen between the "eagle" motifs and those of the Crown Chevron. Odin's Eagles make a splendid border design when the pattern rows 1 through 42 are worked once with Rows 43 and 44 knit plain with Color A. This pattern also makes beautiful cushions and handbags; articles like these can be worked with the required large multiple of stitches without any adjustment of the pattern to a given size. However, the knitter should remember that a mosaic pattern *can* be worked on any number of stitches, even if the final repeats end somewhere in the middle of the directions—so large multiples present no problem in patterns of this type.

Closed Star Stitch

Though the technique here is basically the same as the Two-Color Star Stitch, the yarn-over is replaced by a lifted increase from the wrong side, which makes a tighter fabric, more suitable to work in medium-weight and heavy yarns. This version is good for suits, jackets, and afghans.

Fancy Color Patterns

This is a group of truly fascinating patterns. Some of them employ slip-stitches, but other knitting techniques are used as well: yarn-overs, short rows, bobbles, dip stitches, passed stitches—almost anything. These are Fancy Texture Patterns in color.

This section constitutes a demonstration of the enormous number of things that can be done with strands of two or three different colors and assorted knitting techniques. There are beautiful and unusual shapes here, which are enhanced by the interplay of light and dark, bright and subtle shades. Color work often seems to bring out the best of the pattern designer's ingenuity. Much variety is possible, too, in the use of color within the same pattern; this is for *you* to discover. If Color A happens to be a light color, and Color B a dark one, reverse them and see how different the pattern looks! Or try the same pattern, first with two strongly contrasting colors and then with two subtle ones, or with two shades of the same color.

You can do a lot of exciting things with these patterns, and use up a lot of old odds and ends of leftover yarn in trying them out. And when you have collected a large number of “test swatches” in all the colors of the rainbow and then some, sew them all together. The result will be the most glorious afghan you ever saw! You don't have to worry about working to a specific gauge in your test swatches, either. If they come out in several different sizes, just make a paper square the size of the smallest, place the square on each of the larger swatches, mark around its edge, and machine-stitch on the marks, twice around. Then you can cut off the excess from the larger squares without fear of raveling the knitting, and when they are sewn together (which is easily done, now that all are uniform in size and shape) the machine-stitching is concealed.

So—take out that old box of odd ounces and half-ounces of this and that—pick up your needles—and have fun.

Checked Rose Fabric

Like Rose Fabric, from which it is derived, this pattern makes a soft, deep texture with a good deal of lateral spread. Cast on and bind off very loosely, measure carefully, and beware of starting with too many stitches.

SPECIAL NOTE: This pattern must be worked back and forth on a circular needle or a pair of double-pointed needles.

Fireflowers

Fireflowers

This is a 20-row pattern, with the extra rows serving only to alternate colors. It may be worked in three colors only—one for the background, two for the pattern stripes—by repeating just Rows 1–20. Or it may be worked in two colors, using B for Rows 11 and 12 as well as 1 and 2. In this four-color version, it is best to break the strands of B, C, and D after the second and twelfth rows, rather than carrying them up the side of the piece, because it is a long stretch before these colors are repeated.

The “ssk” (which involves one long stitch and one background stitch) at the left-hand sides of the flowers must be worked correctly for best results. Be sure you slip both stitches *knitwise* before knitting them together, for if the long stitch is slipped *purlwise* it will be twisted, and will spoil the shape of the flower. The strands should be quite loose.

This pattern may be used in one, two, or three repeats as a pretty border design.

Scrap-Yarn Afghan Stitch

Here is an excellent solution to every knitter's perennial problem: what to do with leftover yarn scraps. This easy-to-work pattern, knitted in strips of 63 or 75 stitches each, will produce a beautiful afghan that uses every little yarn-end in your scrap box—the more colors, the better. Strips can be sewn or crocheted together at the sides, either across the width or along the length of the afghan, as desired. The cast-on and bound-off edges of each strip will form a handsomely scalloped self-border.

Colors are worked two at a time and changed at will at the beginning of any right-side row. The illustration shows three stripes of each color, but you need not stick to this or any other system; random alternation of colors is effective too. This pattern is as flexible as your imagination. You may use all kinds of yarn in the same piece; single strands of the heavier ones, double or triple strands of the thinner ones.

When used with the same two or three colors throughout, the pattern makes a delightful scarf, lap robe, or baby blanket. A stockinette-stitch variation, given below, will make lovely sweaters and jackets with scalloped edges.

Plaited Diagonal Stripe

Each right-side row decreases one stitch in each pattern repeat, and each wrong-side row restores it by a yo. Since the fabric is quite dense laterally, it is a good idea to bind off on the wrong side *without* restoring the subtracted stitches; this will prevent the bind-off row from showing an unattractive “spread”.

Thorn Pattern

This pattern is simple to work, and creates a really beautiful fabric. The technique is ingenious and unusual, but no “acrobatic” knitting is required to accomplish it; on the contrary, it goes very quickly. The fabric is firm enough for suits and coats, though not truly heavy.

 BELOW: Version II

Dip-and-Slip Tweed

Either version of this pattern makes a subtle and beautiful tweed that is easy to work. In Version I there are 5 consecutive stitches of the same color above each dip stitch; in Version II these lines of color are broken by slip-stitches so that the pattern seems smaller.

NOTE: Dip stitch (both versions)—insert needle into the front of st in the 3rd row below the first st on left-hand needle; draw up a loop, slip this loop onto left hand needle and k2 tog b (i.e., the loop and the first st), completing dip stitch.

Chain of Triangles

Stitches are increased on the Color B rows in this pattern, and reduced to the original number again on the Color A rows. The variation, below, is a pretty "rib" design. Both versions are easy to work.

Two-Color Plaited Basketweave

Two-Color Plaited Basketweave

On a purely physical basis, this pattern is not an easy one to work. It is *extremely* dense (a large number of stitches makes a surprisingly small piece) and should be worked with large needles. The dropped stitch may shorten so much that it is difficult to retrieve, especially in Row 2. But this awkwardness can be overcome by putting the stitch on a cable needle instead of simply dropping it. Some knitters will find one of these methods preferable, some the other. Notice that the third, or "extra" stitch in each pattern repeat is lost in the background as the fabric pulls together. This gives additional depth and thickness to the knitting, making a fabric so tough and durable that it would even serve as a rug.

Multiple of 3 sts. Colors A and B.

Cast on with Color A and knit one row.

Row 1 (Wrong side)—With B, p3, * sl 1 wyif, p2; rep from *.

Row 2—With B, k2, * drop next (Color A) st off needle to front of work, k2, then with point of left-hand needle pick up dropped st and slip it onto right-hand needle without working, rep from *, end k1.

Row 3—With A, * p2, sl 1 wyif; rep from *, end p3

Row 4—With A, k1, * sl 2 wyib, drop next (Color B) st off needle to front of work, sl the same 2 sts back to left-hand needle, pick up dropped st onto right-hand needle without working, k2, rep from *, end k2.

Repeat Rows 1-4.

False Flame Stitch

Here is a knitted imitation of the Flame Stitch, or Bargello Pattern. It may be worked in three or four colors if desired, simply by repeating the 4 pattern rows for each stripe of color. It is very handsome in a progressive series of colors, such as white, yellow, orange, red, or white, light gray, dark gray, black. The 3 Preparation Rows are always worked in the last color to be used.

Fingertip Tweed
 ABOVE: Check Version
 BELOW: Stripe Version

Fingertip Tweed

In Version I of this pattern, the middle stitch of the 3 knit stitches—which is the slipped stitch of the previous row, presents the back loop, so it is somewhat easier to work it as a “k1-b” than as a plain knit stitch. This action produces a third variation, which is not shown; the knitter may try it, and see what it looks like. Knitting this middle stitch in its front loop, in spite of the way it is turned, makes the twisted diagonal point above each check, so be sure to do this if you want your sample to look like the illustration. This distinction does not exist, of course, in Version II.

Cactus Flower

Though done with a technique similar to that of Counterpoint Quilting, this pattern has quite a different appearance. On Rows 2 and 8, the strand should be kept *loose* behind the three slipped stitches, as this is the strand that will be picked up later (Rows 5 and 11). Widely varying effects can be had from this pattern by alternating light and dark, bright and dull colors on different rows.

Fancy Diagonal Stripe

This pattern is an elaboration of Platted Diagonal Stripe, done with a similar technique, and should be bound off in the same way (i.e., on the wrong side, omitting all yo's) for the same reason. Although the basis of the two patterns is the same, the general effect is quite different; this one is decidedly more complex, both in appearance and in construction. Note that in this pattern the slip stitches are sometimes single, sometimes double—when they are double, it is always the *second* of the two slipped stitches that is passed over two subsequent knit stitches. The wrong side of this fabric shows a very interesting diagonal stripe in purl and slipped stitches. For a test swatch, cast on a *minimum* of 18 sts.

Crazy Quilted Pattern

This pattern is a development of Mrs. Hunter's Pattern, done in two colors for greater contrast. The passing of the yo's over subsequent stitches is delayed 4 rows, so that the yo's are elongated into V-shaped quilting strands. The result is a novelty fabric with isolated openings and considerable texture interest.

Two-Color Dip Stitch

A dip stitch is made by the technique demonstrated here, of pulling a stitch through the fabric from several rows below. This pattern may be worked in solid color for an attractive texture, or, it may be shown on the wrong side. The rather unusual practice of showing “broken” color bands in the purl stitches gives this fabric a beaded effect.

Sunrise Shell Pattern

This striking three-color design bears some resemblance to a crocheted Shell Stitch, and makes beautiful handbags, cushions, afghans, hats, coats, and sweaters. Drop-stitches and *wrong* side twists are used to make the pattern. The wrong-side Left Twist (LT) only sounds difficult; it is easy to work once the idea is grasped. Turning the work over slightly, so as to see the right side, insert the needle from the left into the back loop of the second stitch, then bring the needle point *around* the skipped stitch to the front, or wrong, side (where the yarn is held, waiting to purl); wrap yarn and purl, letting the needle point “back out” of the stitch in the usual way. Then work the skipped stitch as directed.

Multiple of 6 sts plus 3. Colors A, B, and C.

Cast on with Color A and purl one row.

NOTES: Right Twist (RT)—skip 1 st and purl the 2nd st, then purl the skipped st, then sl both sts from needle together.

Left Twist (LT)—skip 1 st and purl the 2nd st in *back* loop, then purl the skipped st in the usual way, then sl both sts from needle together.

PREPARATION ROWS

Omitting preparation rows, repeat Rows 5–28.

Long Bobble Pattern

Long Bobble Pattern

These bold pear-shaped bobbles are ingeniously constructed of a central increase, four turning rows, and two lateral decreases on the return row, then the entire assemblage is carried upward for 5 rows more by slipping the stitches. Packing these unusual bobbles close together, this pattern makes a very thick novelty fabric for hats, cushions, handbags, patch pockets, afghan squares, borders, etc. After having learned how to make this type of bobble, the knitter may use it also in other contexts.

Multiple of 6 sts plus 3. (15 sts minimum) Colors A and B

Cast on with Color A and knit one row

Row 1 (Right side)—With B, k1, * sl 1 wyib, k2, (k1, yo, k1) in next st, k1, (turn and p5, turn and k5) twice, k1; rep from *, end sl 1 wyib, k1.

Row 2—With B, k1, * sl 1 wyif, k1, p2 tog, p1, p2 tog b, k1, rep from *, end sl 1 wyif, k1.

Rows 3, 5, and 7—With A, k3, * sl 3 wyib, k3; rep from *

Rows 11, 13, and 15—With A, k6, * sl 3 wyib, k3; rep from *, end k3.

Rows 12 and 14—With A, k6, * sl 3 wyif, k3; rep from *, end k3

Row 16—With A, k6, * p3, k3; rep from *, end k3.

Repeat Rows 1-16.

Puffball Plaid

Puffball Plaid

A puffball is like a bobble—a knobby, knot-like formation made in a single stitch—but notice the difference here in the manner of working it. Each new loop is placed on the left hand needle and then knitted, exactly as in the method of casting on that is called “knitting-on.” Puffballs can also be used as spot-patterns on a plain solid-color stockinette fabric, or to replace bobbles or popcorns in any fancy pattern.

Multiple of 9 sts plus 4. Colors A and B.

Row 1 (Wrong side)—With A, purl.

Row 2—With A, knit.

Row 3—With A, k1, * p2, k7, rep from *, end p2, k1

English Rose Tweed

Here is a really lovely three-color pattern that is easy to work. It makes a flat, rather loose, and very wide fabric. Beware of casting on too many stitches, and be sure to bind off loosely.

This pattern will make charming sweaters, vests, jackets, coats, and children's wear. Try it in two or three different types of yarn—such as wool with ribbon, slubbed yarns with smooth, etc. The wrong side is beautiful, too.

Even number of sts. Colors A, B, and C.

Cast on with Color C and knit one row.

Row 1 (Right side)—With A, k1, * p1, k1 in the row below, rep from *, end k1.

Row 2—With A, knit.

Row 3—With B, k1, * k1 in the row below, p1; rep from *, end k1.

Three-Color Daisy Stitch

Sometimes this pattern is referred to as Star Stitch—which is fair enough, as it does form little star-like motifs—but then it is often confused with the *other* Star Stitch which is worked in quite a different way. Daisy Stitch is beautiful in one, two, three or four colors; the three-color version here will suffice to demonstrate. Note that on the “p3 tog, yo, p3 tog again” operation, the stitches are *not* removed from the left-hand needle until the whole operation is completed.

Multiple of 4 sts plus 1. Colors A, B, and C.

Row 1 (Right side)—With A, knit.

Row 2—With A, k1, * p3 tog, yo, purl the same 3 sts tog again, k1; rep from *.

Row 3—With B, knit.

Row 4—With B, k1, p1, k1, * p3 tog, yo, purl the same 3 sts tog again, k1; rep from *, end p1, k1.

Rows 7 and 8—With A, repeat Rows 3 and 4.

Rows 9 and 10—With B, repeat Rows 1 and 2.

Rows 11 and 12—With C, repeat Rows 3 and 4.

Repeat Rows 1-12.

Three-Color Daisy Stitch

Fan Dip Stitch

There are several details to be considered, if this pattern is to be worked most successfully. The “dipped” strands should not be twisted as they are passed over the subsequent stitch, therefore they must be turned *knitwise* as they are placed on the right-hand needle. To accomplish this, after drawing up the loop insert the left-hand needle behind the *back* strand of the loop, and through the loop to the front, slipping the loop onto the left-hand needle in this way. Then slip the loop *purlwise* back onto the right-hand needle, and it will be in the correct position. This “juggling” of the loop also affords an opportunity to lengthen it and loosen it; the pattern can be spoiled by work that is too tight. Notice that all three loops are taken from the *same* purled stitch 5 rows below.

This pattern need not be worked in two colors. It is an exceedingly pretty texture pattern when done in the same color throughout.

Multiple of 10 sts plus 2. Colors A and B

Cast on with Color A and knit one row.

Row 1 (Wrong side)—With A, p8, * k1, p9; rep from *, end last repeat p3.

Rows 2 and 4—With B, knit.

Rows 3 and 5—With B, purl.

Row 6—With A, * (k1, insert right-hand needle from the front under the purled Color A st 5 rows below, and draw up a loop; knit next st and pass the loop over the st just worked) 3 times, k4; rep from *, end k2.

Row 7—With A, p3, * k1, p9; rep from *, end last repeat p8.

Rows 8, 9, 10, and 11—With B, repeat Rows 2, 3, 4, and 5.

Row 12—With A, k5, rep from * of Row 6; end last repeat k1 instead of k4.

Repeat Rows 1–12.

ABOVE: Fan Dip Stitch
BELOW: Shell Dip Stitch

Shell Dip Stitch

This pattern is similar in principle to Fan Dip Stitch, but the technique is a little different. The shells can be made by “dipping” the right-hand needle, but the use of a crochet hook gives more control of the length of the six loops, which should be reasonably uniform. To find the right stitch from which to take the loops, count 3 stitches over on the left-hand needle and then 3 ridges down, beginning with the ridge immediately under the needle. Insert hook under the third ridge, just above the last Color A row.

In a single color, Shell Dip Stitch is a very pretty texture pattern.

Row 4—With A, k1, * k2 wrapping yarn twice for each st, k7; rep from *, end k2 wrapping yarn twice, k1.

Row 5—With B, k1, * sl 2 wyif dropping extra wraps, p7; rep from *, end sl 2, k1.

Row 6—With B, k1, * sl 2 wyib, k7; rep from *, end sl 2, k1.

Row 7—With B, k1, * sl 2 wyif, p7; rep from *, end sl 2, k1.

Row 8—Repeat Row 6.

Row 9—With A, k1, * p2, sl 3 wyif, p1, sl 3 wyif; rep from *, end p2, k1.

Row 10—With A, k1, * k2 wrapping yarn twice for each st, sl 3 wyib, make Puffball in next st as follows: insert needle in st as if to knit, draw through a loop and place this loop on left-hand needle; (insert needle into front of new loop and knit, then place next new loop on left hand needle 4 times, making 5 new loops in all; then k6 (the 5 new loops, plus the original st); then pass the 2nd, 3rd, 4th, 5th and 6th sts on right-hand needle one at a time over the 1st (original) st, completing Puffball; sl 3 wyib; rep from *, end k2 wrapping yarn twice, k1.

Rows 11 and 12—With B, repeat Rows 5 and 6.

Repeat Rows 1–12.

Cluster Quilting

This beautiful pattern is made by a fascinatingly unusual technique that is much less complicated than it seems at first glance. Novice knitters are likely to be frightened by the long lines of loose stitches dropped off the needle in Rows 1 and 10, looking as though they might disappear forever. But don't worry—they won't. The following rows pick them up again very neatly, one at a time. Since the dropped stitches are never crossed, there is no problem about knowing which one to pick up next; it is always the nearest one available.

Multiple of 8 sts plus 1. Colors A and B.

Florentine Frieze

The elements of this pattern are simple—a few woven bands, a little quilting—but the finished effect is one of intricate and amazing beauty. The caught-up strands make shapes reminiscent of the famous “garland” frieze in baroque decoration. The pattern makes a stunning yoke for a Scandinavian-type sweater, or fancy mittens, or decorative bands around skirts and sleeves. It is very good also for home accessories such as cushions and slipcovers.

Four-Color Blister Stitch

This beautiful pattern is worked by the drop-stitch technique (see **Drop-Stitch Honeycomb**) and is a 12-row repetition; the additional rows serve to alternate colors. The surface of the fabric is very “bumpy,” each little blister standing out in relief against the Color A background.

Multiple of 4 sts plus 3. Colors A, B, C, and D.

Cast on with Color A and purl one row.

Rows 1 and 3 (Right side)—With B, knit.

Rows 2 and 4—With B, purl.

Row 5—With A, k3, * drop next st off needle and unravel 4 rows down; insert needle from front into Color A st in 5th row below and knit, catching the 4 loose strands in st; k3; rep from *.

Row 6—With A, purl.

- Row 10—With B, purl, dropping all elongated Color A sl-sts off needle to back.
- Row 11—With A, k1, pick up first dropped st and knit it, k1, sl 3 wyib, k1, rep from * of Row 5; end pick up last dropped st and knit it, k1.
- Row 12—With A, p1. * p1 wrapping yarn twice, p1, sl 3 wyif, p1, p1 wrapping yarn twice, p1; rep from *.

Omitting preparation row, repeat Rows 1–12.

Snowball Stitch

Snowball Stitch

Here is an unusual color-and-texture pattern with large-purled clusters showing through a fabric of crossed elongated stitches. The effect is gay and informal, and the knitting firm and dense, so this pattern is ideal for warm ski sweaters, hats, and children's sportswear. It will also make cheerful cushion covers, extra-fancy sock tops, afghan squares, patch pockets and collars.

Multiple of 5 sts plus 1. Colors A and B.

- Row 1 (Wrong side)—With A, purl.
- Row 2—With A, knit.
- Row 3—With A, p1, * p1 wrapping yarn twice around needle, p2, p1 wrapping yarn twice, p1; rep from *.
- Row 4—With B, k1, * sl 1 wyib dropping extra wrap, k2, sl 1 wyib dropping extra wrap, (k1, yo, k1, yo, k1) in next st; rep from * across to last st, end last repeat with a plain k1.
- Row 5—With B, k1, * sl 1 wyif, p2, sl 1 wyif, k5; rep from *, end sl 1, p2, sl 1, k1.
- Row 6—With B, k1, * sl 1 wyib, k2, sl 1 wyib, p5; rep from *, end sl 1, k2, sl 1, k1.

Three Flowers

Here is a delightful pattern of knitted-in “embroidery”, ideal for borders or accent bands (on a yoke, for instance). The pattern is shown in alternating bands of contrasting color, which is another pleasing idea for cushions, handbags, dirndls or Tyrolean vests. Multicolored odds and ends of yarn can be used up by making such articles in as many different colored bands as desired.

Multiple of 10 sts plus 3. Colors A, B, and C.

Row 1 (Right side)—With A, knit.

Row 2—With A, purl.

Row 3—With B, knit.

Row 4—With B, k1, * k5 wrapping yarn 3 times for each st, k7; rep from *, end last repeat k5.

Row 5—With A, k1, * sl 1 wyib, k3, sl 3 wyib dropping extra wraps, k3; rep from *, end sl 1, k1.

Paving Stones

Here is a drop-stitch pattern with purled rows on the right side, giving an impression of rough-hewn rectangular blocks set in a wall or pavement. The wrong side of the fabric is attractive, showing deeply indented Color B knit stitches outlined by purl in the manner of the Two-Color Dip Stitch. (See also Four-Color Blister Stitch.)

Multiple of 4 sts plus 1. Colors A and B.

Cast on with Color A and knit one row.

Row 1 (Wrong side)—With A, purl.

Rows 2 and 3—With B, knit.

Row 4—With B, purl.

Row 5—With B, knit.

Row 6—With A, k2, * drop next st off needle and unravel 4 rows down; insert needle into the front of Color A st in 5th row below and knit, catching the 4 loose strands in st; k3; rep from *, end last repeat k2.

Rows 7, 8, 9, 10, and 11—Repeat Rows 1, 2, 3, 4, and 5.

Row 12—With A, k4, rep from * of Row 6; end k1.

Repeat Rows 1-12.

Knitter's Choice

ABOVE: First decrease
CENTER: Second decrease
BELOW: Third decrease

Knitter's Choice

Choose one of three different types of decrease, here, to make the puffy Color B motifs the shape that you prefer. The first decrease, a simple k5 tog-b, swirls the long stitches to the left. The second makes a square shape with Color A stitches encroaching at the top. The third makes the central stitch prominent. Another idea is to work the pattern in more than two colors, using a different decrease in each different-colored row of puffs.

Multiple of 4 sts plus 1. Colors A and B.

Cast on with Color A and knit two rows.

NOTES: First decrease—k5 tog-b.

Second decrease—k2 tog-b, k3 tog, then pass the k2-tog-b st over the k3-tog st.

Third decrease—insert needle into first 3 sts as if to k3 tog, and *slip* the sts from this position, k2 tog, then pass the 3 slipped sts all together over the k2-tog st.

Row 7—With B, k1, * sl 1 wyif, p2, sl 1 wyif, k2 tog, k3 tog, pass the k2-tog st over the k3-tog st; rep from *, end sl 1, p2, sl 1, k1.

Row 8—With A, k1, * drop first elongated st off needle to front of work, sl 2 wyib, drop next elongated st off needle to front; with left-hand needle pick up the first elongated st, sl the same 2 sts back to left-hand needle, then pick up the second elongated st onto left-hand needle, k5; rep from *.

Repeat Rows 1–8

Picot Stripe

These decorative stripes have a lot of texture interest. The cleverly constructed picot points are nubby, and stand out somewhat from the background. This pattern makes excellent borders for collars, cuffs, and pockets, and is very attractive in ski sweaters.

Multiple of 10 sts. Colors A and B

Row 1 (Wrong side)—With A, purl.

Row 2—With B, k2, * (k1, yo, k1, yo, k1, yo, k1) in next st, making seven sts from one; k9; rep from *, end last repeat k7.

Row 3—With B, knit.

Row 4—With A, k1, * k2 tog, k5, ssk, k7; rep from *, end last repeat k6.

Swallowtail Quilting

Swallowtail Quilting

This fancy design is an amalgam of three patterns. First, there is the simple stripe pattern of Rows 1–6, then there are two different half-drop patterns, one contained by Rows 1–6, 19–23, and 18; the other by Rows 13–17, 24 and 25, 2–5, and 12. Note that in these composite directions Row 1 does not appear again as Row 1 (it is replaced by Row 25), but it does reappear as Row 7.

“Knit the sl-st over” and “knit through the sl-st” are two actions with which the knitter may be unfamiliar, though they are not difficult to perform. To knit the sl-st over, pass the needle-point in front of the required number of skipped stitches (in this case, two), insert it into the front loop of the sl-st, then pass the needle-point back again in front of the same skipped stitches, catch the yarn to the right of the first stitch and knit, taking the sl-st off the left-hand needle but being careful not to let the two skipped stitches come off with it. To knit through the sl-st, insert the needle-point purlwise into the sl-st as if to slip it again, but do not slip it, knit the first stitch beyond it and bring this stitch back through the sl-st and off the left hand needle, being careful not to let the sl-st come off too. This action can be repeated as many times as necessary—twice, in this pattern.

Rows 20 through 23—Repeat Rows 14 through 17.

Row 24—With A, k1, * skip Color A sl-st, knit next 2 sts through the sl-st, then knit the sl-st in back loop, k1, skip next 2 sts, knit next Color A sl-st over the 2 skipped sts; k2, sl 1 wyib; rep from *, end last repeat k1 instead of sl 1.

Row 25—With A, k3, * p1, k1, p1, k2, sl 1 wyif, k2, rep from *, end p1, k1, p1, k3.

Omitting preparation row, repeat Rows 2–25.

House of Cards

Here is a fascinating pattern incorporating yarn-over stitches, slip-stitches, and contrasting colors. The stitch count varies; on Rows 2, 8, 14, and 20 the yarn-overs form increases; on Rows 6, 12, 18, and 24 the corresponding decreases are made to restore the original number of stitches. Each of these decreases includes a Color A slip-stitch carried from four rows below, and the Color B stitch adjoining it.

Multiple of 12 sts plus 3. Colors A and B.

NOTE: On right-side (even-numbered) rows, sl all sl-sts with yarn in back; on wrong-side (odd-numbered) rows, sl all sl-sts with yarn in front.

Row 1 (Wrong side)—With A, knit.

Row 2—With B, k1, * sl 1, k4, (sl 1, yo) twice, sl 1, k4; rep from *, end sl 1, k1. (On this row care must be taken to keep the 2 yo's strictly positioned between the 3 sl-sts. The central arrangement will be a double yo in Color B sts divided by a slipped Color A st.)

Row 3—With B, k1, * sl 1, p4, sl 1, purl the 1st yo, sl 1, knit the next yo, sl 1, p4, rep from *, end sl 1, k1. (On this row the same yo sts and sl sts must be kept in strict order. Be sure the 1st Color A sl-st of the group is slipped onto right-hand needle *before* the following yo is worked. The same caution will apply to Rows 9, 15, and 21.)

Row 4—With B, k1, * sl 1, k4, (sl 1, k1) twice, sl 1, k4, rep from *, end sl 1, k1.

Row 5—With B, k1, * sl 1, p4, (sl 1, p1) twice, sl 1, p4, rep from *, end sl 1, k1.

Fancy Texture Patterns

More unusual knitting techniques and arrangements of stitches will be found in this chapter than in any other. This is a miscellaneous assortment of patterns that will give various kinds of textured surface to your knitting, using methods that cannot be classified in any standard way because they are all different.

Even the highly experienced knitter will probably find among these patterns some ways of knitting that are unfamiliar. There are increase-and-decrease patterns, drop-stitch patterns, short-row patterns, elongated-stitch patterns, bobble and knot patterns, double-knit patterns, dip-stitch patterns, and others. Taken all together, they demonstrate the truly marvelous variety of things that can be done with knitting—a variety all the more remarkable when one considers the fact that knitting is basically the simplest operation imaginable: that of drawing a loop through another loop. How vast a structure of designs and skills has grown from that simple operation!

Fancy Texture Patterns are applicable, of course, to any and all kinds of knitting. What you do with them is up to you. Some might strike you as attractive patterns for a coat or a suit; some might seem just right for an afghan square; some might be appealing on a yoke for a sweater that you are making; some might serve for decorative panels on your dress, hat, or mittens. Each knitter will find a different set of favorites among these patterns, and use them in different ways. Extend your knitting skills by practicing those patterns that are new to your experience. There are great rewards for the knitter who does this, for she soon becomes mistress of an enormous, fascinating, and infinitely flexible “vocabulary” with which to express her own ideas.

Rambler Pattern

Rambler Pattern

Most experienced knitters can tell at a glance how cable, lace, knit-purl and color patterns are worked, but many of the simple texture patterns are elusive, even to the discerning eye. Here is one of the simplest of these patterns, yet its mechanism may escape you, no matter how expert you are. Try to reproduce it *before* reading the directions!

This fabric is pleasingly fluffy, yet firm, and will not curl. It does spread, so be sure to cast on with an extra-large needle or with two needles held together. Bind off loosely. Use it for scarves, lightweight jackets, sweaters. The wrong side is interesting, too. The first two rows repeated alone will give a subtly ribbed appearance.

Odd number of sts.

Rows 1, 3, 5, and 7—Wrong side—K2, * p1, k1, rep from *, end k1.

Rows 2, 4, 6, and 8—K1, * knit next st in the row below, p1; rep from *, end last repeat k1.

Rows 9, 11, 13, and 15—K1, * p1, k1; rep from *.

Rows 10, 12, 14, and 16—K1, p1, * knit next st in the row below, p1; rep from *, end k1.

Repeat Rows 1-16.

Small Quilted Cross-Stitch

Small Quilted Cross-Stitch

Here is a truly charming fabric that is easy to work, firm, sturdy, luxuriously deep in texture, and perfectly flat, without any curl to it at all. It makes wonderful warm coats, suits and jackets which never require blocking and never sag out of shape. The fabric is dense because the pattern "draws in", and so requires a fairly large number of stitches to attain a given width, check gauge. This pattern can be used also for borders, collars, cuffs, patch pockets or pocket edges, and other details. Work it with a good firm yarn and small needles for a beautiful handbag to match your ensemble! Try it also in two colors, using Color A in Rows 1 and 2, Color B in Rows 3 and 4.

Multiple of 4 sts plus 1.

Rows 1 and 3 (Wrong side)—K1, * p1, k1; rep from *.

Row 2—P1, * sl 1 knitwise wyib, knit into front and back of next st, k1, then pass sl-st over the last 3 sts made; p1; rep from *.

Row 4—P1, k1, p1, rep from * of Row 2; end k1, p1.

Repeat Rows 1-4.

Rosette Stitch

This simple stitch makes a beautiful fabric, very handsome in suits and coats. It is firm, close, and shows an unusual crochet-like surface.

Even number of sts.

Rows 1 and 3 (Right side)—Knit.

Row 2—* P2 tog, leave on needle; knit same 2 sts tog and sl from needle together; rep from *.

Row 4—P1, rep from * of Row 2, end p1.

Repeat Rows 1-4.

Rosette Stitch

Zigzag Ribbon Stitch

A handsome "flat" texture for tailored suits, skirts, cushions, bags, and dresses is made by this charming pattern, which depends upon simple stitch-lines for all its effect. It is interesting when a variegated yarn is used, or when worked in stripes of two or more colors.

Multiple of 10 sts.

NOTES: Lifted Increase (LI): insert right-hand needle into the front of next st *in the row below*, and knit; then knit the st on needle.

Back Lifted Increase (BLI): insert right-hand needle into the back of next st *in the row below* (i. e., from the top down into the purled loop behind the st on needle), and knit; then knit the st on needle in the usual way.

German Herringbone Rib

German Herringbone Rib

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

Beautiful ribbed and scalloped skirts can be made with this easy pattern, simply by starting at the bottom with 10 or 12 stitches to each purl rib instead of 2, and then decreasing in these purl ribs to narrow toward the waist. Matching sweaters or blouses can be made with the pattern as given.

Multiple of 15 sts plus 2.

Row 1 (Right side)—P2, * Make One (M1) by lifting running thread and knitting into the back of this thread, k3, p2, p3 tog, p2, k3, M1, p2; rep from *.

Row 2—K2, * p4, k5, p4, k2; rep from *.

Boxed Bobble

Boxed Bobble

This is a pretty arrangement of small bobbles in a knit-purl fabric of the utmost simplicity. It is a charming pattern for baby things, afghans, and fancy touches on garments such as pockets, panels, cuffs, and borders.

Multiple of 6 sts plus 1.

NOTE: Odd-numbered rows are wrong-side rows.

Dot-Knot Stitch

Here is one of those little “hint-of-texture” patterns that relieve a plain stockinette fabric so nicely. It is attractive in almost any kind of yarn, but is not very successful in variegated colors. A plain color, however, points up the little knots quite well.

Multiple of 6 sts plus 1.

Rows 1 and 3 (Wrong side)—Purl.

Row 2—Knit.

Row 4—K3, * insert right-hand needle under running thread between 1st and 2nd sts on left-hand needle, and draw through a loop loosely, then insert right-hand needle between these same sts *above* running thread, and draw through another loop loosely, then bring yarn to front between needles and purl the 1st st on left-hand needle, then with point of left-hand needle pass the first *loop* over the 2nd loop and the purled st, and off needle, then pass the 2nd loop over the purled st and off needle, k5, rep from *, end last repeat k3.

Rows 5 and 7—Purl.

Row 6—Knit.

Row 8—K6, rep from * of Row 4, end k1.

Repeat Rows 1-8.

Dot-Knot Stitch

Irish Knot

The Irish Knot is like a popcorn, except that it is completed all at once on a right-side row, by passing the increased stitches over the last stitch. This pattern gives a pleasing arrangement of Irish Knots within an embossed wave formation, very nice for a sweater or jacket with lots of texture interest.

Multiple of 14 sts plus 5.

Row 1 (Wrong side)—K6, * p2, k1, p1, k1, p2, k7; rep from *, end last repeat k6.

Row 2—P4, * p2 tog, k2, inc purlwise (by purling into the front and back of the next st), k1-b, inc purlwise, k2, p2 tog, p3; rep from *, end p1.

Row 3—K5, * p2, k2, p1, k2, p2, k5; rep from *.

Row 4—P3, * p2 tog, k2, inc purlwise, p1, k1-b, p1, inc purlwise, k2, p2 tog, p1; rep from *, end p2.

Row 5—K4, * p2, k3, p1, k3, p2, k3; rep from *, end k1.

Row 6—P2, k1-b, * p1, k2, p3, Make Knot (MK) as follows: (k1, p1, k1, p1, k1) loosely in next st, then with point of left-hand needle pass the 2nd, 3rd, 4th, and 5th sts on right-hand needle separately over the last st made, completing Knot; p3, k2, p1, k1-b; rep from *, end p2.

Row 7—K2, p1, * k1, p2, k7, p2, k1, p1; rep from *, end k2.

Row 8—P2, k1-b, * inc purlwise, k2, p2 tog, p3, p2 tog, k2, inc purlwise, k1-b; rep from *, end p2.

Row 9—K2, p1, * k2, p2, k5, p2, k2, p1; rep from *, end k2.

Row 10—P2, k1-b, * p1, inc purlwise, k2, p2 tog, p1, p2 tog, k2, inc purlwise, p1, k1-b; rep from *, end p2.

Row 11—K2, p1, * (k3, p2) twice, k3, p1; rep from *, end k2.

Row 12—P2, MK, * p3, k2, p1, k1-b, p1, k2, p3, MK; rep from *, end p2.

Repeat Rows 1-12.

Diagonal Knot Stitch

This basic pattern can be rearranged in many ways. As given, the diagonals run upward to the left; they can be worked so as to run to the right instead, or arranged in chevrons or zigzags, or made wider by increasing in more than two stitches at a time. This kind of knot also can be worked as a spot-pattern on a stockinette fabric, distributed at regular intervals in clusters of two, three, or more "knot" stitches together. After learning how to make the basic knot, try several different arrangements of it for different effects.

Irish Knot

Diagonal Knot Stitch

Multiple of 6 sts.

NOTE: Increase (inc) as follows: (p1, k1, p1) into one stitch, making 3 sts from one. "(Inc) twice" means to increase thus in each of the next two sts, which results in a total of 6 sts.

Row 1 (Right side)—* (Inc) twice, k4; rep from *.

Diagonal Scallop Stitch

Here is a lovely, quick-knitting "little" texture pattern that is ideal for converting that dull stockinette sweater, dress, or coat into an interesting garment. It makes a nice firm fabric with hardly any curl to it, and so is easy to block. Naturally, because the passed-over strands pull the stitches together, the fabric is tighter than stockinette stitch and will require more stitches for any given measurement. Check your gauge, adjust the number of stitches accordingly, and then knit something really pretty, patterned all over with these attractive little diagonals.

Multiple of 4 sts plus 2.

Rows 1 and 3 (Wrong side)—Purl.

Row 2—K1, * insert needle from behind under the running thread between the st just worked and the next st, thus putting an extra strand on the needle; k2, then pass the extra strand over the 2 knit sts; k2; rep from *, end k1.

Row 4—K3, rep from * of Row 2; end last repeat k1 instead of k2.

Repeat Rows 1-4.

Three "Increase" Textures: Lambs' Tails, Clamshell, and Tear Drop

All three of these patterns are made by increasing, one way or another, in a single stitch. Therefore each of the three can be used in almost any kind of position, relative to the rest of the knitting. Here, all three are given as spot-patterns for the sake of simplicity.

I. LAMBS' TAILS

This is a highly original texture pattern consisting of small chains of knitted-on and bound-off stitches projecting from the fabric and hanging downward. As a spot-pattern in this demonstration, the little "tails" are scattered all over a garter-stitch background. But a Lamb's Tail can be worked into any single stitch, anywhere. A single row of them might decorate the edge of a collar or a sleeve; several rows could serve as a border at the bottom of a sweater, jacket, or coat. A longer "tail", made by casting on and binding off more stitches, can be used as a belt-cum-nerf when tacked down at the lower end. The background need not be garter stitch; it can be anything. But it is a good idea always to purl into the stitch at the top of each "tail" on the return row.

As an all-over pattern, Lambs' Tails is appropriate for hairy, nubby or tweedy yarns, when a very shaggy effect is desired. When used on a background of ribbing, it makes delightful "pullover" ski caps. Try it in stripes of different colors!

Multiple of 4 sts plus 1.

Rows 1 and 2—Knit.

Row 3 (Right side) — * K1, cast on 4 and bind off 4 in next st as follows: knit the st, place new loop on left-hand needle beside the original st, then knit the new loop and place next new loop on left-hand needle, repeat until there are 4 new loops on left-hand needle beside the original st. Then bind off 4 in the usual way, i.e., k2, pass first st over second, knit next st, pass second st over it, and so on until 4 sts have been bound off, the last one being passed over the original st, which is now on right-hand needle. Rep from *, end k1.

Row 4—K1, * p1, k3; rep from *.

Two Drop-Stitch Patterns:

Drop-Stitch Honeycomb and Parenthetical Rib

Patterns of this kind tend to scare the novice knitter, who often labors under an impression that a dropped stitch is a catastrophe. But a little practice with these patterns will demonstrate that it is a legitimate knitting technique that can be fun to use.

Wheat Sheaves

Wheat Sheaves

Here is a very old and very beautiful texture pattern that lends itself to any type of knitted garment, and any type of yarn. The directions appear complicated at first glance, but they are the repetitive sort that can be learned immediately, once the principle of the pattern is grasped. The “give” of the diamonds and the “take” of the ribs are developed by increasing in the former and clustering in the latter.

ABOVE: *Drop-Stitch Honeycomb*
 BELOW: *Parenthetical Rib*

The usual fear is that the dropped stitch will unravel too far. Actually it is much less prone to do this than the beginner might think; but if it does, it is an easy matter to retrieve the stitch with a crochet hook or with the needles. Don't unravel by pulling the fabric apart laterally. Instead, use the right-hand needle point to pluck each strand out of the stitch above it.

Drop-stitches can be made on either side of the fabric, and can be either knitted or purled. These two patterns illustrate each case. Drop-Stitch Honeycomb is an interesting purl fabric, the knit side of which shows a variation of the classic Blister Check (4 *Treasury of Knitting Patterns*, p. 69). Parenthetical Rib also has a very beautiful "wrong" side, which may appeal to the knitter so much that she is unable to decide which side to use. This dilemma can be solved by using Parenthetical Rib for a scarf, stole, or reversible sweater, so that both sides can be shown.

I. DROP-STITCH HONEYCOMB

Cast on a multiple of 4 sts plus 3, and purl one row.

Rows 1, 3, and 5 (Wrong side)—Knit.

Rows 2 and 4—Purl.

Row 6—P3. * drop next st off needle and unravel 5 rows down, then insert right hand needle into the st from behind, lift the st and the 5 loose strands above it onto left-hand needle, and purl the st and the 5 loose strands all together; p3, rep from *

Rows 8 and 10—Purl.

Row 12—P1, rep from * of Row 6; end last repeat p1 instead of p3.

II. PARENTHETICAL RIB

Multiple of 12 sts plus 1.

Row 1 (Preparation row, right side)—P3, * k1-b, p5, rep from *, end k1-b, p3.
 Row 2 (Preparation row)—K2, * p3, k4, p1, k1, rep from *, end last repeat k3.

End of preparation rows.

Rows 3, 5, and 7—* P3, k1-b, p3, k5; rep from *, end p1.

Rows 4 and 6—K1, * p5, k3, p1, k3; rep from *.

Row 8—K1, * p2, drop next st off needle and unravel 5 rows down, then insert needle into st from front and knit the st, catching the 5 loose strands behind the st as it is knitted; p2, k2, p3, k2; rep from *.

Rows 9, 11, and 13—P1, * k5, p3, k1-b, p3; rep from *.

Rows 10 and 12—* K3, p1, k3, p5; rep from *, end k1.

Row 14—* K2, p3, k2, p2, drop next st off needle, unravel 5 rows down, pick up and knit the st and the 5 strands as before, p2, rep from *, end k1.

Omitting preparation rows, repeat Rows 3-14.

Cocoon Stitch

A truly fascinating texture is presented by this increase-and-decrease pattern. Small purred "cocoon" are nested among waving knit ribs to make a beautifully bumpy fabric for your most interesting sweaters. The pattern knits up rapidly and requires little or no blocking.

Multiple of 8 sts plus 1.

Row 1 (Wrong side)—P1, * k1, p1, k5, p1; rep from *.

Row 2—K1, * p5, k1, p1, k1; rep from *.

Row 3—P1, * k1 under running thread between the st just worked and the next st, (k1, p1, k1) in next st, k1 under next running thread, p1, p5 tog, p1; rep from *.

Rows 5 and 7—P1, * k5, p1, k1, p1; rep from *.

Row 9—P1, * p5 tog, p1, k1 under running thread, (k1, p1, k1) in next st, k1 under next running thread, p1; rep from *.

Rows 10, 11, and 12—Repeat Row 2, Row 1, and Row 2 again.

Repeat Rows 1-12.

Anemone Stitch

This beautiful stitch is ideal for afghan squares and cushions, as well as for garments. It looks very effective in two colors; simply work Rows 1 and 2 in one color, Rows 3 and 4 in the other. In the single-color version, the wrong side is also quite attractive.

Bind off on the wrong side, purling all sts. Or, if a right-side bind-off row is wanted, work one plain purl row and then bind off.

Multiple of 4 sts.

Row 1 (Wrong side)—Purl, wrapping yarn twice for each st.

Row 2—* Sl 4 sts briefly in order to drop extra wraps, replace the 4 elongated sts on left-hand needle, then (k4 tog, p4 tog) twice into these same 4 sts; rep from *.

Row 3—P2, purl across wrapping yarn twice for each st, to the last 2 sts, end p2.

Row 4—K2, rep from * of Row 2 across to the last 2 sts, end k2.

Repeat Rows 1-4.

Dura-Europos Patterns

Contributed by Virginia S. Gifford, Washington, D.C.

These two patterns come from the oldest known piece of knitting in existence. The city of Dura-Europos, on the bank of the Euphrates River in Syria, was founded in 300 B.C. and fell in 256 A.D. Archaeological explorations of this city by Yale University and the French Government uncovered samples of textiles made in the period between these two dates, among them a large fragment of undyed tan wool knitted in these patterns.

Tightly twisted stockinette stitch, made by knitting and purling into the backs of the stitches, is characteristic of the earliest knitting. It gives the authentic touch to the patterns, although they can be worked in plain knit and purl stitches also. Alternatively, the stitches may be "crossed" by working into the back loops on right-side rows only.

Knitter, let your hands reach back twenty centuries into the past and touch the hands of your unknown cultural ancestor who made that ancient fragment—never dreaming that he or she was making it for you!

NOTES: Increase (inc)—knit into the *back* of the st in the row below the next st on left-hand needle, inserting right-hand needle from the top down into the purled head of the st below the needle), then knit into the back of the st on left-hand needle.

Purl increase (purl inc)—purl into the front and back of the same stitch.

Bubble-Bobble

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

There are many ways of varying this unusual pattern, which comes from Czechoslovakia. Either the background stitches or the bobble stitches can be purled, instead of knitted, on the right side for texture contrast. The number of stitches to a repeat and the number of rows to the pattern can be changed to suit any proportions. The turning rows can be worked only twice, or can be worked 4 times or more to make the bobbles smaller or larger as desired. The sides of the bobbles are open, and so may be threaded with a contrasting ribbon that will run behind each bobble. With a double or single row of "Bubble-Bobbles" this can make an interesting border.

Dragonfly Check Pattern

In some cases, depending on the elasticity of the yarn and the individual technique of the knitter, the crochet hook may be dispensed with in working this pattern. Instead, the right-hand needle point can be taken *back* to the central decreased stitch to draw through the second loop in Rows 8 and 16. But if this is awkward to do or stretches the fabric too much, the crochet hook is recommended.

Double Stockinette, or Miniature Herringbone

This is one of the “super-dense” fabrics. It has to be worked with needles that are fairly large, in proportion to the weight of the yarn. Even with large needles, the stitches will compress to a very small size. At first the technique may seem difficult, necessitating an extra push with an extra finger to get the first loop off the needle without allowing the second loop to follow. But this pattern is well worth taking a little trouble to learn. It makes a beautiful fabric that is luxuriously thick and cosy, perfect for extra-warm mittens, sturdy cushions, potholders, and comfortable, long-wearing slippers. Try it, too, in two colors. This is especially effective when the two colors are close together in shade, such as cream with fawn, rose with pink, blue with aqua, gold with rust, etc.

Flower Garden

Flower Garden

Mary, Mary couldn't possibly be contrary, with a garden of these pretty posies blooming all over her sweater, or in a single horizontal band around the border of her skirt. Or, she could use a single flower motif in a vertical panel treatment, with a panel of 13 stitches—6 purl stitches each side of the flower. Although the motif requires 12 rows for completion, each flower, like a bobble, is made out of just one stitch.

VARIATION (not illustrated)

Contributed by Bernice Haedike, Oak Park, Illinois

A very strong, thick fabric with all surface strands running upward from left to right (i.e., without the “herringbone” effect) is created by working “k2 tog” instead of “k2 tog-b” in Row 1. Worked in this way, the pattern resembles a heavy tapestry stitch such as petit point, gobelin or cross stitch. All pattern operations remain the same except that the right-side stitches are worked together in the front loops instead of the back loops.

Double Garter Stitch, or Back Stitch

Double Garter Stitch, or Back Stitch

Sometimes this fascinating pattern is called Double Knitting. The directions always say, “knit second loop of first stitch and first loop of next stitch together”, which can easily confuse a newcomer to the pattern because it is hard to distinguish between the first and second loops. Either loop of each double-wrapped stitch can be presented first on the needle. So, to tell them apart, look at the double-wrapped stitch as you hold the work, and notice that it consists of one strand that runs down to the row below, and one strand that passes under the needle and up behind it. It is the *first* of these that is considered the “first loop”. Thus, in working, catch the strand that communicates with the preceding row, and leave the loose strand on the needle to be knitted together with the next stitch. The “first loop” of the first stitch of each row is knitted plain, the last stitch of each row is knitted with a double wrap and both loops are taken off the needle.

Unlike Double Stockinette, this fabric is quite loose and elastic. It makes very beautiful scarves, baby blankets, afghans and throws. It is a one-row pattern, the Preparation Row not being repeated. To bind off, work the last row as usual but *without* the double wraps, then bind off the stitches loosely. The fabric is the same on both sides.

Cording Stitch

This pattern makes firm, round, horizontal cords across the width of the fabric. The size of the cords can be varied, of course, depending on how many rows down the stitches are taken. This pattern is not suitable for vertical combination with other stitch patterns in the same piece, because the cords will pull the knitting up considerably, and cause puckering if there should be plain uncorded stitches alongside. It adapts nicely, however, to separate piece accents such as patch pockets, button bands, cuffs, collars, and cushion covers. The cords may be worked in a contrasting color, allowing 4 rows of color for each cord in the pattern as given.

Pillar and Web

This is a novelty pattern that has something of the quality of an openwork Ladder, except that there is no openwork involved in its making. Both sides of the fabric are very attractive, so the choice of sides is up to the knitter; here, the purl side is shown. In fine yarn this fabric makes a very pretty and unusual shell, stocking, or summer stole.

Hornets' Nest

The original stitch multiple given with this pattern doesn't last long—in fact it pertains only to the first preparation row. It may be restored before binding off, by omitting the last “Make 11” and “p3 tog” in the pattern rows, and decreasing the “nest” motifs that are already established.

Multiple of 20 sts plus 3.

NOTE: Make 11 as follows: *in the same stitch* (k1, yo) 5 times, and knit one more.

PREPARATION ROWS

Row 1 (Right side)—Knit.

Row 2—P1; * p3 tog, p17, rep from *, end last repeat p5.

Row 3—K5, * Make 11, k17; rep from *, end last repeat k15.

Row 4—Purl.

Row 5—K1, * k2 tog, k9, ssk, k15, rep from *, end last repeat k11.

Twist-Stitch Patterns

The standard method of working a Right Twist is: skip 1 st, knit the second st, then knit the skipped st and sl both sts from needle together. The standard method of working a Left Twist is: skip 1 st and knit the second st in back loop, then knit the skipped st in front loop and sl both sts from needle together.

These methods, however, are not “standard” in this book. Both twists can be done in a better way—at least, in this author’s opinion. Your opinion may differ, so if you prefer to stick to the standard methods, by all means do so. But first, do consult the Glossary of this book and try out the directions given for “RT” and “LT.” If you like these newer methods, use them; if not, ignore them henceforth. For most knitters they *will* produce a somewhat neater result than the old standard methods, **and are perhaps a little faster to work.**

Some of the patterns in this section employ still other methods of twisting stitches, and in these cases the method is explained in the pattern notes. Even the old standard methods, as above, are explained wherever they are used. But where “RT” and “LT” occur in any pattern *without* specific twist directions, then the methods intended are **the ones described in the Glossary.**

Having settled all that, we can proceed to a discussion of twist patterns in general. Very interesting patterns they are, too. Twist stitches constitute an excellent way of making “traveling” diagonal lines and cable-like panels, without any fussing with a cable needle. Twist stitches therefore can be adapted to all sorts of designs and shapes and backgrounds. It is easy to invent original twist patterns for yourself, because the basic technique is simple and can be used to make diagonal lines go in any direction and for any distance. The patterns that are given here in the panel form are so close to cables that they can be used at will as substitutes for cables or in combination with them. You can even make an entire fisherman sweater without ever using a cable needle, simply by planning the sweater all in twist-stitch panels!

When you work with twist stitches, your gauge is likely to have more stitches to the inch than stockinette stitch in the same yarn on the same needles. Twists pull

the fabric together laterally, so you must be sure to cast on enough stitches for the proper width. Twist patterns work well in any kind of yarn, from heavy to fine, but the needles must not be too large in proportion to the weight of the yarn, because a twist worked with over-large needles will "open up" the stitches and leave them looking limp and sloppy.

Twist stitch patterns can be simple or complex, sporty or dressy, picturesque or elegant. They are not confined to any particular type of yarn or style of knitwear. You can use them in dress-up coats or sport jackets, ski sweaters or cocktail dresses, children's wear or afghans. Choose a few that you like, and try them. Put them together with other kinds of patterns for contrast. Little ideas that lead on to big ones abound in knitting patterns, and the twist stitch is certainly one of the best of these little ideas.

Purl-Twist Knot

Purl-Twist Knot

Contributed by Helen R. McShane, Brooklyn, New York

This is an easy pattern that gives a pretty, nubby allover texture for coats and suits, sweaters, dresses, etc. The wrong side is interesting too as a rough purl fabric with a hint of a design.

Multiple of 4 sts.

Rows 1 and 3 (Wrong side)—Purl.

Row 2—* K2, p2 tog and leave on needle; insert right-hand needle from back between the sts just purled tog, and purl the first st again; then sl both sts from needle together; rep from *.

Row 4—* P2 tog and purl first st again (as in Row 2), k2; rep from *.

Branching Rib Pattern

Austrian Block Pattern

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

Left unpressed, this simple but effective pattern closes up into deep ribs that are alternately broadened into leaf-like shapes and slimmed down to a single stitch. Because of this interesting texture, the pattern is good for bulky sweaters, and works beautifully in panels of 21 or 31 stitches.

Twisted Diagonal Stripe

This neat and subtle fabric looks like the impossible accomplished—diagonal bands of ribbing on a knit-stitch background! Of course, it isn't real ribbing, just twisted stitches. The same pattern can be done equally well with right twists; but in this case, the diagonals must be moved one stitch to the *left* on every right-side row, instead of to the right as given.

The slip-chain technique is used here to make a simple and beautiful ribbed fabric. It is particularly interesting when left unpressed, so that the ribs are allowed to close up together.

Here is an attractive fancy-rib design for sweaters; its elements are simple, but its overall effect is very nice. Work it with smallish needles so that the twists, when purled on the right side, will not show too many or too large openings in the fabric.

Brocade Chevron

Brocade Chevron

Here is a beautiful pattern for sports wear, coats, yokes, or borders. The chevrons are done in Seed Stitch and set off by twisted edges. The fabric is firm and dense, and is best worked on smallish needles so that the stitches will lie close.

Multiple of 10 sts plus 4.

NOTES: Right Twist (RT)—skip 1 st and knit the 2nd st, then knit the skipped st, then sl both sts from needle together.

Left Twist (LT)—skip 1 st and knit the 2nd st in *back* loop, then knit the skipped st in *front* loop, then sl both sts from needle together.

Heraldic Pattern

Crossed swords and battle-flags hanging on a rough stone wall—does this design suggest such things to you? Even if it doesn't, it is still an exceedingly handsome pattern for a man's or a boy's sweater, and so easy to work that you can use it all over a garment for a *big* man whose sweaters take a lot of knitting.

Ribbed Leaf Pattern

This beautiful twisted-all-over fabric is reminiscent of the shapes of fossilized fern leaves traced in rock. A single motif can be worked in cable fashion; see Ribbed Leaf Panel.

Double Lattice

Here is a pattern that will give the knitter plenty of practice in the use of twist stitches, since nearly all of them are twisted on the right-side rows. It also demonstrates how the twist-stitch technique can be a time-saver; imagine how long this handsome fabric would take to make, if all the stitches were cabled instead of twisted!

Three Twist Patterns with Openwork: Diagonal Crepe Stitch, Deep Waffle Pattern, and Wide Waffle Pattern

All three of these patterns are deep in texture, thick but light and fluffy. Diagonal Crepe Stitch is a good thermal fabric; try it in a pair of “longjohns”! (Very handsome ones they will be, too.) Deep Waffle Pattern comes from Switzerland, and in fine yarn makes a delicate and lovely sweater or shell. Wide Waffle Pattern is an enlarged version with the pattern lines slanted more toward the horizontal.

Sheepfold

Contributed by Elizabeth Zimmermann, Milwaukee, Wisconsin

This pattern was originally planned for circular knitting, so that all rows would be worked from the right side. To do it in this way, simply work all odd-numbered rows backward, substituting "knit" for "purl" and vice versa, and working plain RT and LT instead of RRT and RLT. When converted into back-and-forth knitting, the pattern calls for some twists made on the wrong side. (See Sunrise Shell Pattern for additional discussion of RLT.)

Notice that the usual right-side Left Twist is to be done by the classical method rather than the new method of working the two stitches together. The reason for this is that the two stitches together may become too tight for convenience in working the subsequent *wrong* side twist. The Right Twist, on the other hand, can be worked either way (it is tighter when done by the new method) and so this is not described in the notes.

Panel of 16 sts.

NOTES: Left Twist (LT)—skip 1 st and knit the 2nd st in *back* loop, then knit the skipped st in front loop in the usual way, and sl both sts from needle together.

Reverse Left Twist (RLT)—skip 1 st and purl the 2nd st in *back* loop, then purl the skipped st, then sl both sts from needle together.

Reverse Right Twist (RRT)—There are two methods of working this twist, the preferred one given first: (1) Skip 1 st and purl the 2nd st, then p2 tog (the skipped st and the 2nd st) and sl both sts from needle together. (2) Skip 1 st and purl the 2nd st, then purl the skipped st and sl both sts from needle together.

Knit-Twist Lattice with Lace

This fabric looks beautiful and very fancy, although it is not at all difficult to work. *Notice* that in Rows 4 and 28 there is a double yo in the middle of each motif, although in the directions this double yo is split into two different sets of parentheses. Also, *notice* that another double yo is formed by the last and the first directions of Rows 10, 14, 18, and 22, when these pattern rows are repeated across. Always bear in mind that each double yo makes two new stitches on the needle, and is always worked (k1, p1) on the return row.

Multiple of 14 sts plus 2.

Row 1 (Wrong side) and all other wrong-side rows—Purl, working (k1, p1) into every double yo from a previous row.

Row 2—K1, * yo, ssk twice, (k2 tog, yo) twice, k2, RT, k2; rep from *, end last repeat k4 instead of k2, RT, k2.

Gable Pattern

Little “windows” of faggoting add interest, here, to an allover pattern of twist-stitch chevrons. Notice that the decreases on either side of the openwork are worked in opposition to the slant of the stitches, to make sharp clear edges.

Medallion with Leaf

This pattern is attractive as a panel in fancy sweaters such as Aran knits. Or it can be used to “dress up” afghans, coat sleeves, hats, mittens, or knee socks. There are, of course, many possible variations; the medallions can be larger or smaller, or filled in with purl, seed or moss stitch instead of garter stitch, or featuring some other motif instead of the embossed leaf in the center.

Three Knit-Twist Panels: *V, Tent, and Heart*

These are three fairly wide cable substitutes, all using the knit-twist method of crossing stitches I and II, the “V” and the “Tent”, are quite straightforward. Either could be used in a ribbed or panel patterned skirt—as a minor design in a fisherman sweater, or as an all-over pattern on a multiple of 12 stitches plus 2. These twisted diagonal stitches could also be arranged as zigzags, diamonds, braids, or plain diagonals running all to the right or all to the left—as when I or II is cut in half to make a panel 5 stitches wide with only the first or second half of each pattern row being worked.

The “Heart” motif (III) is not often seen in knitting patterns, for the good reason that knitting, by its very nature, makes it difficult to form a rounded top to a design. The upper curves of any heart-shaped pattern, therefore, are usually made in some rather awkward way, by working 4 or 5 stitches together, for instance. This third panel suffers from the customary awkwardness but does manage to achieve a recognizable heart shape.

Ramp Pattern

This design can slant upwards to the left or to the right, depending on how the knitter wishes to arrange it. Both versions are given. They can be worked separately, or placed together in combination.

Twist-Rib Chevron

The outlines of this design happen to be filled in with twisted ribs—this is traditional—but they could be filled in with garter stitch, seed stitch, moss stitch, or plain stockinette. With any “filling” you like, this is a beautiful pattern for fancy sweaters, afghans, or dresses.

CHAPTER EIGHT

Cables

Not very many years ago, several kinds of sweaters peculiar to various coastal areas of the British Isles were suddenly discovered by the world of fashion. Their impact on that world was tremendous. Hardly ever before in history has any “peasant style” been so widely imitated, adapted, and adored. And hardly ever has so great an explosion of pattern ideas been derived from a single source.

For centuries, men and women in small fishing villages invented and developed prototypes of today’s cable designs. Each family or clan had its own. When families were combined by intermarriage, family patterns also were combined into single garments. Combination of these patterns went on undisturbed for a long time, slowly **developing a rich variety.**

The Aran Isles, off the western coast of Ireland, are now famous as the source of the traditional fisherman sweater with its heavily embossed surface entirely covered by gorgeous cable combinations. But many other island and seaport localities contributed to the present abundance of cable designs. They come from Cornwall, Yorkshire, Guernsey, Jersey, and many other places. A special kind of fisherman sweater was known as the Bridal Shirt, traditionally knitted by the young fisherman or by his sweetheart, to be worn on his wedding day. The patterns in such garments were often inspired by things common to the daily work and life of the people: ropes, knots, chains, nets, waves, vines, berries, shellfish, driftwood.

It is a sad fact that when any particular branch of handicraft becomes wildly popular, it also becomes cheapened. In order to fill the world-wide demand for “Aran knits”, knitwear manufacturers soon devised inexpensive ways to imitate them. Hand knit sweaters, too, were made in hasty ways for the market, using bigger needles, fewer really intricate patterns, and hence less of the time and care necessitated by **traditional methods.**

But in the process of popularization, good things also happened to this type of knitting. Creative knitters everywhere began to build on the tradition, developing new and fascinating cable designs to be used along with the old ones. Therefore, many

unusual contemporary cables will be found in this chapter, side by side with some of the classics. Today's hand knitter has no need to "make do" with the shoddy products that commercial fisherman sweaters all too often are. On the contrary, she can make cable-combination garments even more magnificent than the traditional ones, because she has more patterns to choose from than the old knitters ever had.

The great virtue of a cable-combination garment like a fisherman sweater is that it is—or should be—*one of a kind*. Cables can be put together according to the knitter's taste, and the result is something that no one else has ever done in just that way before. Anyone who has ever made *one* fisherman sweater will know how to make an original one by using different combinations. Patterns can be combined at will until the requisite number of stitches is achieved, then all that is necessary is to go ahead and knit them, keeping track of the row numbers in each one separately, so there is no confusion. Various panels can be packed closely together—the more the better—being set apart by no more than a single knit stitch. A rich profusion of embossed shapes is the mark of a truly fine Aran-style garment.

For the less ambitious knitter, there are many cables that can be worked all by themselves—just one or two panels—in an otherwise plain garment. Why leave a sleeve flat and unadorned, for instance, when an interesting cable panel can be run up the center of it? Why make a dull, plain cardigan for your husband, brother, father, son, or boy friend, when a pair of cables on each side of the front bands can make it look distinctively and handsomely masculine? It is so easy to designate the required number of stitches for your favorite cable, setting them off with markers if you like, and work the cable while the rest of the garment is being worked plain. It is a waste of your time and skill to hand knit a garment all in stockinette stitch, a machine-made garment would serve just as well. Every garment you make should have a little bit of *you* in it, and this means a little bit of pattern that *you* have chosen for it. Cables are among the most adaptable patterns for this. They go anywhere, do anything, and always look in crisp, casual good taste.

LEFT: Alternating Cable
RIGHT: Aran Braid

Alternating Cable

This pattern is definitely "different". It is really a double cable, but worked alternately to the right and left so that the two sides do not correspond. The cable is simple to work.

Panel of 12 sts.

Row 1 (Wrong side) and all other wrong-side rows—K2, p8, k2.

Row 2—P2, k4, sl 2 sts to dpn and hold in front, k2, then k2 from dpn; p2.

Row 4—P2, k8, p2.

Row 12—Repeat Row 8.

Repeat Rows 1-12.

Aran Braid

With this easy pattern, even a beginner can make thick, fancy, intricate looking cables to decorate hats, mittens, pickets, or outdoor sweaters. The pattern appears to be very carefully plaited, but in fact its four simple rows can be worked with a minimum of concentration.

Panel of 12 sts.

Rows 1 and 3 (Wrong side)—K2, p8, k2.

Row 2—P2, (sl 2 sts to dpn and hold in back, k2, then k2 from dpn) twice, p2.

Disc Cables

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

A circular shape is not common in knitting patterns, because knitting simply does not lend itself to the construction of such a shape. Knit and purl stitches, their angles and their methods of formation, are much better suited to vertical, horizontal, and diagonal designs. However, in these three cables—Banjo Cable, Dollar Cable, and Seed Wishbone—we see one of the few ways of making round shapes in knitting.

Repeat Rows 1–8.

Five-Rib Braid Cables: *Tight, Loose, and Elongated*

Tight Five-Rib Braid is the basic cable here—similar to Aran Braid, but with five interlocking ribs instead of four. The other two Five-Rib braids are variations. All three are beautiful cables, not difficult to work but interesting.

I. TIGHT FIVE-RIB BRAID

This little cable is very dense and firm, crossing two stitches over two every other row.

Panel of 14 sts.

NOTES: Front Cross (FC)—sl 2 sts to dpn and hold in front, k2, then k2 from dpn.

Back Cross (BC)—sl 2 sts to dpn and hold in back, k2, then k2 from dpn.

LEFT: *Tight Five-Rib Braid*
CENTER: *Loose Five-Rib Braid*
RIGHT: *Elongated Five-Rib Braid*

Rows 1 and 3 (Wrong side)—K2, p10, k2.

Row 2—P2, k2, (FC) twice, p2.

Row 4—P2, (BC) twice, k2, p2.

Repeat Rows 1-4.

II. LOOSE FIVE-RIB BRAID

This cable has the same form as Tight Five-Rib Braid, but two plain right-side rows are inserted so that the pattern takes twice as many rows. Also, single purl stitches are placed between the ribs.

Panel of 18 sts.

NOTES: Front Cross (FC)—sl 3 sts to dpn and hold in front, k2, then sl the purl st from dpn back to left-hand needle and purl it, then k2 from dpn.

Back Cross (BC)—sl 3 sts to dpn and hold in back, k2, then sl the purl st from dpn back to left-hand needle and purl it, then k2 from dpn.

Row 1 (Wrong side) and all other wrong-side rows—K2, p2, k10 4 times, p2, k2.

Row 2—P2, (k2, p1) 4 times, k2, p2.

Row 4—P2, k2, (p1, FC) twice, p2.

Row 6—Repeat Row 2.

Row 8—P2, (BC, p1) twice, k2, p2.

Repeat Rows 1-8.

III. ELONGATED FIVE-RIB BRAID

One more plain row is included in this version, so that the pattern is elongated eccentrically, or half way. Still another plain row could be inserted between Rows 6 and 8—making 12 rows in all—to form an even looser version. The wrong-side rows could be worked just like the wrong-side rows in the Loose Braid, but here they are purled, which makes a slight difference in the cabled crossings (see Notes).

Panel of 18 sts.

NOTES: FC and BC—same as for Loose Five-Rib Braid. The central stitch is not a purl stitch, since it is not knitted on the preceding row, nevertheless it is put back on the left-hand needle and purled in the same way.

Row 1 (Wrong side) and all other wrong-side rows—K2, p14, k2.

Rows 2, 4, 6, and 8—Same as Rows 2, 4, 6, and 8 of Loose

Five-Rib Braid, above.

Row 10—Repeat Row 2.

Repeat Rows 1-10.

Row 16—Repeat Row 2.

Repeat Rows 1-16.

Wrapped Rib Cable

This is nothing but a simple cable, broken at the sides by an encroachment, at intervals, of the purled background. The result is remarkably pretty and unusual. Recommended for beginners or near-beginners who are looking for an easy but “different” pattern.

LEFT: *Wrapped Rib Cable*

CENTER: *Crossed V Stitch*

RIGHT: *Gordian Knot*

Gordian Knot

In spite of its rather forbidding name, this pattern is easy to work. By a clever twist in the cabling technique, the central purl stitches are forced forward to make a tight little knot with the knit ribs crossed behind. The cable appears as a small chain with links tightly tied together.

Panel of 10 sts.

Four Cables with Openwork: Picot Eyelet Cable, Waves and Footprints, Highlight Cable, and Brisket Cable

LEFT TO RIGHT

1. *Picot Eyelet Cable*
2. *Waves and Footprints*
3. *Highlight Cable*
4. *Brisket Cable*

All four of these cables are simple to work, and pretty either single or in combination. They are "idea" patterns, because the knitter can add touches of openwork to other types of cables as well. Only four out of a large number of possibilities are shown here.

I. PICOT EYELET CABLE

Panel of 10 sts.

Row 1 (Wrong side)—K2, p6, k2.

Row 2—P2, k1, k2 tog, (yo) twice, ssk, k1, p2.

Row 3—K2, p2, (k1, p1) into the double yo of previous row, p2, k2.

Row 4—P2, k6, p2.

Row 5—Repeat Row 1.

Row 6—P2, sl next 4 sts to dpn and hold in front, k2, then sl the center 2 sts from dpn back to left-hand needle and knit them, then k2 from dpn; p2.

Rows 7 through 18—Repeat Rows 1 through 4, 3 times more.

Repeat Rows 1–18.

II. WAVES AND FOOTPRINTS

Panel of 8 sts.

Row 1 (Wrong side) and all other wrong side rows—K2, p1, k2 (twice).

Rows 2, 6, and 10—P2, k1, yo, ssk, k1, p2.

Rows 4 and 8—P2, k1, k2 tog, yo, k1, p2.

Row 12—P2, k4, p2.

Row 14—P2, sl next 3 sts to dpn and hold in back, k1, then sl the center 2 sts from dpn back to left-hand needle and knit them, then k1 from dpn, p2.

Rows 16, 20, and 24—P2, k1, k2 tog, yo, k1, p2.

Rows 18 and 22—P2, k1, yo, ssk, k1, p2.

Row 26—Repeat Row 12.

Row 28—P2, sl next 3 sts to dpn and hold in front, k1, then sl the center 2 sts from dpn back to left-hand needle and knit them, then k1 from dpn, p2.

Repeat Rows 1–28.

Bobbled Cable

This is a simple eccentric cable with a purled bobble worked into the broader portion. It is a basic demonstration only; bobbles may be placed like this on any kind of cable, and in any quantity, according to the taste of the knitter.

Panel of 11 sts.

Row 1 (Wrong side) and all other wrong side rows—K2, p7, k2.

Ripple and Rock

In this simple and pretty bobble cable, the bobble is unexpectedly placed in the *smaller* of the two diamond shapes, which gives a rather novel effect. The pattern is good in central sleeve panels. With a background worked in garter stitch instead of plain purl as shown, it makes a delightful buttonhole band for a cardigan—the buttonholes being placed in the middle of the larger diamonds.

Framed Cable

Try this graceful pattern instead of a simple cable in a tennis sweater or similar “classic” garment. The Framed Cable is remarkably elegant, too, as a border for a cardigan or a single sleeve panel. This is one of those why-didn’t-I-think-of-that patterns, with exceedingly simple elements that happen to combine very successfully. (No, your author *didn’t* think of it. It is an English pattern.)

Giant Embossed Plait

Contributed by Grace E. Smith, LaVerne, California

This is a huge and heavy plait pattern made by a highly unusual method. Each of the plaited ribs is a series of short rows, and each one stands up a full quarter-inch, or more, from the background. If several of these giant plaits are being worked at once, then a separate cable needle will be required for each, because the stitches are left on the cable needle throughout an entire right-side row, and are not picked up again until the return row. (If you want to use a number of Giant Embossed Plaits but do not have a sufficient number of cable needles, round toothpicks will do nicely instead.)

Dry Bones Cable

In strong contrast to the Nautical Twisted-Rope, this cable is about as skeletal and skinny as a cable can be. But its slender lines of single stitches suggest the wider motif that would result if these “bones” were fleshed out with seven knit stitches instead of the solitary one in the center.

Triplet Cable

In this beautiful design, three bobbles stand atop three ribs in the center of a fancy half-diamond, each motif opening out gracefully into the one above it. Notice the unusual use of cabled ribbing in the border, and of garter stitch for the central background.

Drunken-Sailor Cable

Here is a marvelously unusual cable for your most "original" fisherman sweaters. The big five-stitch rib is shredded into five separate ribs in a diagonal ladder-like design. Notice that there is no actual crossing (5 over 5) of the large ribs, as this would squeeze the pattern too much. Instead, an illusion of a cable twist is cleverly achieved by means of increases and decreases.

Cork Cable

Here is a simple but interesting Irish cable design featuring three ribs crossing either to the left or to the right. The two types can be used to balance each other as shown. For a third variation, the cable can be worked in braided fashion by using the front cross (Version II, Row 6) on the sixth row and the back cross (Version I, Row 6) on the twelfth.

Panel of 14 sts.

VERSION I. BACK CROSS

Row 1 (Wrong side) and all other wrong side rows—K2, (p2, k2) 3 times.

Slack Line, or Drunken-Sailor Cable

This pattern is fun, easy to work, and mysterious—everyone wonders how the cable is made to slither gently from side to side! It is done with increases and decreases on every 4th row. Notice that the cable is twisted to the right when traveling to the left and to the left when traveling to the right. This makes it seem about to untwist itself, and adds to the “precarious” effect.

Homes of Donegal

In the classic Aran tradition, this pattern clusters four greatly enlarged popcorn motifs—which really become bell motifs as a result—inside an embossed diamond. The same idea is often seen in an expanded form with larger diamonds containing five, seven or nine motifs.

Latticed Diamond

In this beautiful cable, the three stitches forming the diamond borders are separated from each other, one at a time, to form the interior design of single knit stitches; then they re-join each other in the upper half of the diamond. Therefore there are three types of front cross and three types of back cross involved in working the pattern, but they differ only in the number of knit stitches used.

Three Cables with Irish Knots: Hollow Oak, Crazy Maypole, and Lorgnette Cable

Though these three cables are quite diverse in appearance, all three are decorated with Irish Knots, single or in clusters. Hollow Oak and Lorgnette Cable are fairly straightforward patterns, with no tricks about them except their own special brand of novelty. But the knitter who uses Crazy Maypole must watch what she is doing. It is an off-center, free-swinging sort of pattern incorporating knots, twists, and an “inside-out” cable cross in which one knit stitch is crossed in front of two purl stitches—the reverse of the usual system. In spite of its apparent eccentricity, the Maypole is a highly disciplined design: consistent with its own internal symmetry, the second half of the pattern is the exact opposite, in every detail, of the first half.

CENTER: *Crazy Maypole*
RIGHT: *Lorgnette Cable*

NOTE FOR ALL THREE PATTERNS: Make Knot (MK) as follows: (k1, p1, k1, p1, k1, p1, k1) in one stitch, making 7 sts from 1, then with point of left-hand needle pass the 2nd, 3rd, 4th, 5th, 6th, and 7th sts on right-hand needle separately over the last st made, completing Knot.

Cable-Stitch Patterns

The patterns in this section are distinguished from cables (although they are likewise worked with the aid of a cable needle) because they are intended primarily for use all over a fabric, rather than for use in isolated panels. However, there is nothing to prevent you from using these patterns in panels of one or two repeats if you wish. Use the given multiple of stitches, plus the edge stitches if any. For example, if a cable-stitch pattern is worked on a multiple of 10 stitches plus 5, you could work a single-repeat panel on 15 stitches, or a double-repeat panel on 25 stitches, etc.

Cable-stitch patterns make attractive fabrics, which in most cases have a great deal of depth and dimension to them. Take care, however, with your gauge. These patterns are practically *never* interchangeable with stockinette stitch, because the cabling action pulls the stitches together laterally and gives you quite a few *more* stitches to the inch than you would have in plain knitting. To make a garment wide enough to fit you, it is necessary to cast on more than your “standard” number of stitches. Therefore it is important to make test swatches and check the number of stitches—or pattern repeats, if you prefer to figure it that way—in any desired width measurement. Length measurements, however, will remain approximately average; the row gauge changes very little, if at all.

Cable-stitch patterns are frequently worked in medium to heavy yarn, to make firm, thick fabrics for sweaters, jackets, afghans, and coats. But they can be worked in fine yarn, too. There is no reason why a dress or baby sweater, in thin fingering yarn, cannot be worked in a cable-stitch pattern. Remember to use a cable needle *thinner* than the needles being used for the rest of the knitting, so the stitches will not be over-stretched in cabling (this is always a good idea for any kind of cabled pattern).

These patterns can be combined, too. One pattern might be used as a central panel, another for the remainder of the garment. Or perhaps you would like to make a set of “matching” cushions, each one in a different cable-stitch pattern. The possibilities, as usual, are endless.

Wave Lattice

This is a graceful “basketweave” pattern in which the left and right crosses alternate, which gives a wavy effect. On every other right-side row one set of ribs is “skipped” while the other set is being cabled.

Multiple of 6 sts plus 2.

Two Variations on the Aran Honeycomb: Rings and Telescope Lattice

Both of these patterns contain portions of the classic Aran Honeycomb. Rings is a honeycomb with every other cell omitted. Telescope Lattice makes an allover pattern of the upper portions of the cells. Both make beautiful texture effects.

NOTES: FC (Front Cross): Sl 2 sts to dpn and hold in front, k2, then k2 from dpn.

BC (Back Cross): Sl 2 sts to dpn and hold in back, k2, then k2 from dpn.

Rib and Braid Pattern

Arcade Pattern

Contributed by Bernice Haedike, Oak Park, Illinois

This can be worked in a single panel of 15 stitches, in which case it looks more like a type of double cable with bobbles than an "arcade" of pillars and arches. It is unusual and pretty, and makes a fascinating allover design rich with texture interest.

Multiple of 13 sts plus 2.

NOTES: Front Cross (FC): sl 2 sts to dpn and hold in front, p1, then k2 from dpn.

Sunburst Check Pattern

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

This beautiful pattern comes from Austria, and lends itself to a multitude of uses. It is informal enough for ski sweaters, yet disciplined enough for fascinatingly embossed coatings. It will also make delightful afghans and baby blankets.

Multiple of 12 sts plus 2.

NOTES: Front Cross (FC)—sl 1 st to dpn and hold in front, p3, then k1 from dpn.

Back Cross (BC)—sl 3 sts to dpn and hold in back, k1, then p3 from dpn.

Sunburst Check Pattern

Two Cable-and-Texture Patterns: Sidecurl Pattern and Marrowbone Pattern

1. SIDECURL PATTERN

Simple cables are repeated across this fabric; the novel touch is given by small purled blocks which appear to continue the curve of the cable off to one side. This is an easy-to-work pattern that makes a firm, thick fabric.

Multiple of 6 sts plus 2.

Rows 1 and 3 (Wrong side)—Purl.

Rows 2 and 4—Knit.

Row 5—K2, * p4, k2; rep from *.

Row 6—P2, * sl next 2 sts to dpn and hold in front, k2, then k2 from dpn; p2; rep from *.

Repeat Rows 1-6.

ABOVE: *Sidecurl Pattern*

BELOW: *Marrowbone Pattern*

II. MARROWBONE PATTERN

A beautiful variation on the cabled honeycomb is made here by stitches cabled in one direction only, while the other diagonals are formed of garter stitch. This pattern makes fine, sturdy afghans and sweaters in a non-curling fabric.

Multiple of 12 sts plus 4.

NOTE: Front Cross (FC): sl 3 sts to dpn and hold in front, k3 then k3 from dpn.

Rows 1 and 3 (Right side)—Knit.

Mutton-Chop Cables

Mutton-Chop Cables

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

These cables are Tyrolean, seen in ski sweaters. They are handsome in a single panel of 22 stitches, or as an all-over pattern as given.

Multiple of 20 sts plus 2.

Rows 1 and 3 (Wrong side)—K2, * p8, k2; rep from *.

Row 2—K10, * p2, k18; rep from *, end last repeat k10.

Fancy Cable Check

In this pattern, small simple cables are placed to good advantage in a textured knit-purl fabric. Many slightly different arrangements are possible, but this one is typical. It makes excellent sport sweaters, blankets, throws, etc.

Multiple of 18 sts plus 1.

NOTE: Back Cross (BC): sl 3 sts to dpn and hold in back, k3, then k3 from dpn.

Double-Knotted Lattice

This beautiful design will make the best “bold and bulky” sweater you ever saw! One of the finest of the heavy-lattice patterns, it has an aura of foursquare solidity. A single panel, 30 stitches wide, also makes an excellent cable.

Tudor Grillwork

A clever trick enables this lovely pattern to maintain the same fabric width throughout both the straight rib rows and the cabled rows. Ordinarily the latter would “draw in” more; but the increases made invisibly in Row 8 allow greater leeway for crossing the stitches. Another clever trick, that of twisting the straight ribs on every right-side row, gives a uniform depth and roundness to all the pattern lines, both vertical and diagonal.

Tudor Grillwork also makes a beautiful cable when used in a panel of 22 or 32 stitches.

Yarn-Over Patterns

Classification of patterns in the yarn-over category is difficult. Some of them look like lace, some look like eyelets; and some are solid fabrics. Generally, the reason for grouping them here in a separate chapter is some novelty in texture that gives a different quality to the pattern's all-over effect. Every pattern in this group makes use of yarn-over stitches, but the manner of using them varies widely.

The yarn-over is by far the simplest, and by far the most adaptable, of all knitting operations. One little strand placed over the needle between stitches—that's all there is to it. Yet there are literally hundreds of things that can be done with this little strand. The patterns in this group do many different things with it, and thus constitute a suitable introduction to more stylized patterns such as the laces, in which the working of yarn-overs is as disciplined and orderly as the movements of classical ballet.

You *could* make almost any kind of knitted article, from the heaviest to the most delicate, from the patterns in this chapter alone. There are dainty lace-like patterns for fine work such as blouses, baby clothes, table mats and curtains, and there are patterns for more solid articles such as sweaters, coats, and afghans. Different weights of yarn, too, will give different effects. Sometimes the same pattern will look lacy in fine yarn, solid in heavy yarn. Try them out in various ways, and combine them for original and interesting knitting. It is fun to learn a variety of yarn-over patterns, and just learning them will do much to improve your knitting skills in general.

Fascine Braid

As a variation, this pattern can be made with a background of garter stitch (by purling every wrong-side row throughout) or with only 2 or 3 ground stitches between braids instead of 4. A

Exchange Cables

Planning to make a sweater with little cables all over? Use this charming pattern instead of all those endless rows of plain cables—you'll be glad you did. Each cable exchanges ribs with its neighbor at intervals, thus creating a far more interesting design.

And here's another sort of exchange, to work a variation that you can discover for yourself. Throughout the pattern, exchange the positions of "FC" and "BC"—working "FC" in place of every "BC", and vice versa—leaving all other directions the same. The result will surprise you!

Tilting Ladder Pattern

Tilting Ladder Pattern

In this utterly delightful fabric, a very clever use is made of the natural bias tendency of a lace trellis. The “ladders” seem to career at dangerous angles all through the pattern, but they are in fact quite well disciplined as far as knitting technique is concerned. Tilting Ladder Pattern is gay and fascinating in any kind of yarn, for any kind of garment.

Star Cluster

This is a pretty mesh-like pattern of the Star Stitch type, with "cluster" strands to add texture interest. It is a rather tight fabric, and must be worked with large needles, in proportion to the weight of the yarn, so that the open mesh-like effect is not lost.

Ladder Lace Rib

Contributed by Bernice Hampson, San Clemente, California

This delicate rib pattern is very highly embossed. The "ladder" is half hidden; it can be seen only when the fabric is looked at from an angle at the side. Under this condition, the lace becomes so evident that the ribbing almost resembles a mesh.

Cabled Feather Pattern

Contributed by Leona Hughes, Sarasota, Florida

Nearly all the best innovations in knitting are brought about by a simple association of ideas—like this one. Who, other than Mrs. Hughes, ever thought of putting a cable into Feather and Fan Stitch before? The idea is a thoroughly happy one, and the result is beautiful. The cables deepen the scallops, and emphasize the lace.

Cabled Feather Pattern

Wave cables could be used as well as simple cables, by crossing the stitches in front on every alternate cable row. For the larger version of Feather and Fan Stitch that is worked on multiples of 24 (8 decreases, 8 yo's), simply cross 4 stitches over 4. For a test swatch of this pattern, cast on a *minimum* of 36 stitches.

An interesting “twist” of the cable needle is employed in this pattern to make an eight-stitch cross—or rather, to cross the two outside stitches in front of the intervening six. The rows are repetitive, and so are not given in consecutive order; but it is easy to see that there are four central yo's and three lateral ones, alternately, in each lozenge.

Seafoam Pattern

Seafoam Pattern

This simple stitch, when worked in fine yarn, makes the most delicate and lacy fabric imaginable. It is ideal for cobwebby stoles, scarves, bedjackets, peignoirs, fancy baby clothes, and overskirts for evening wear. It can also be worked in fine cotton for lovely tablecloths, luncheon cloths and place mats. Actually it is nothing but garter stitch—plain knitting—but it is certainly a garter stitch with an aristocratic air.

Open Bobble

Contributed by Georgia Berry, Chicago, Illinois

This is a very highly embossed purl fabric, easy to work and suitable for novelty items such as hats and handbags. The cast-on edge will scallop, and the bound-off edge will show some of the yo's, most of which are concealed in the rest of the fabric by the projecting clusters.

Barrel Stitch

Contributed by Dorothy M. Singer, Concord, Vermont

This pattern comes from France, and makes a fabric that is pretty on both sides. It can be either a close fabric or one that is quite "open", depending on the weight of the yarn used and the degree to which it is stretched.

The Enchanted Cottage

Lace and cable stitches combine with simple knit-purl textures to make this pretty "picture". The ground on which the cottage stands is a simple block stitch, its walls and chimney are "shingled" with Dot Stitch (cf. *Treasury of Knitting Patterns*, p. 12), and its door, window, and loft are made of lace. Make an enchanting sweater for a child with the Enchanted Cottage at its center, or work this pattern into an afghan square.

Roman Stripe

Here is a charming lacy pattern that is very easy to work. The fabric is reversible, of course, since there are 7 rows (an odd number). But it can be given a right and a wrong side by omitting Row 7 and doing the pattern with only 6 rows.

This pattern makes very lovely scarves, shawls, stoles, baby blankets (summer weight), light throws for sofas and chairs, etc. A few repeats of the 7 pattern rows will form a very pleasing border for skirts, sleeves, or lacy blouses.

Vertical Drop-Stitch

Contributed by Hildegard M. Eloner, Aldan, Pennsylvania

This pattern is pretty on both sides of the fabric, and also can be used horizontally, as in a sweater worked from one side to the other. To finish, work Row 6 or Row 12 omitting the yo's, then bind off—the original number of stitches will be thus restored.

Multiple of 8 sts plus 4.

Fluffy Brioche

All Brioche patterns are fluffy and loose, but this one is particularly so. It makes a beautiful, soft, honeycomb-like texture that is perfect for summer sweaters, baby blankets, shawls, etc. It should be worked with a light hand, on needles that are not too small. When casting on, use two needles held together, so that the cast-on stitches will be large enough to spread to the width of the fabric. Bind off *on* loosely, preferably with larger needles, on one of the right-side rows.

Fluffy Brioche

Diagonal Brioche

One never ceases to be amazed by the variety displayed by different small alterations in the Brioche technique. The wrong side of this fluffy fabric is perhaps even more charming than the right side—it shows a graceful Brioche Knot Stitch. Still another variation can be obtained by the tiniest of substitutions: slip all the yo's purlwise instead of knitwise in Rows 1 and 3. Try the pattern both ways, and see which you like better.

NOTE: all slip-stitches are slipped with yarn in back. The Preparation Row is not to be repeated.

Berry Stitch

Both Berry Stitch and its variation, Clove Stitch, are often confused with Trinity Stitch. All three are worked in a similar way, but their appearance is very different. Berry Stitch really does resemble rows of little blackberries or strawberries, complete with stems. The fabric has an extraordinarily beautiful wrong side, and so is appropriate for scarves and such articles where both sides will be seen.

Berry-in-a-Box

Contributed by Leona Hughes, Sarasota, Florida

This perfectly charming openwork fabric consists of purled “berries” enclosed by little square frames of lace and set off by small ribs. Berry-in-a-Box is delightful in stoles and evening sweaters. Try it with a fancy yarn—slubbed, crinkled, ombre, or a sparkling metallic.

Gooseberry Stitch

This is a splendid “knobbly” pattern for hats, jacket panels, pockets, collars and cuffs, handbags, afghans, and extra chunky sweaters. The gooseberries are bigger and bolder than any other “berry” motifs, and have more firmness and body than bobbles. The wrong side of the fabric is perfectly flat—this pattern requires no blocking.

Crochet-Knit Mesh Pattern

Contributed by Berniece Hampson, San Clemente, California

This pattern stretches enormously, and must be cast on and bound off with needles much larger than those used for the knitting, or else with two needles held together. The knitting action is similar to a “psso”, in that the stitch, and the 3 subsequent yo’s, are drawn over the yo loop and off the needle. This forms a small crochet-like “chain” in every other stitch. The last stitch of the row is treated the same way, using the now empty left hand needle to work the chain of yo’s.

The fabric may be worked in fine or heavy yarn; in both cases it will be loose, soft, fluffy, and very elastic, which makes it appropriate for stoles, scarves, shrugs, bedjackets and the like.

Even number of sts.

* K2, (yo, pull the last st over the yo) 4 times; rep from *.

Crochet-Knit Mesh Pattern

Pine Burr Pattern

This fascinating fabric is like an expanded Trinity Stitch. The wrong side is not unattractive, so the pattern is suitable for scarves and other articles that show both sides. NOTE: A needle 3 or 4 sizes larger than the other needles should be used to work Rows 3 and 7, so that the stitches are enlarged enough to make the pattern rows (4 and 8) easier to work.

Portcullis Stitch

In a single color, this pattern makes a handsome, symmetrical ribbed fabric resembling crochet. In two colors, it makes a stunningly textured stripe. The two-color version is just as simple as the original version. Rows 1 and 2 in the first color, then Rows 1 and 2 again in the second color, and so on alternating colors. Note that for the best effect, the colors should be changed before the *purl* row (Row 1), so that the strands will be carried up the left-hand edge instead of the right-hand edge, as is more usual.

The fabric is free of curl, sturdy, and easy to block; it keeps its shape well.

Multiple of 4 sts plus 1.

Row 1 (Wrong side)—Purl.

Row 2—K2 tog, * (k1, yo, k1) in the same st, sl 1—k2 tog—pssw, rep from *, end (k1, yo, k1) in the same st, ssk.

Raisin Stitch

Here, the “crochet-knit” technique of making a yo chain is used to make a solid, nubby fabric similar to Peppercorn Stitch, but looser and more elastic. The strands are passed over subsequent strands in the manner of a “psso”. The first st to be passed over is an actual stitch; the other 3 are yo’s.

Lily of the Valley

Contributed by Billie Booth, Pompano Beach, Florida

This pattern, related to Vine Lace Zigzag with popcorn-like knots added, is really upside down; the illusion of the "lily" is more realistic when the pattern is used in a garment made from the top down. But whether it is made to look truly flower-like or not, the pattern is an extremely pretty one with a dainty, ladylike air.

Panel of 27 sts.

NOTE: Make Knot (MK) as follows: (k1, p1, k1, p1, k1) all in the same st, making 5 sts from one; then pass the 4th, 3rd, 2nd, and 1st of the new sts separately over the last st made.

Fancy Rib Patterns

These eight patterns should be studied with great care, because they have much to teach. The knitter who comprehends precisely why and how these patterns do what they do will never be confused about the manipulation of decreases at a distance from their corresponding yo's, or about the arrangement of any curvilinear pattern.

Comb Stitch and Folded-Ribbon Stitch are a pair, one the opposite of the other. In Comb Stitch, the *decreases* are aligned directly over each other, first at one side of the rib and then at the other side, while the yo's travel diagonally across the rib. In Folded-Ribbon Stitch, the yo's remain in alternate vertical alignment while the decreases travel diagonally. Notice, though, that in both cases the stationary units look—in the finished knitting—as if they are *not* in vertical alignment. They are drawn slightly left and right by the bias pull of the other stitches.

In the #2 versions of both of these patterns, the rib is worked on both sides of the fabric instead of the right side only. This condenses the pattern so that there

are fewer rows to each repeat. Pay close attention to the relationship of the four different types of decreases used in these second versions, and you will understand how to work any other decrease series from the wrong side, so that it slants left or right as desired.

Track of the Turtle and Waved-Ribbon Stitch are another pair, again opposite in technique. In the first, *both* decreases and yo's travel diagonally; in the second, *both* are stationary, except that they switch from one side of the rib to the other. The #2 versions, again, have shorter motifs because they are worked from both sides.

Every knitter should try out all eight of these patterns and give them a good long think. They are not only pretty, but as a series they present a short but thorough lesson in pattern construction.

Embossed Twining Vine Leaf

Embossed Twining Vine Leaf

This is perhaps the most graceful of all the embossed-leaf patterns. It gives a lovely effect either in a single panel or all over the fabric. When a rib of one or two knit stitches is inserted between panels of Embossed Twining Vine Leaf, as shown, the knit rib receives a slight but definite wave that adds to the beauty of the pattern in general. Sweaters are delightful when done with this pattern, and matching skirts can be made by placing plain knit panels between pattern panels, and working all decreases within the knit panels so that they narrow toward the waist.

Pilsener Pleating

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

The city of Pzen, in Bohemia (honored in this country by the lovers of good beer), is the source of this openwork variation on the old Triangular Stitch. Version I makes pleats that fold to the right, and Version II makes pleats that fold to the left. Notice

that larger holes are created by Version I, because the purl stitches follow the yo's and thus cause the yarn to travel a greater distance around the needle, to the front. The two versions could be combined in a zigzag, as shown in the center of the swatch, simply by alternating them: Rows 1–14 of I, followed by Rows 1–14 of II, etc. In this case the pleats disappear, and the result is a form of Block Stitch.

Lucky Leaf Pattern

This pattern is repetitious, and easy to learn in the first repeat of the pattern rows; therefore it cannot be called difficult, in spite of its length. It makes a very prettily embossed purl fabric with sprays of leaves arranged in fleur-de-lis fashion. It is a "hybrid" pattern, containing a little of everything—twist stitches, increased stitches, yarn-over stitches, crossed knit stitches, decreases. Lucky Leaf makes lovely afghans and bedspreads as well as garments. A single motif can be used as an isolated ornament on any purl background. A horizontal row of them makes an attractive border.

Multiple of 18 sts plus 6.

Gate Pattern

Contributed by Leona Hughes, Sarasota, Florida

Like Pilsener Pleating, this pattern combines purl blocks with knit blocks that are traversed by diagonal yo's. But the arrangement is reversed, to form a flat (non-pleating) fabric with a checked effect, and the motifs are square rather than triangular. The pattern is easy to work, and attractive in sweaters, blouses, baby blankets, or dresses.

Mist Drops

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

The wrong side of this fabric is often seen as the right side, and very lovely it is, too. The side edge is wavy, so when working two flat pieces that will be sewn together, it is a good idea to begin one piece with Row 1 and the other with Row 9. In this way, the waves will be made to fit into each other like the parts of a jigsaw puzzle. To begin with Row 9, it is necessary to cast on a multiple of 14 stitches *plus 11*, because the edge stitches increase on Rows 1, 3, and 5, and decrease on Rows 9, 11, and 13, each row adding or subtracting 2.

Fireworks

Fireworks

Here is an unabashedly “fancy” pattern, richly decorated with little bobbles, openwork, and embossed ribs. It is beautiful as a wide central panel in a dress or overblouse, or repeated all over a garment. The pattern requires the knitter’s attention, because one stitch out of place would be glaringly obvious; but it is so interesting as to be well worth some care. In a single panel of 35 stitches it can combine nicely with other patterns.

Multiple of 30 sts plus 5.

NOTE: Make Bobble (MB) as follows: (k1, yo, k1, yo, k1) all in one st, turn, p5, turn, k2 tog-b, k3 tog, then pass 1st st over 2nd, completing bobble.

Cable-Framed Leaf Pattern

Cable-Framed Leaf Pattern

Used in a panel of 30, 58, or 86 stitches, this pattern makes a beautiful decoration for a fabric of reverse stockinette stitch.

Multiple of 28 sts plus 2.

The Cloisters

This is an easy pattern to work, but richly textured and full of dignity. A lace chevron breaks the pillar-like ribs, and the little purled “archways” are attractively shadowed by the decreases. This pattern adapts very well to horizontal bands and borders, and also makes lovely vertical panels.

Multiple of 10 sts plus 3.

Row 20—P3, * k7, p3; rep from *.

Repeat Rows 1-20.

The Cloisters

Twin Leaf Panel

Here is a very graceful, lacy pattern related to Twin Leaf Lace, and rich in texture, line, and openwork. It is easy to work, and makes a beautiful asset to any sort of garment. It is shown with 2 purl stitches added at each side of the panel.

Panel of 22 sts.

- Row 1 (Wrong side) and all other wrong-side rows—P10, k2, p10.
Row 2—K6, ssk, return the resulting stitch to left-hand needle and with point of right-hand needle pass the *next* stitch over it and off needle; then sl the stitch back to right-hand needle (this is “ssk and pass”); yo, k1, yo, p2, yo, k1, yo, sl 1—k2 tog—psso, k6.
Row 4—K4, ssk and pass, k1, (yo, k1) twice, p2, k1, (yo, k1) twice, sl 1—k2 tog—psso, k4.
Row 6—K2, ssk and pass, k2, yo, k1, yo, k2, p2, k2, yo, k1, yo, k2, sl 1—k2 tog—psso, k2.
Row 8—Ssk and pass, k3, yo, k1, yo, k3, p2, k3, yo, k1, yo, k3, sl 1—k2 tog—psso.

Repeat Rows 1-8.

Fancy Shell Rib

This is a beautiful little openwork rib suitable for panel treatment or for use all over the fabric. It can set off other openwork designs very well.

Multiple of 7 sts plus 2. (Or, panel of 9 sts.)

Row 1 (Right side)—P2, * k1, (yo, k1) 4 times, p2; rep from *.

Embossed Double Leaf Panel

Two of the classic "leaf" motifs are combined here, slanting outward from a central "stem". It is a pretty arrangement to be used singly or in combination with other embossed patterns. This is an increase pattern; the original 29 stitches can be counted only on the first and last rows.

Panel of 29 sts.

NOTE: M1 (Make One): lift running thread between the st just worked and the next st, and knit into the back of this thread.

Ornamental Rib Pattern

Grand Shell, or Hoopskirt Pattern

Grand Shell, or Hoopskirt Pattern

Raw beginners should stay away from this one. But a moderately experienced knitter can make exquisite stoles, scarves, evening wraps and baby things with this lovely openwork and its large shell- or fan-shaped motifs. Notice that throughout the pattern all the double yo's (with the exception of those worked in Row 10) are treated as *two stitches* on the return row, one of them being knitted, the other being purled; but the purl may come either before or after the knit.

Multiple of 19 sts plus 2.

NOTE: All yo's in this pattern are *double*, and are written "00".

Row 1 (Wrong side)—Knit.

Row 11—K1, * k1, (00, p2 tog b) twice, 00, sl next 15 sts dropping extra yo's to make 15 long sts; insert left hand needle into the backs of these 15 long sts and purl them all together as 1 st., 00, p2 tog twice, 00, k1, rep from *, end k1. (On this row, be careful not to lose the double yo that is worked immediately before the 15 sts are slipped; hold yarn in *front*, ready to purl, as the sts are slipped.)

Row 12—K1, * k1, p1, k2, p1 twice, k3, (p1, k2) twice, p1, k1, rep from *, end k1.

The Gingerbread Castle

The Gingerbread Castle

To delight a child, work this bit of fairy-tale architecture on the front of his or her sweater! The Castle is made of a combination of easy knitting techniques. There is a lace door, there are windows of taggoting and picot eyelets, ribbed battlements with an openwork banner floating above them, and a twist-stitch tower topped with a bobble. The entire pattern is a good example of "picture knitting"—much less complicated than its lengthy directions seem to indicate, and great fun to work.

Note: (K1, p1) in parentheses indicates that these two stitches are worked into a double yo of a preceding row.

Foundation: 5 rows of garter stitch.

Eyelets

Technically, an eyelet in knitting is an opening that is separated from neighboring openings by more than two strands of yarn. The holes in a lace pattern, on the other hand, are separated from each other by a single strand or by two strands twisted together. But this rule is flexible. Sometimes an eyelet pattern is a “grouping” of lace holes, which are placed at intervals in the solid fabric. Generally, eyelet patterns are less open than laces; but there is a good deal of overlapping between the two types of pattern, so this rule is flexible too.

Most eyelet patterns are very dainty, lending themselves especially well to fine-yarn sweaters, baby clothes, dressy aprons, scarves, and “party” dresses. Like lace, these patterns should be well stretched when blocked, so that the openings are widened as much as possible, and the needles should not be too small in proportion to the weight of the yarn. An eyelet worked in heavy yarn on too-small needles is always a failure, it comes out looking like a sort of dimple instead of an eyelet. Neither should the needles be too large, for then the holes will be lumpy and gaping. Try different needle sizes on different weights of yarn, to see how your eyelets look best.

Allover Cabled Eyelet

Here is the popular Yarn-Over Cable worked as an allover pattern, which turns out to be quite interesting. The eyelets are vertically aligned, whereas the passed slip-stitches lend a diagonal quality to the fabric. This dainty pattern is ideal for baby clothes, summer-weight stoles, and shells.

Cellular Stitch

This is a pretty little eyelet mesh, as simple as a pattern can be. With it, the beginner can make a dainty mesh blouse, a delicate scarf, or a summer sweater. It can be used also in blocks, bands, or insertion panels. For a quick beginner project, try it in a baby's coat and booties set, or work rectangles of it in a fancy metallic yarn, line them with silk or satin of a contrasting color, and sew them together to make an elegant evening purse.

German Honeycomb Stitch

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

Here is a pretty eyelet fabric that is a little different, by reason of its being worked from the right and wrong sides alternately. The pattern makes graceful shawls, overblouses or head scarves. A few repeats (12 to 20 sts) will make an attractive openwork panel.

Flower Eyelet

This is an ancient pattern, and one of the nicest arrangements of eyelets in formation. It is beautiful in skirts, shells, summer dresses, carriage-blankets and sweaters for infants. The “flowers” can be placed anywhere on a fabric, or combined with other types of eyelets.

Purl-Fabric Eyelets: Eiffel Tower Eyelet, Stirrup Eyelet, and Tunnel Eyelet

All three of these patterns give pretty ways of decorating a plain purl fabric. Eiffel Tower is the simplest, and is recommended for beginners. The Stirrup is a wide, bold eyelet, with strands arched above the opening by slip-stitches. The Tunnel is similar, but is made by dipping downward into the opening from four rows above.

Corona

This beautiful old pattern was popular in the United States in the late 19th and early 20th century. Basically it is an enlargement of the *Shetland Crown of Glory* pattern. It is very striking as an insertion, or as a central panel in an article knitted in lace or eyelets. When worked continuously across the fabric, instead of in a single panel, it makes an attractively scalloped edge.

CENTER PANEL: *Corona*

SIDE PANELS: *Crown Embossed Rosebud*

Crown-Embossed Rosebud

An adaptation of the eyelet "crown" type of increase is utilized in this pattern to make an attractive column of highly embossed bud motifs. A single cable cross in Row 2 defines the motifs. Some knitters may find it difficult to knit five times into the *back* of the five yo loops that are wound around the needle in Row 3, though this is easily accomplished by taking the *front* of each loop purlwise onto the right-hand needle, and sliding the needle *under* the loop over the left-hand needle, where it is in position to knit in the back. However, if this should seem troublesome, working "k1, p1, k1, p1, k1" into the 5-yo loop will serve just as well. The result is not quite so tidy, but the difference is so small as to be hardly noticeable.

Fish Hooks

This delightful pattern can be used all over a fabric, as shown, or in panels (9 stitches each), or in isolated bands (Rows 1 through 14) such as border bands. Worked into a garment from the top down, the upside-down “hooks” become “candy canes”—does this give you an idea for a child’s Christmas-party dress? Another idea: if your initial happens to be J, work Rows 15 through 28 for a series of lace “monograms”.

Sequin Eyelet

Sequin Eyelet

Contributed by Bernice Hardike, Oak Park, Illinois

This pretty pattern is worked in two colors—though it may be worked in a single color if desired, and is attractive also in three colors. For the latter, simply use A, B, C, A, B, C, etc., changing colors after each group of 4 rows. The pattern makes a dainty, dressy checked fabric with an eyelet in the center of each check. To show these eyelets, the fabric must be stretched. If left unstretched, it closes up into a soft, fluffy texture.

Faun's Eyes

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

This pattern achieves its effect by “straining” stitches, which causes some of the yo’s to open wide and others to compress. The fabric may be stretched into a very lacy openwork, or it may be left unpressed. In the latter case it will develop a very interesting bumpy texture as the solid clusters of stitches lift forward.

Of course, *any* panels are repeatable—they can be many times as you like across the width of your piece. These three are particularly effective as allover patterns, and each is given in panel form. They are simple, uncluttered patterns that will blend well with other patterns too.

Jack-In-The-Pulpit

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

“Jack” is an elongated slip-stitch, and each “pulpit” is a window-like eyelet hooded over with bundled strands. This is an old German pattern that has been copied frequently in machine knitting. The wrong side has a beautiful puff-texture effect.

Multiple of 4 sts plus 3.

Pyramidal Lace Check

Here is a pretty, easy-to-work pattern with triangular lace motifs in which the decreases run alternately left and right. Any fine- yarn blouse or sweater pattern calling for stockinette stitch can be beautifully varied by this lace, which would turn it into a “creation” instead of just another piece of knitting.

Candle of Glory

Candle of Glory

This is a very “lacy” pattern although, like most other eyelets, it consists of openwork motifs in a solid fabric. The background fabric itself, however, is gracefully waved and curved by the decreases. Notice that there are two stitches removed from each repeat on Rows 2, 4, 6, 14, 16, and 18. The original number of stitches is restored only on Rows 12 and 24.

Bound Eyelet

Bound Eyelet

This interesting pattern makes large triangular eyelets bound off at the base. “Pass 2nd st over” in the second and eighth rows refers to the usual operation in binding off—i.e., inserting the left-hand needle into the 2nd stitch on right-hand needle and passing it over the first stitch. “Bind off 3, k3” also describes the action in these rows, but here it is written more precisely, so there can be no mistaking *which* stitches are to be bound.

Though its directions may sound complex, this pattern works very easily and makes a strikingly unusual fabric. The large eyelets

can be left open for unlined articles such as stoles, scarves, over-skirts, and evening jackets. For dresses, a contrast-colored lining may be used, or, alternatively, a lovely effect can be obtained by threading a fairly broad ribbon diagonally through the eyelets on the finished piece.

CHAPTER TWELVE

Lace

Knit two together, yarn-over. It makes a little hole. Like the mighty oak growing from the acorn, during hundreds of years a tremendous and dazzling structure of knitting art has grown from just that little hole. Though its basic unit is the simplest of all, lace is by far the most varied and variable form of knitting. For centuries, the world's best knitters have been arranging and re-arranging those little holes to make beautiful designs. These designs are the precious heritage of a unique art.

The incredible variety of knitted lace encompasses every degree of skill, there are patterns for the beginner, patterns for the intermediate, and patterns for the expert. Many of the loveliest ones are also the easiest to work. Sometimes, novice knitters are frightened away from lace because it *looks* so intricate. But in a large number of cases the intricacy is an illusion. There are lace patterns so easy that a child could work them.

Lace knitting has been well known in Europe since the 15th century, when silk yarns first became popular. These yarns inspired knitters to create dainty openwork designs suitable to the medium. The well-appointed wardrobe then demanded knitted lace stockings, gloves, and scarves. Invention and innovation in this field continued to gather force, and attained great heights early in the 18th century, when cotton and muslin threads began to be imported from the East. All of Europe participated in the subsequent craze for "white knitting"—that is, fine lace knitting in white cotton yarn. During this period, masterpieces of knitting art were produced by the thousands and hundreds of thousands. Shawls, fichus, doilies, medallions, collars, ball gowns, draperies, edgings for linens, and similar articles were knitted with gossamer-like thread on the thinnest possible needles, which were called "wires." Aristocratic ladies spent much time on this delicate work. Still in existence are lace samplers made in this period by women who copied many different patterns in order to develop their knowledge and skill.

Fine wool lace attained a peak of development in the Shetland Islands, where a special breed of sheep produced delicate wool that was spun into hair-thin yarns. The famous Shetland shawls were the pride of Great Britain, examples of them being worn by the royal family since the time of Queen Victoria. So cobwebby in texture were these shawls that, it was said, they could be drawn through a wedding-ring. The patterns used in making them are now a cherished part of knitting tradition.

Modern knitters usually do not devote themselves to work so dainty, nor is it necessary for them to do so. Today's cotton and fingering yarns are heavier, but they can display the beauty of lace patterns just as well as the threadlike yarns of the "white knitting" era. Wool, synthetics, and metallics can be worked in lace patterns to make high-fashion dresses, blouses, stoles, stockings, gloves, and dozens of other wearables. Cotton lace is delightful not only for clothes, but also for table settings, curtains, bedspreads and other household articles. Crochet cotton is inexpensive, and very good for trying out lace patterns on size 4 or 2 needles. "Practice swatches" made in this way—with some simple border such as garter stitch or seed stitch, can be starched and stretched and used as beautiful, durable place mats. Lace samplers can be made in long strips—in wool fingering yarn, for instance—and used as scarves.

Lace knitting is an essential part of every knitter's education. There are some who say that you are not a real knitter until you can work with lace. But this implies that an expert's knowledge is needed before you can start—which is not the case at all. Anyone can work the simpler lace patterns. As in any other kind of knitting, you don't learn first and then start doing; you learn *by* doing. So even if you have never worked lace before, you can start right now—today. Get some fingering yarn and a pair of needles (size 3 is about standard for the average knitter) and try out some of these patterns. You will find them exciting to learn, and highly satisfying to use. Just one hint: never cast on too many stitches for the width measurement you want. *Lace requires stretching.* All its beauty is lost if it is allowed to contract and close up the holes. Start with only three-quarters of the number of stitches you think you might need for a given measurement, and *stretch* your swatch to that measurement when you block it. You'll be surprised to see how far it will go—and how handsomely the pattern shows when the fabric is treated in this way. Then you can take a revised **stitch gauge from the blocked piece of lace.**

Once you have an accurate stitch gauge for any particular lace pattern in a particular yarn on a particular size of needle, you can go ahead and multiply that gauge by the number of inches desired in any part of a garment, and make yourself a *lact* original. Some knitters prefer to use a "repeat gauge" instead of a stitch gauge. This means—so many repeats of the pattern to so many inches. For instance, if you make a swatch 6 inches wide by working 3 pattern repeats, then you know that a piece 18 inches wide will require 9 pattern repeats. Shaping takes place at the edges, just as in solid fabric knitting. Shaping lace in such a way as to keep the pattern correct is not difficult, if you remember one simple rule: every time a yarn-over (that is, a hole) is eliminated from the pattern, its corresponding decrease must also be eliminated. Conversely, when adding more stitches to make the piece wider, you do not work a new yarn-over until you have room to work its corresponding decrease also.

Among the laces there are patterns old and new, simple and complex, so many of them that any knitter can find patterns to please, challenge, or inspire her. This is the most creative category in a highly creative craft. Use it to the best of your present ability, and your future ability will flourish a hundredfold.

Crystal Pattern

Crystal Pattern

This simple but wonderfully effective lace is most instructive. It is likely to be a surprise to the novice lace knitter. Having learned from trying various kinds of Lace Trellis that a series of similar decreases creates a bias fabric, she now encounters a pattern in which the decreases *are* all the same, and yet there are all the stitches going ruler-straight—up! Why?

The answer is that the bias effect is overcome by moving the pattern on the diagonal, one stitch at a time. A Lace Trellis cannot be inserted successfully into a solid fabric in the shape of a square, but it can be so inserted when the square is tipped to make a diamond. The decreases only *seem* to fall in vertical alignment; actually they are staggered. The pattern is lovely, easy to work, and suitable for panel treatment or for use as an allover fabric.

Crystal and Pearl

Crystal and Pearl

This is an exceedingly simple pattern, which may be varied by slanting the trellis in the opposite direction, as in Crystal Pattern, by working “k2 tog, yo” in place of every “yo, ssk”. Thus the design can be balanced when worked in bisymmetrical panels. The dainty “pearl” (purl) ridges add texture interest, and make the pattern a lovely choice for fine-yarn delicacies like baby clothes, bedjackets, etc.

ABOVE: *Rick Rib*
BELOW: *Rickrack Faggoting Stitch*

Rick Rib

Contributed by Gretchen Cranz, Gettysburg, Pennsylvania

Here is a beautiful and unusual kind of faggoting that is very easy to work. In fine yarn, it makes an attractive mesh or a lace insertion; in heavier yarn, it makes a handsome ribbing that is soft and elastic. This pattern differs from most other types of faggoting in having a right and a wrong side, both of them quite pretty.

Even number of sts.

Repeat Rows 1 and 2.

Rickrack Faggoting Stitch

Like Rick Rib, this faggoting pattern makes small zigzag or “plaited” columns of knit stitches. An extra stitch is added between the columns, which changes the herringbone strands that are typical of faggoting into fairly straight ones, extending to each side alternately in a ladder-like design. This pattern is pretty as an allover lace stitch, or in panels, yoke bands, stocking insertions, etc.

Stripe with Twisted Bars

Contributed by Leona Hughes, Sarasota, Florida

Here is a simple two-row pattern with a neat, ladder-like effect. The broader ribs are given texture interest by being knitted on the wrong side. This pattern is suitable for insertions or bands, sleeves, scarves, and blouses. Several repeats may be used in combination with other lace panels.

Notice the subtle widening and narrowing of the lace ribs here, as the decreases are switched from one edge to the other. The “grained” effect of the curved stitches is very pretty, and lends an interesting touch to a simple pattern that might seem too pedestrian without it.

Mermaid's Mesh

Mermaid's Mesh

This dazzling mesh pattern has all the best qualities of knitted lace: it is delicate, graceful, and very open; it appears intricate when finished, but is not difficult to make. Worked in a glittering metallic yarn, and lined with satin or silk, it would make a high-fashion formal dress or blouse that could rival anything from a top designer. Worked in cotton, it makes beautiful curtains, or square or rectangular doilies.

Knot-Stitch Mesh

Knot-Stitch Mesh

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

This intriguing mesh pattern does very well as a horizontal insertion when combined with several rows of Garter Stitch. At least six rows of Knot-Stitch Mesh should be used for each open-work band.

When used as an allover lace fabric, the mesh should be cast on and bound off very loosely, because it will spread. For binding off (after Row 2), the following method is recommended: K1, * yo, bind off the yo st, k1, bind off the knit st; repeat from * across.

Grand Trefoil

This simple little three-row mesh has a surprisingly sophisticated structure. For a real challenge, try to figure out from the picture alone how it is made, without reading the directions. If you can do it, you qualify as a Master Knitter!

Grand Trefoil is easy to work when you know how, and makes a reversible, noncurling, graceful fabric for scarves, shawls, insertions, etc. This fabric spreads, and so must be cast on and bound off very loosely. When binding off, leave both loops of the double yo on the needle and bind off each loop separately; this will help to loosen the final selvage.

Tilting Block Pattern

Here is an easy-to-work lace check with an absolutely fascinating appearance. The garter-stitch blocks which seem to be tipped at precarious angles are not *worked* that way at all; they are simply worked straight across. Small areas of bias lace trellis pull them this way and that, to create a most unusual pattern.

If a smooth-surfaced fabric is desired, instead of the garter-stitch ridges as contrast to the trellis, then all wrong-side rows may be simply purled across. The shapes of the pattern will not change, but the “blocks” will appear in stockinette stitch.

Spider Stitch

This very old pattern is of the utmost simplicity—a real “beginner’s lace”—but quite charming. In structure it is just one of the miniature leaf patterns with alternate motifs elongated by repeating the same row three times. It would be lovely with beads knitted in: three of them, say, in the central stitch of each of the elongated motifs (on Rows 2, 4, and 6) and one in each of the small diamonds (on Row 10). It is attractive as an insertion, either vertical or horizontal.

Pierced Diamond Pattern

In this version of the Diamond, the leftward-slanting decreases are cleverly arranged to give a diagonal line, as in some of the Madeira laces. This method gives a beautiful small-patterned lace that is novel, yet just as easy to work as the more common types.

Coral Pattern

Contributed by Leona Hughes, Sarasota, Florida

In this charming old version of the classic Diamonds, a single knit stitch is inserted between each yo and its corresponding decrease. This gives the unusual effect of "framing" the diamonds within wavy borders. The pattern is simple to work, and very attractive for any kind of lace garment.

Morning Glory

Who would believe from their appearance that this pattern and Cameo Lattice are really the same? But they are. The only difference is that Morning Glory is squeezed down to half the number of rows, so that every alternate pattern row is transposed to the wrong side—and the eyelets, of course, are omitted. This is a notable example of the flexibility of knitting patterns; a relatively minor change in technique produces radically different shapes on the fabric. Little discoveries like this are what make knitting so eternally fascinating, and reward the experimental knitter with innumerable pleasant surprises.

Fountain Lace

Only four pattern rows, yet what a beautiful lace design this is! It is stunning as an allover pattern, but also lends itself very nicely to panel treatment—one panel 17 stitches wide, or two panels together as shown, on 33 stitches. Knowledgeable knitters will see an element of the Shetland Horseshoe Pattern in the arches formed by adjoining panels, but the main motif is quite unique.

Honeybee Pattern with Faggoting

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

Patterns like this one are used by peasant women of Bohemia, Moravia, Silesia and Slovakia to make the fancy stockings that are part of the traditional regional costume worn on festive occasions. Such stockings usually are knitted in red or white cotton and often are richly embroidered in contrasting colors.

Dainty Chevron

This is an abbreviated Arrow Pattern without right-side purl stitches, and with only 2 “stationary rows” instead of 5. An even smaller version is done on a multiple of 6 sts plus 1, without the 6th row and with 2 less stitches on each of the other rows. It is a classic pattern with numerous variations—the most interesting of which is given as Daintier Chevron, below.

 BELOW Daintier Chevron

VARIATION: DAINTIER CHEVRON

This beautiful mesh-like pattern shows how Dainty Chevron looks when it is done on circular needles, omitting all the wrong side “plain” rows and working only the 5 pattern rows. It is an exceedingly delicate single-strand lace that is easy in round knitting. But to convert it to flat knitting necessitates doubling the pattern rows to make an even number of them, and working several wrong-side decreases, including the perhaps unfamiliar “sl 2—p1—p2sso” (see Glossary). This version of the pattern is instructive, however, and should be tried in flat knitting so that the knitter may better comprehend its construction, and that of similar patterns.

This interesting fabric is a Feather and Fan Stitch varied by a half-drop. The pattern has a rather complicated appearance because the stitch lines wave and curl into each other in a very graceful manner; but it is quite repetitive, and simple to work.

Candlelight Pattern

The Candlelight Pattern has become confused, over the course of many decades, with the much simpler Fern Lace, which somewhat resembles it. Here is the original Candlelight, a unique pattern that deserves to retain its ancient form. One of its unusual qualities is the beauty of its reverse side, where the embossed “candle-flame” motifs appear in knit stitches against a background of purled openwork. If this side (given here in the even-numbered rows) is utilized as the right side, then the pattern can be said to be worked from its “wrong” side—a novel proceeding, indeed. In fact either side is lovely, and any knitter who enjoys working lace will find this pattern highly rewarding. In spite of its many rows, it cannot be called complicated, because its formation is easy to see and to learn.

Candlelight #2

A pattern as beautiful and popular as the old Candlelight is bound to have several variations. This one is perhaps even more lovely than the original. The unique touch here is that all the decreases are worked in opposition to the slant of the stitches—that is, in the reverse of the usual way—which gives softness to all the outlines, as real candlelight does too!

Porcupine Stitch

Porcupine Stitch

This unusual pattern is mid-Victorian or earlier, and was used for shawls, scarves, and those unique articles of headgear that our grandmothers called "clouds." Having an odd number of rows, the pattern is therefore reversible. The arrangement of openwork seems rather haphazard during the first few repeats, but a definite design appears after the 9 rows have been worked several times over.

Strawberry Pattern

Unless it is well stretched, this fabric will close up into a scale-like texture, with the openwork largely hidden. In this form it is useful for garments where a not-too-lacy look is wanted. The knitter should experiment with it, because it will give different kinds of effects with different yarns and needle sizes.

Bell Lace

Contributed by Bernice Hardike, Oak Park, Illinois

Turn-of-the-century elegance distinguishes this handsome lace, which is ornate yet easy to work. The pattern alternates with a precise half-drop, each portion consisting of 14 rows. The number of stitches does not remain the same on every row, but an accurate count may be taken on Rows 12, 14, 26, or 28.

Lace Puff

Contributed by Lena Menegus, Belvidere, New Jersey

Though very similar to the Strawberry Pattern in structure, this pattern benefits by being left *unstretched*. Then the purled puffs at the base of each motif will lift forward to make a deep, soft, “pebbly” texture that is attractive in fancy blouses, sweaters and stoles.

Milanese Lace

While this lovely lace is not exclusively Italian, this particular version does come from Milan. It is both graceful and interesting. From the strongly diagonal “lie” of the stitches, one would think that the pattern might form a bias fabric; yet it does not. It is appropriate for circular knitting, where the diagonals will form unbroken spirals.

Spade Pattern

This lovely 19th-century lace is worked with a slightly unusual twist: 4 increases are made on each right-side row in each repeat, but only 2 decreases. The two extra stitches are removed by each subsequent wrong-side row.

Japanese Feather

Another pretty pattern from the Far East showing a side-to-side wave that pulls stitches right and left. The side edges are gracefully scalloped, which will create wavy front bands if the pattern is used for a jacket or cardigan. This effect is attractive; buttonholes can be worked into each scallop if desired. If front and back pieces of the garment are worked separately, the scallops will fit into each other to make a wavy side seam. The pattern is ideal for circular knitting; in this case there are no side edges showing.

Trellis and Pear

Trellis and Pear

Very often this pattern is given with the decreases worked in opposition to the pattern lines, so that the trellis is “wrapped” and fuzzy-looking rather than sharp. Often, too, it is worked in a single panel, but the half drop arrangement here is preferable because the six-stitch increase will spread out and destroy the beauty of the trellis unless the slack is taken up by an adjoining panel. This version is the most graceful and striking, therefore, of several possible ones. It makes a lovely mesh for fancy sweaters, blouses, lace mats, luncheon cloths and stockings.

Lotus Pattern

This lovely lace comes from Japan, and lends itself to several different treatments. Rows 1 through 5 can be worked in a contrasting color, to emphasize the graceful garter-stitch scallops. A single repeat of the pattern rows will yield a nicely scalloped border; two or three repeats will make a wider band of lace at the lower edge of a blouse or sleeve. Caution! Before trying this pattern, *read* the explanation of the double decrease “sl 2—p1—p2ssso” in the Glossary.

Starlight Lace

Starlight Lace

This deceptively simple-looking lace is very cleverly made. Two different kinds of double decrease on Rows 6 and 14 sharply reduce the number of stitches, thus widening the motifs at these points to enhance the starlike shapes in the openwork. The original number of stitches is restored on Rows 8 and 16. Notice, also, the crossed knit stitches, which help to sharpen the pattern. It is a very fine lace indeed, extremely delicate and graceful.

Peri's Parasol

Peri's Parasol

This lovely pattern is of ancient lineage, and has many relatives (see Grand Shell and Bear Track). These directions are a modern adaptation of one of the oldest versions. The lower edge forms scallops, so the pattern makes its own border for a garment such as a lace blouse, skirt or apron. The stitch count varies from row to row; Row 13 restores the original number.

Oriel Pattern

Here is another of the very old and exquisitely beautiful lace patterns that have been unjustly forgotten within the past six or seven decades. Queen's Lace

This is an exquisite lace with crisp, interesting geometry. Each motif is four-fifths of a pentagon, with radiant lines flaring outward into the next motif; sub-patterns within the pattern are created by openwork ribs and deep triangles of knit stitches. The working of the pattern is straightforward and conventional, with the number of stitches remaining always the same on every row.

Lace Panels and Insertions

This section contains some of the most useful patterns known to lace knitting. Panels and insertions are wonderfully adaptable, because they can be placed and combined at will, just like cables. Even a novice knitter can enrich a plain garment without any complicated re-figuring of stitches, by putting a lace panel or two into the center where the pattern will not be affected by shaping.

For example, let's say you want to run an insertion of lace up the front of a sweater. Your garment pattern calls for 100 stitches and you have chosen a panel 20 stitches wide. This leaves 40 stitches on each side to be worked plain. So to start the panel, work 40 stitches, place a marker on the needle, work the panel pattern on the next 20 stitches, place another marker on the needle, and proceed across to the other side. Then as the work progresses, the panel rows are continued between the markers—so there is no need to worry about where to begin and end them.

Should you choose a panel that has an odd number of stitches, while the garment pattern calls for an even number, simply cast on one extra stitch or omit one, so that the panel can be exactly centered. Usually, any lace pattern will “open up” the knitting a little, because it can be so readily stretched. Therefore it is better to use fewer stitches rather than more.

The most exciting kind of lace knitting is the kind that uses many different patterns in the same piece, just as a fisherman sweater combines many different cables. Lace panels or insertions can be placed side by side in gorgeous variety, to make exquisite blouses, sweaters, place mats, table runners, curtains, stoles, or dresses. Choose several that you like, put a particularly effective one in the center, then a second one on the right side and on the left side of it, then a third one on each side of that, and

so on, adding up the total number of stitches as you go until you have the number required for the whole width, or a few less. Leftover stitches can always be worked plain at the side edges. As you knit, it is a good idea to keep a written row count of each separate pattern, so you will not “lose your place” in any one of them.

Of course, there is nothing to prevent the knitter from converting a panel into an allover pattern, simply by repeating it all the way across. By the same token, an allover lace pattern can be converted into a panel. This is done by using just one or two pattern repeats on a limited number of stitches, the remainder of the stitches being worked plain or in a different pattern.

Lace panels and insertions can be combined with cables, knit-purl patterns, texture patterns, or anything else that strikes your fancy. Actually there is no difference between a “panel” and an “insertion” except that the latter term is applied to lace that is set into an otherwise solid fabric. These patterns can be used as spot patterns, too, just by working the pattern rows once in one section of the garment and then once again in another section.

Be creative—mix and match, play one pattern against another, work only part of a pattern if this gives the effect you want. In knitting, anything is possible. The variety of fabrics that you can achieve is limited only by your imagination and skill—and both of these can be greatly extended by constantly trying out new patterns.

Double Herringbone Mesh

In this handsome pattern, the trick is in the center. The converging lines of lace trellis are “invisibly” worked into each other so that a small zigzag is formed where ordinarily there would be a rib of decrease stitches.

 LEFT SIDE PANEL—*Miniature Openwork Cable, right twist*
 RIGHT SIDE PANEL—*Miniature Openwork Cable, left twist*

Miniature Openwork Cable

These “cables” look like standard Diamonds at first, but a closer inspection shows that they are off-center, which gives them a twisted appearance. This jog in the pattern can be created either to the left or to the right.

Wings of the Swan

Here is an intricate and beautiful lace panel of the double cable-twist type, set off by open trellis work in the center, which creates a sort of mesh. It would be lovely as a center for any lace article, in combination with panels of other laces.

Two Victorian “Leaf” Patterns: Double Rose Leaf and Tracery Pattern

Contributed by Leona Hughes, Sarasota, Florida

Both of these patterns are relatives of the classic Beech Leaf, with the Double Rose Leaf bearing the nearest resemblance. Neither pattern maintains the same number of stitches throughout. In Double Rose Leaf, the stitches are immediately reduced to 15 in Row 2, and not restored to 17 until Row 8. In Tracery Pattern, 2 stitches are increased in Row 4, and removed in Row 6.

Rows 8 and 10—K1, (yo, ssk, k1, k2 tog, yo, k1) twice.

Repeat Rows 1–10.

Palm Leaf with Mesh

Here the classic Palm Leaf is placed on an openwork background, making a charming design for a wide insertion or for combination with other panels. The difference between the original pattern and its variation is slight (just a “yo, k1, yo” opposed to a “k1, yo, k1”) but it determines whether the Leaf is open or closed at the center of its base.

Jewel Medallion

Like Grand Medallion, this pattern is very handsome as a central and dominating motif in any lace article. The delicate single-strand openwork that surrounds the medallion is well set off by a lining of contrasting color. Evening bags in metallic yarn, small cushions, and place mats are enhanced by a central Jewel Medallion.

Dayflower

The old-time knitters were not *always* right. Here is a revised version of a lovely 19th-century pattern which was so badly botched in its original form that its graceful lines were scarcely discernible. Probably one reason for its having lain so long in obscurity was the disappointing result given by the original directions. These new directions, however, are guaranteed to please. Two panels are shown side by side, sharing the same two edge stitches between them (a total of 36 sts). Notice that these edge stitches are drawn into gentle waves by the bias pull of the pattern. Any number of Dayflower panels can be set together like this, to make an extremely pretty allover lace.

Panel of 19 sts (or, multiple of 17 sts plus 2).

Little Vine

This dainty insertion is a variation on the “Vandyke” theme, since it forms a small zigzag, but the decreases are removed one stitch away from the yarn-overs, which adds texture interest to the fabric.

Wineglass Lace

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

This pattern calls for a panel of 5 stitches, but in fact it is considerably wider than that, because the 5-stitch minimum is retained for only one row. Also it requires stretching in order to show the pattern, so the actual width is nearly twice that of a 5-stitch gauge.

Panel of 5 sts.

Blossoming Branch

This beautiful lace panel is fancy enough to stand by itself in an otherwise plain fabric, or it may be combined with different lace panels.

Note: "Ssk and pass next st" in Rows 8 and 12 is the opposite of "sl 1—k2 tog—psso", and is worked as follows: ssk, then return the resulting st to left-hand needle and with the point of right-hand needle pass the *next* st over the ssk st and off needle; then slip the st back to right-hand needle and proceed. (See Glossary on Double Decreases.)

I. BROAD-LEAVED FLOWER

Three "Floral" Motifs

LEFT: Broad-Leaved Flower

CENTER: Floral Panel II

RIGHT: Four-Leaved Flower

This pattern, a variation on a Japanese design, displays wide knit-stitch "leaves" on a purled background. The "flower" is a simple lace medallion. Charming borders can be made out of this pattern on a multiple of 18 stitches plus 1, the "p2 tog" rows being converted into "p3 tog" between the motifs.

II. FLORAL PANEL II

Contributed by Dorothy Reade, Eugene, Oregon

Mrs. Reade's original design includes two narrow panels of Miniature Leaf Pattern (*A Treasury of Knitting Patterns*, p. 215) on either side of the large flower motif. These have been omitted here, for better comparison of this pattern with the other two, but the knitter may restore them, or use some other narrow panel to enhance the "flower".

The Windmill

Here is a quaint and charming pattern for children's wear, casual clothes, and items of home decoration. 64 rows complete the pattern, but it may be continued from Row 1 in vertical arrangement if desired. A band of Windmill panels side by side would make a delightful border for a little girl's skirt or petticoat.

Careful attention must be paid to the double decreases in the Windmill. Three different kinds are used: k3 tog, sl 1—k2 tog—psso, and sl 2—k1—p2sso. Remember that in the third type of decrease the two stitches are always slipped *knitwise*, and *both together*, not one at a time.

Borders

Borders are horizontal patterns generally placed at or near an edge to add decoration and interest. Borders differ from Edgings in their direction of knitting. An edging is worked in a strip, and sewn onto the finished article by one of its sides; but a border is worked in the same direction as the article itself, and usually is integral with it. Thus a border is worked on the same number of stitches as the article it embellishes, or on a “close” number. In many border patterns, the number of stitches is easily varied to match the number required for the article, so the stitch counts given for these must be considered samples only. Once you understand how to make a pattern of this type, you can make it larger or smaller as desired. In other border patterns, the stitch count is invariable, so the article must be worked on the same number as the border, or else a row of evenly-spaced increases or decreases must follow (or precede) the border to make the numbers come out right.

Most of the time, a border is not made more than once during the progress of the work. But like all other forms of knitting, border patterns can be adapted to many purposes. There is no rule that says a border *can't* be repeated all the way up a knitted piece; nor is there any objection to *combining* different border patterns to make a “horizontal sampler” — just as a fisherman sweater is a “vertical sampler” of cables.

Neither are the patterns in this section to be considered the only possible patterns for borders. By no means! Hundreds of other patterns can serve the purpose very well, just by being worked through only one or two repeats. Most lace or eyelet patterns can be used in this way. Slip-stitch color patterns and Mosaic Patterns make charming borders wherever a touch of contrasting color is wanted. Knit-purl combinations are often good as borders too. Any kind of pattern that is basically a horizontal **design is ideal.**

The “straight” border patterns — that is, the ones that do not form a fancy edge — can be used in any way at all. They need not be placed near an upper or lower edge, they can sail right across the middle if you want them to! What's more, it isn't even necessary to work the border all the way across. You can enclose just two or

three repeats of it within vertical frames—such as a cable at either side—and work it in the form of a panel. Or you can work just a little of it to make a square or rectangular motif placed somewhere on the fabric. “Straight” border patterns make very exciting diagonal designs, too, when placed in a bias-knit garment. This kind of knitting is easy to do, by continually increasing at one edge and decreasing at the other as the work progresses. Usually the increase and its corresponding decrease are made on either end of every right-side row. There are technicalities, of course, in regard to the proper shaping of the garment, but they are not complicated. The knitter can learn to deal with them by following just one commercial garment pattern for a bias-knit garment.

Borders, then, are “fun” patterns that can be thrown into your knitting just about anywhere. All sorts of knitting techniques are represented among them, so that you can easily find a border for any type of knitting that you may have in hand. But try other patterns from other sections of this book as borders too. There is no limit to the original touches that can be given to your hand-knits by horizontal designs.

Round-Edge Ribbing

Contributed by Barbara N. Rankin, Cleveland Heights, Ohio

This is a method of casting on for knit-one purl-one ribbing, which makes a lovely rounded edge that is identical on both sides of the fabric. It is useful not only for the lower edge of a sweater or the cuff of a sleeve, but also for collars and button bands; in the latter cases, the border piece would be cast on at the outer edge, worked for the desired width, and then woven or sewn into the garment edges without casting off. Use an even number of stitches, because the original number cast on must be exactly half of the desired number. If an odd number is wanted, you can always increase one stitch later.

Step 1. With a loose piece of contrasting colored yarn (CC), cast on *half* of the desired number of stitches.

Step 2. Take up main color (MC—the yarn to be used for the actual ribbing) and purl one row, knit one row, purl one row, knit one row; 4 rows stockinette stitch. Do *not* tie MC strand into the cast-on row; leave the end hanging loose.

Step 3. * Purl the first st on needle, then insert right hand needle upward into the first (upside down) MC loop connecting 2 CC loops from the cast-on row below, and knit this MC loop, rep from * across. The last full MC loop below will be picked up and knitted after the next-to-last st on needle has been purled. Then purl the *last* st on needle, then pick up and knit the half-loop of MC yarn on the very edge. There are now twice the original number of stitches on needle.

Step 4. Begin ribbing—next row—* P1, k1, rep from *. Repeat this row for desired width.

Step 5. Remove the cast-on sts of CC yarn, leaving the edge in MC only. It will be a firm yet elastic edge that looks as though it was never cast on at all!

Picot Ribbing

The detailed instructions for this method of casting on a knit-one-purl-one ribbing sound formidable indeed. But they are only the thousand words than which one picture is said to be better; a split-second of action is dragged out into five paragraphs for clarity's sake. Those who are accustomed to casting on with one needle in the right hand, and yarn held only in the left hand will soon see that this kind of casting on is exactly the same thing with just one small added twist.

This method makes a very pretty edge to the ribbing. It is elastic and "invisible," showing no perceptible cast-on row, and is definitely recommended for beginning the lower edge of a sweater or a ribbed cuff.

Step 1. Take a long end of yarn sufficient for the required number of stitches, and hold yarn in the left hand, passing from the skin between little finger and ring finger from front (palm) to back of hand, then up the back of fingers and over the forefinger from back to front, then down under thumb from back to front and over thumb from front to back. The loose end of the yarn crosses *below* the strand between thumb and forefinger, and runs down the palm, to be held lightly against the palm by the little finger.

Step 2. Holding needle in right hand, insert needle point upward under the strand on the front of thumb, then from right to left under the strand that runs between thumb and forefinger, then out forward under the same thumb strand, carrying the thumb-forefinger strand on needle as when knitting a stitch. Drop loop off thumb, and pull up the loop on needle to tighten. This makes the first stitch.

Step 3. Insert thumb from left to right *between* the free end strand (which is still held against the palm by the little finger), and bring thumb back to original position, carrying yarn on thumb ready to cast on the next stitch. This is like the position in Step 1, *except* that the *front* thumb strand, under which the needle will be inserted, now runs directly down the palm to the free end, instead of back to the forefinger as before.

Step 4. Before casting on the next stitch, insert the needle from front to back *under* the strand between thumb and needle (i.e., the back thumb strand), then *over* the strand between needle and forefinger. Bring this last strand on the needle through to front, under the thumb-needle strand. This makes a loop passing over the needle from front to back, which will be the second stitch.

Step 5. Insert needle from front to back *under* the front thumb strand and *over* the needle-forefinger strand, bringing another loop on needle through to the front as in Step 2, and dropping loop off thumb to make the third stitch. Pull loop up firmly on needle.

Repeat Steps 3, 4, and 5 to make each subsequent pair of stitches, ending with Step 5 as the last stitch is cast on. There will be an *odd* number of stitches, since the first cast-on stitch is an extra one.

When the desired number of stitches has been cast on, turn and work in k1, p1 ribbing, beginning and ending with a *knit* stitch on the first and all other odd-numbered rows, and with a *purl* stitch on all even-numbered rows. The odd-numbered rows will be the right side of the ribbing.

Ruffled Bell Border

This particular ruffle is a sample only, since obviously it can be made in many different ways. The garter-stitch foundation may be omitted, or the "bells" may be longer or shorter (more or fewer rows worked), or spaced farther apart or closer together, or the increases can be done by some solid-stitch method instead of by yo's, or the pattern can be worked from the bottom of the ruffle upward, using decreases instead of increases. Any piece of knitting can be finished off (or started) with a ruffle by applying the basic principles of this pattern.

Borders for Color Contrast

All of these “borders” are portions of simple color patterns, as indicated by the repeat lines following the pattern rows. In each case, only one repeat is shown. This will give the knitter a good idea of how to use *any* color pattern as a contrasting border.

Since these patterns are not shown in their entirety, the reader is advised to try each one in a swatch of 3 or 4 repeats, to see how it looks as a continuous design. Then, try a favorite Slip-Stitch, Mosaic, or Fancy Color Pattern in a single repeat, to see how it might look as a border. Most of them will be just as pleasing as the selection of patterns given here. Note: CC (contrasting color) is the actual border color.

Scalloped Purl Trim

This is an easy and pretty way to finish a neckline, a sleeve, a pocket top, or the front edges of a jacket; try it in place of the usual crocheted edge or plain garter-stitch border worked on picked-up stitches. For further embellishment, a bead or a pearl can be sewn on each scallop. Buttonholes or button loops also can be used with this trim, but if buttonholes are knitted in, be careful to place the binding strands exactly between them when sewing the stitches off the needle.

Step 1. Foundation—knit 2 rows.

Step 2. Work in reverse stockinette stitch (knit on the wrong side, purl on the right side) for *three* the desired width of border. Do not bind off.

Step 3. Fold border in half with the purl side out. Break yarn, leaving a long end.

Step 4. On the wrong side of work, sew stitches off needle one by one, attaching each stitch to the corresponding stitch in

Cobweb Frill

This simple “trick” design makes a beautiful lacy ruffle that will decorate sleeves, bedackets, pignons, evening stoles, fancy aprons, or the neckline and lower edges of a soft feminine blouse. When worked at the beginning of a piece, it can proceed right into the garment if you remember that one-third of the stitches are going to be dropped, and so cast on an extra third for this purpose. Or the frill can be worked separately, bound off, and then sewn to side or upper edges of the garment.

SECOND BAND: *Wide Leaf Border*

THIRD BAND: *Diamond Leaf Border*

BELOW: *Shell and Eyelet Border*

This kind of border can be placed either at the beginning or at the end of the knitting, but is most commonly used at the end for a pretty finish to collars, cuffs, and the front edges of cardigans, coats, and jackets (where the stitches for the border are picked up vertically from the garment pieces). Since the border stitches need not be bound off, but can be sewn in right from the needle, there is no bulky bind off row and hence no unsightly lumpiness such as frequently disfigures the hems in knitted garments. The next time you make a dress or skirt from the top down, and want to finish it off with a hem, try this one!

Odd number of sts.

Step 1. Work in stockinette stitch to the desired width of border, ending with a wrong side (purl) row.

Step 2. Picot row: K1, * yo, k2 tog; rep from *.

Step 3. Continue in stockinette stitch for the same number of rows as before, to form the hem facing. Do not bind off. Break yarn, leaving a long end for sewing.

Step 4. Turn facing to the inside at the row of holes, thus forming the picot points. Sew the stitches off the needle one by one, attaching each stitch to the corresponding stitch below in the first row of border, with an overcast seam.

NOTE: To work a Picot Hem at the beginning of a piece, cast on, work the facing portion first and the picot row as given. Later the facing can be turned under, and the cast on edge sewn to the wrong side of the work, matching corresponding stitches.

Shell and Eyelet Border

This is a narrow border arranged in small downward-pointing "picoes" with a straight edge between them. The eyelet row (Row 7) may be omitted if an even narrower border is desired. Be sure you understand "sl 2—k1—p2sso" and "sl 2—p1—p2sso" (see Glossary).

Tassel Border

ABOVE: *Tassel Border*
 CENTER: *Chandelier Pattern*
 BELOW: *Seam Ribbing*

Little knit-in tassels like these are wonderfully effective as a decorative edge to any garment. Being worked in a single stitch, they can be placed anywhere, in combination with any pattern; but they make a particularly striking finish to the twisted chevron given here. In this pattern, purl stitches are worked below the chevron, knit stitches above; the knitting can continue in plain stockinette over the border. These two background textures could be reversed, or changed. A tassel border with similar chevrons works just as well over ribbing, garter stitch, seed stitch, etc. If the loops of each tassel are made a good length (wrap them around two or more fingers and very firmly knit together in Row 7, they can be cut and trimmed if desired.

Chandelier Pattern

This is a very fancy slip-stitch pattern that does well as a border, though it may be placed in any other context the knitter pleases. Rows 31 and 32 can be repeated indefinitely, to continue the rib lines all the way up to the top of a garment after the border is completed, or, these ribs can lead into another pattern that is worked on a multiple of 9 sts plus 5. Before working this pattern,

be sure you understand “sl 2 = k1 = p2sso” and “sl 2 = p1 = p2sso” (see Glossary). A simple “k3 tog” and “p4 tog” can be substituted for these central decreases if you prefer, though in this pattern the central decreases are a little more elegant.

Multiple of 18 sts plus 5.

Notes: Left Slip (LS) drop sl st off needle to front of work, p1, then pick up dropped st and knit it. (If sl-st shortens up too much, use dpn to hold it.)

Right Slip (RS) slip 1 purl st, drop next st off needle to front of work, sl the same purl st back to left hand needle, pick up dropped st and knit it, p1.

All sl sts on all wrong-side rows are slipped with yarn in *front*.

Picot Point Border

ABOVE: Picot Point Border

BELOW: Geometric Wave Border

This adaptable pattern, in which each point is worked separately, can be used to create any desired number of stitches. I.e., for 10 points of 13 sts each (130 sts), work each point through Row 12 (yo, k12, which makes 13 sts) and repeat the process 10 times. For 6 points of 10 sts each (60 sts), work each point through Row 9 (yo, k9, making 10 sts) and repeat 6 times. If an *even* number of rows are used to make each point, then the next point should be cast on the same needle as given. If an *uneven* number of rows are used, then the next point should be cast on the *free needle* so that all points will finish on the same needle.

This is a beautiful pattern for collars, cuffs, scarf-ends, or the lower edge of a skirt. It may be completed in a separate piece and sewn to side or top edges as well as knitted in straight from the bottom. It need not be worked in simple garter stitch; a decorative pattern can be used, such as an eyelet or hobble in the center of each point, etc.

Break yarn and leave the finished point at the non-working end of the needle. On the same needle (if an even number of rows were used), cast on 2 sts and work another point the same as the first. Continue until there are as many points as desired, do not break yarn upon completing the last one. Turn and knit across all sts on needle, joining all points together, then work a few more rows of garter stitch to complete border. To finish, weave all loose ends of yarn through border.

A tassel or a bead or some other ornament may be tied to the yarn end left at each cast-on point.

- Row 50—Knit.

Dinner-Bell Ruffle

This is another “basic” ruffle made from the bottom up. It can be varied in dozens of ways, according to the number of stitches, the type of yarn, the length of ruffle desired, etc. 12, 14, or 16 stitches can be cast on for every 4, to make a fuller ruffle; the decreases can be worked on every right-side row instead of every other one, to make it shorter. The ruffle need not be worked on a bottom edge; it can be made separately, or sewn on some distance *above* the edge, as a flounce.

Cast on 10 sts for every 4 sts required at finish of the ruffle, plus 3 edge sts.

- Rows 13 and 15—K3, * p1, k3; rep from *.
- Rows 14 and 16—P3, * k1, p3; rep from *.

Finish with several rows of garter stitch.

Lace Window Border

Here is a good example of a regular lace pattern used in a couple of repeats to make a border. The pattern is obviously made for vertical panel arrangement, but as a border it is chopped off after two repeats (three repeats of the first pattern row) and the result is quite delightful, resembling nearly-square tracied windows.

Multiple of 20 sts plus 3.

Row 1 (Wrong side) and all other wrong-side rows—Purl.

Rows 2 and 4—Knit.

Row 6—K3, * ssk, yo, (k1, yo, sl 2—k1—p2sso, yo) 3 times, k1, yo, k2 tog, k3; rep from *.

Row 12—K5, * yo, ssk, k1, k2 tog, yo, k3, yo, ssk, k1, k2 tog yo, k7; rep from *, end last repeat k5.

Rows 14–16, 18–20, and 22—Repeat Rows 6, 8, 10, and 12, then Row 6 again.

Finish with 5 rows of stockinette stitch, as at beginning.

Snake Border

Contributed by Hildegard M. Elsner, Aldan, Pennsylvania

This pattern is pretty when worked all over the fabric, as well as when used as a border. This is done by repeating Rows 1 through 13 continuously. The border can be applied horizontally, by casting on the same number of stitches required for the knitted article, or it can be sewn in as a vertical insertion, by casting on the number of stitches required to reach from the top to the bottom edge. Or use it in a garment worked from side to side, by placing it in the center for a “vertical” panel.

Graduated-Chevron Border with Bobbles

This design of diminishing chevrons can be used once as a border, or it can be repeated indefinitely as an all-over lace. Although its 50 rows make the directions long, it is uncomplicated to work. The clear, straight diagonal lines make it easy for the knitter to see what comes next as the work proceeds.

Multiple of 20 sts plus 3.

NOTE: Make Bobble (MB) as follows: (k1, yo, k1, yo, k1) in one stitch, making 5 sts from one, turn and k5, turn and p5, turn and k1, sl 1—k2 tog—psso, k1, turn and p3 tog, completing bobble. On the return row, pull into the *back* of each bobble stitch.

Mimosa Border

Clustered bobbles and lace combine to make a deeply scalloped traditional border that is a strong fashion accent. To work this pattern, you have to *like* making bobbles—there are so many of them. But if you don't like making bobbles, you can omit them; the border is still lovely without them.

Edgings

Among the edgings are some of the oldest and finest lace patterns. Many edgings were invented in the era of "white knitting", to embellish the great knitted bedspreads, tablecloths, scarves, shawls, doilies and fancy underclothing of that era. These beautiful old patterns will enhance modern garments or household articles just as well. They can be applied to blouses, place mats, curtains, stoles, skirts, pillow covers, cuffs, collars, baby jackets, and dozens of other things.

An edging usually has one straight side edge, by which it is attached to the article. The other edge is scalloped, wavy, indented, pointed, or looped. The width of an edging pattern is set—wide, medium or narrow, depending on the pattern—but the length depends on the number of rows worked, and so is indefinitely variable. The knitter has only to repeat the pattern rows a sufficient number of times to span the **edge of the garment or whatever.**

Most edgings look best when worked in thin cotton yarn, which can be starched and pinned out to hold its shape. But wool or synthetic yarns can be used too; these can be pinned to shape, then steamed or lightly pressed. Metallic-yarn edgings add a lot of glitter to fancy collars and cuffs, evening stoles or cocktail dresses; these too can be blocked into shape, and will retain it. Garter stitch is almost always the basis of an edging pattern, because it does not curl. Great use is made, too, of various kinds of laggoting—because this also produces the flat fabric required in an edging.

If you want to make a large article—tablecloth, curtain or bedspread—in cotton or linen "straight-knit" strips, it is almost mandatory to add an edging, because this is the only thing that will finish off the sides in an appropriate fashion. It is easy to work an edging on both sides at once of a straight-knit piece as the work progresses; this saves the trouble of sewing the edging on separately. For this purpose, choose a reversible edging—that is, one without any specified right or wrong side—and work the odd-numbered rows of the edging pattern at one side of the piece, the even-numbered rows of the edging pattern at the other side *on the same row*. In this way the fancy edge is made to face outward on both sides, while the straight edge is knitted right into the piece as if it were a panel.

Row 6—K2, [(yo) twice, k2 tog] twice, k4, yo, k1. (14 sts)

Row 7—K8, (p1, k2) twice.

Row 8—K⁹, pass 8th st over 9th st, then bind off remaining 5 sts, leaving 8 sts on needle—7 sts separated from the last bound-off st by a space. On the following Row 1 this last st is drawn up to the others.

Repeat Rows 1-8.

Oak-Leaf Edging

Several versions of this handsome antique pattern exist. In the Victorian era it was popularly used for collars, cuffs, bed linens, curtains, and the hems of dressing-gowns or petticoats.

Cast on 10 sts and knit one row.

"A" portion of pattern: (Yo) twice, k2 tog, (yo) twice, k2 tog, k1.

"B" portion of pattern: Sl 1, (k2, p1) twice. (The purl stitches are made in the second loop of the double yo.)

Row 1—Sl 1, k2, yo, k2 tog, A.

Row 2—B, k2, yo, k2 tog, k1.

Row 3—Sl 1, k2, yo, k2 tog, k2, A.

Row 4—B, k4, yo, k2 tog, k1.

Row 5—Sl 1, k2, yo, k2 tog, k4, A.

Row 6—B, k6, yo, k2 tog, k1.

Row 7—Sl 1, k2, yo, k2 tog, k6, A.

Row 8—B, k8, yo, k2 tog, k1.

Row 9—Sl 1, k2, yo, k2 tog, k8, A.

Row 10—B, k10, yo, k2 tog, k1.

Row 11—Sl 1, k2, yo, k2 tog, k15.

Row 12—Bind off 10, k6, yo, k2 tog, k1.

Repeat Rows 1-12.

Some edgings go bias, which means that the cast-on row is concave and the bound-off row is convex, or vice versa. This kind of edging is intended to go *all the way around* something, like a skirt hem or a cuff. When the cast-on row and the bound-off row are sewn together, they will fit nicely into each other and make a diagonal seam.

Here are a few points on general knitting technique, which apply to many of the patterns in this section. You will see double or even triple yarn-overs frequently used. Extra yarn-overs are *always* treated as separate, new stitches, and must *not* be dropped off the needle on the return row unless the directions so state. Usually a double yarn-over is worked on the return row with a "k1, p1" or "p1, k1"—each of the two loose loops being worked as a separate stitch. In these pattern directions, the extra yarn-over is not mentioned specifically on the return row, but an extra stitch will be provided for it. So count stitches carefully when trying out an edging, and don't "lose" any of the extra loops.

When working edgings that are formed by binding off groups of stitches at intervals, remember to start counting the bound off stitches as the *second* stitch is worked. That is, slip the first stitch, knit the second, then pass the first stitch over the second, meanwhile counting bound off stitch Number One. When you have passed the last stitch over (Number Five, say, if there are to be five stitches bound off), then the binding-off is finished and one stitch still remains on the right hand needle. Ignore that stitch and proceed to work the stitches on the left hand needle according to subsequent directions. Of course this is a basic bit of knowledge that comes to most knitters with their first lesson, but since the stitch count is particularly important in edging patterns, it might bear repeating here for the benefit of a few who are uncertain about it.

Edgings cover a wide range of knitting skill. Some are very simple beginner's patterns, others are exceedingly fancy. In between, these two extremes there is a whole spectrum of intermediate patterns. They are wonderful to try out and practice, even if you have no immediate use for an edging as such. From them, any knitter can learn much about the use of lace in unusual and interesting forms. To work with edgings is to understand shaping in new ways. Increases, decreases, slanting stitches this way and that—all are thoroughly demonstrated by a selection of edgings. Since an edging has a rather small number of stitches to it, it works quickly. The knitter can see how it is going to "come out" after one or two repeats. And best of all, edging patterns are extremely attractive. They can add a real "designer touch" to a plain dress—a touch that the designer perhaps never dreamed of! So next time, try an edging instead of a hem. Or sew cotton lace edgings to your best guest pillowcases. Or decorate a fancy apron with a knit edging. Or trim the lower edge of a summer blouse. The article to which a knitted edging is attached does *not* have to be knitted also. These edgings look lovely on linen tablecloths, cotton or silk petticoats, collars, sleeves, woven curtains and bedspreads. Just knit the edging to the proper length and sew it on—by machine, if you wish.

A few of these patterns are modern inventions, but most of them are old—at least a century old. Still, their beauty is timeless. Trills, ruffles and laces have come back again to the fashion leadership that they enjoyed in the 1860's and 1870's. Thus, fancy touches like knitted lace edgings are as much in style today as then. So why not make use of the same delightful patterns that were developed more than a century ago? Here they are, at your fingertips. If you are one of the knitters who think only in terms of socks and sweaters, this is your opportunity to branch out and try a little "dainty work"!

A Self-Reinforcing One-Row Buttonhole

Contributed by Berniece L. Hampson, San Clemente, California

This is a finishing detail, and does not really belong in a book about patterns. But it is well worth knowing, so it is included here for the benefit of those who may not know it.

Methods of making buttonholes are many and various. Nearly every knitter has a different favorite. But for neatness and durability combined with ease of working, your author has never seen a buttonhole to beat this one. There are “bound” stitches all the way around it, with no loose strands in the corners. It can be worked from the right or wrong side of the fabric, as desired, for both sides of the buttonhole are very trim; in fact, the second or “wrong” side is perhaps even tidier than the side on which the buttonhole is started. On a purl fabric (reverse stockinette) or garter stitch it is well-nigh invisible. It stretches readily to let the button through, yet keeps straight and does not gap open. And it is all finished on the same row.

Worked in reasonably sturdy yarn, this buttonhole requires no extra reinforcing or ribbon backing. With loose, soft, or fuzzy yarns you can still make self-reinforcing buttonholes by this method, by knitting a thin cotton thread (or two) along with the yarn across the buttonhole stitches *on the row before* the buttonhole, then on the next row the entire buttonhole is made with the yarn and cotton threads held together. The cotton is dropped after completion of the buttonhole. Its free ends remain at the left hand side of the buttonhole, where they can be knotted together on the wrong side. This will create a strong buttonhole even on a very soft or limp fabric.

The buttonhole is shown on seed stitch, stockinette stitch, and garter stitch, three popularly used button-band fabrics. It can be worked also on double seed stitch, moss stitch, reverse stockinette, ribbing, or any other fabric that your button band happens to be made of.

Step 1 Work desired number of stitches before starting buttonhole.

Step 2 Bring yarn to front of work, sl 1 st from left-hand needle to right-hand needle, pass yarn to back of work and *drop* it there. (The yarn is left hanging, and is *not* used during Steps 3 and 4.)

Step 3 Slip another st from left-hand needle to right-hand needle, and pass the first st over it—1 st bound off. Repeat Step 3 until the desired number of sts for buttonhole have been bound off.

Step 4 Slip the last bound-off st back to left-hand needle, and turn work.

Step 5 Pick up hanging yarn and pass it between needles to back. Now cast on the same number of stitches that were bound off for the buttonhole, *plus one more*, using the Cable Cast-on as follows: * insert right-hand needle *between* the 1st and 2nd sts on left-hand needle, draw through a loop, and sl this loop onto left-hand needle to serve as a new first st; rep from * until the desired number of sts have been cast on. Before placing the *last* loop on left-hand needle, bring yarn through to

Godmother's Edging

This simple but very beautiful pattern was designed in the 1890's for "the hems of infants' christening dresses and matching lace cushions". It was recommended also as an edging for "fine linen pillow cases and counterpanes". Modern godmothers, or anyone else, might use it on the hems of nightgowns, robes, shifts, lace overskirts, shawls, head scarves, or tablecloths. It is a graceful, uncluttered pattern, especially lovely when worked in fine cotton yarn.

Turn work again.

Step 6. Slip the first st from left-hand needle to right-hand needle, then pass the last, extra cast-on st over it. Buttonhole completed—work to end of row.

NOTE: Step 6 may be worked also as a plain “k2 tog”—i.e., the first 2 sts on left-hand needle. This is an alternative way of decreasing the extra stitch.

Bias Band for Necklines

A new type of increase occurs here, which is useful in making a two-sided bias binding for an inside curve such as a neckline. Most increases will show small holes when worked continuously on every other row, but this one is fairly tight and solid. The bias band will draw up to an inside curve and fold naturally down its center. The edges can be stitched to the front and back of the neckline just like a piece of bias tape. Make the band as wide as you wish. Use smallish needles, in proportion to the weight of the yarn.

This kind of increase can be used also for raglan shapings in a garment worked from the top down. But because it is naturally tight, the raglan seam will require a little stretching.

Plain Scalloped Edging

This is the basic edging—a simple construction of increases and decreases, which can be worked in any kind of yarn and applied to anything. Shallower scallops can be made by increasing and decreasing on **every other row** instead of **every row**. Also, the number of stitches is optional, and so is the number of rows used to complete a scallop. The only rule here is that the number of increase rows must be equal to the number of decrease rows. Further decoration can be added by working a bobble into the

center of each scallop, or coloring the scallops with embroidery, or tying on a fringe.

Welled Ruffle

Any "beginner's baby sweater" would be beautifully finished off by this firm, handsome ruffle, which is made in the easiest possible way and runs lengthwise like an edging. It is an exceedingly simple construction of purled welts fluffed out by short rows with a little border of garter stitch for attaching the ruffle. If you *are* a beginner, and *do* want to work this ruffle for your first baby sweater (or anything else), remember one hint about turning short rows: the yarn should be looped around the next stitch before turning, in order to avoid leaving a hole. For example, in working Row 2 of this pattern: purl 10, sl 1 wyib, turn, slip the same stitch again wyib, k10. Thus the yarn of the short row is looped around an unworked stitch.

Two Edgings with an Insertion: Beech Leaf Edging, Bird's-Eye Edging, and Moorish Diamonds

These patterns are worked together in one piece to give the knitter an idea of how any edging can be combined with any lace panel or panels to make attractive lace mats, hangings, or scarves. With the same edging on both sides, you can work any number of insertions in the center to make an article of any width. The left-hand edging and the right-hand edging are worked on opposite sides of the fabric alternately, of course, so that the scalloped portion faces outward both ways.

*A Treasury of Knitting Patterns, pp. 227, 160, 152, 290

ABOVE: Tulip-Bud Edging
BELOW: Faggoted Fringe

Faggoted Fringe

Directions as given will make a long loop fringe. A thicker fringe can be made by using three or four strands of yarn instead of two; a shorter fringe can be made by reducing the 6 stitches at the end of Row 1 to 3 or 4, and of course the 5 stitches at the beginning of Row 2 to 2 or 3. Conversely, a longer fringe is made simply by adding more stitches. In any case the stitches to be unraveled for the fringe are worked in plain stockinette stitch, while the edging stitches are done in faggoting. If a straight fringe is wanted instead of a loop fringe, each loop may be cut at the bottom.

Using a double strand of yarn, cast on 13 sts.

Row 1—K2, yo, k2 tog, k1, yo, k2 tog, k6.

Row 2—P5, k2, (yo, k2 tog, k1) twice.

Repeat these 2 rows for desired length, ending with Row 2. On next row sl the first st, bind off next 7 sts, draw yarn through and finish. Drop remaining 5 sts off needle and unravel them all the way down to the beginning to make fringe loops.

Corded Edging

This is a tidy little edging for those who particularly enjoy working into the backs of stitches to make twisted knitting. But the stitches need not be twisted, if you prefer plain knits and purls. Or, the stitches may be worked through the backs on the right-side rows only, to make a Crossed stockinette fabric. “Inc” in this pattern can be “Make One”, but the recommended method is the side-loop increase used in the Bias Band for Necklines.

Repeat Rows 1-12.

Loop Edging

This charming old pattern with its prominent pick loops would decorate the lower edge of a lace house very nicely, or would decorate a fancy pillow-slip equally well. It would also look handsome as a gauntlet for a cotton lace glove.

Cast on 11 sts and knit one row.

Row 1—K3, (yo, ssk, k1) twice, (yo) twice, k1, (yo) twice, k1.

Row 2—(K2, p1) 4 times, k3. (On this row each double vo is treated as 2 sts, the first being knitted, the second purled.)

Row 3—K3, yo, ssk, k1, yo, ssk, k7.

Row 4—Bind off 4 sts, k3, p1, k2, p1, k3.

Repeat Rows 1-4.

Wave Edging

Making a subtle, gently scalloped edge, this pattern is excellent for curtains and stoles.

Cast on 13 sts.

Row 1 and all other odd-numbered rows—K2, purl to last 2 sts, k2. (Number of purl sts will vary on different rows.)

Row 2—Sl 1, k3, yo, k5, yo, k2 tog, yo, k2.

Paddle Edging

Although the edging is flat, this delightful little pattern gives the impression of a ball fringe. The "cable cast-on" recommended for this pattern is worked as follows: * insert right hand needle from the front between the first and second sts on left-hand needle, draw through a loop, and slip this loop on left-hand needle to make a new first st, rep from * until the desired number of sts

have been cast on. (It is a good idea to bring the yarn through to the front before placing the last st on the left hand needle, this forms a separating strand between the last and next to last sts and makes them easier to work.)

To finish a strip of Paddle Edging, work Row 6 through the final “k1”, turn, omit the cast on, and bind off all sts on the wrong side.

Cast on 13 sts and knit one row.

Row 1 (Wrong side)—K2, yo, p1, yo, p2 tog, k5, yo, k2 tog, k1.

Row 2—K3, yo, k2 tog, k2, k2 tog, yo, k3, yo, k2.

Row 5—K2, yo, p1, k7, p1, yo, p2 tog, k1, yo, k2 tog, k1.

Row 6—K3, yo, k2 tog, k1, then with point of right hand needle, pass the 2nd st on left hand needle over the first st 3 times, k1. The last knit st is the single st remaining on left hand needle with all 8 sts passed over it. Turn. Cast on 3 sts using the cable cast on. 13 sts now on needle. With wrong side still facing, begin again at Row 1.

Repeat Rows 1-8.

Grape Edging

This is a very old pattern forming a graceful, lightly scalloped border of small “picot laggoting” points; these are the single loops left by the yo’s on the outside edge. When an edging like this is washed and pinned out, a pin should be inserted into each single loop to draw it away from the next stitch, thus forming the picot.

Louvered Edging

The "louvers" are made like buttonholes, except that the stitches are not cast on, but increased in a yo. This ladder-like pattern can be used in other ways, to decorate any portion of a knitted piece.

Cast on 15 sts loosely.

Omitting preparation row, repeat Rows 2-13.

Primrose Edging

This edging is particularly nice on a wide, elbow-length or three-quarter sleeve. The blouse, dress, lounge coat or peignoir to which the sleeve is attached need not be knitted—edgings like these can be sewn to cloth as well as to knitted fabrics.

Cast on 11 sts and knit one row.

Row 1—K3, yo, k2 tog, k1, ssk, cast on 4 sts, k2 tog, k1. (13 sts)

Grecian Lace Edging

Every line in this handsome bias pattern slopes gently “down hill” from right to left, terminating at the bound-off scallop. Six repeats of the pattern rows are required to move one series of openings all the way down from the straight edge to the scallop.

Being strongly bias, this pattern is not suitable for a straight edge, such as the side of a table mat or curtain, but must go *at an angle* something—a sleeve, a skirt, or a round doily, for instance. The first row and the last row can be sewn together invisibly, matching the pattern lines.

Cast on 15 sts and purl one row.

Alpine Edging

Here is an exquisite old French pattern, made up of single-strand lace with the usual flattened diamonds, plus a “vandyke” or zigzag band of large eyelets. Most of the decreases are purled, which slightly lengthens the yo’s and makes the lace more open.

Shark's Tooth Edging

Here is a beautiful bold pattern with long points supported by two rows of simple laggoting. It is very good for novelty blouses and sweaters, lace mats, lace aprons, or slip hems.

Cockleshell Edging

Uncluttered and easy to work, this broad edging is in the grand Victorian tradition of lace knitting. Characteristic of its period are the garter stitch basis and the single plain decrease (k2 tog) used throughout. A hundred years ago, knitters liked to put edgings like this on knitted cotton petticoats, tablecloths, and curtains.

The Queen's Edging

The dainty fan-shaped motifs of this lovely old pattern have a tendency to puff outward, which can give an unusual embossed effect. The edging is very attractive when worked in fine cotton and applied to linens, such as pillowcases, fancy hand towels, bedspreads and tablecloths. It also makes a beautiful border for a stole or evening scarf.

Cast on 13 sts and knit one row.

Starching is important for this pattern, because the scallops are worked in stockinette stitch instead of the more usual garter stitch, and so they will curl unless stiffened.

Eye-Spot Edging

Another name for this old pattern was Wagon Wheel although a wagon with wheels shaped like these motifs would be a hard riding vehicle indeed. An enlarged version of the motif appears as the "Candle-Flame Scallop" in Bead Medallion Edging.

Cast on 16 sts and purl one row.

Repeat Rows 1-12.

Square Filet Edging

In this simple but ingenious pattern, small diamonds are given a quarter-turn by the natural bias of the knitting; thus they are converted into squares. The rows run diagonally across these squares, showing that they are in fact worked at an angle. All yos in the pattern are double ones, written "yo2". The purl stitches on the return rows are placed in the second loop of each double yo. Caution: the 7th row has a single "k3 tog", the only double decrease in the pattern.

Cast on 15 sts and knit one row.

Row 1—K1, k2 tog, yo2, k2 tog, k1, yo2, k7, yo2, k2.

Row 2—K3, p1, k8, p1, k3, p1, k2.

BELOW: Double Edging

Double Edging

Here is a real old-fashioned pattern done in the real old-fashioned way—that is, all in simple garter stitch with all decreases worked “k2 tog”, or, as it was written at the turn of the century, “narrow”. The isolated purl stitches in Rows 2, 8, 14, 20, and 26 go into the second of the two consecutive yo’s in the preceding row.

This pattern is more than a single edging. It is a collar, a cuff, an appliqué, or a finish for fancy aprons, baby clothes, or lingerie. The eyelet band in the center of the pattern is meant to take a threaded ribbon of satin or velvet, behind this ribbon the edging is tacked on to the garment, so that both of the edge motifs are displayed. The edging can be drawn around a curve, such as the neckline of a peignour, nightgown, or evening blouse. If it is to be used for such a purpose, care must be taken to bind off the stitches in Row 30 very loosely. When binding off, remember that the first stitch is slipped, and the *second* stitch is bound off; stitch no. 1, so that in Row 30 the last bound-off stitch is already on the right-hand needle when there are 16 remaining.

Cast on 17 sts and knit one row.

Bead Medallion Edging with Candle-Flame Scallop

This is a beautiful 19th century edging that was applied to all kinds of lace work. Concerning the Bead Medallion, one word of warning: be sure that each “p3 tog” includes 3 *stitches*, and *not* a yo. Because of the nature of the pattern, especially when it is worked in very fine yarn, the yo following these 3 stitches sometimes becomes crossed over the 3rd stitch on the needle, and must be kept out of the decrease.

Domino Edging

Need a fancy mask for a costume party? Two repeats of this pattern, plus the first 4 rows again, will make a most unusual one! Knit it in black cotton, lightly starched, or a glistening metallic yarn, and add ribbon or elastic at the sides, planning the gauge so the eyelets will fit your eyes. The eyelets may be widened and reinforced with buttonhole stitch in a contrasting color.

Or—use it in the conventional way as an edging. It makes a very handsome one.

Cast on 14 sts and knit one row.

Buttercup Edging

This is a classic pattern that was probably used by the grandmothers of today's knitters. Yet today's knitters may also use it to good effect, for dress and sleeve hems, shawls, curtains and table mats.

The "p2 tog b" in Row 6 may occasion some difficulty, since the second stitch is a yo and is sometimes—depending on the elasticity of the yarn—hard to catch. But this can be worked easily by purling one stitch, returning it to the left hand needle, passing the *next* stitch (the yo) over it, and then slipping it back to the right hand needle. Note that the first 7 stitches are worked the same on every right-side row.

Cast on 14 sts and purl one row.

Palm Leaf or Heart Edging

This is an antique pattern of extraordinary beauty. It is not a simple edging, but it is so unusually graceful that to take care in working it is well worth while. Whether the motif resembles a palm leaf or a heart depends upon whether it is looked at upside down or right side up; if the edging is used horizontally, this is only a matter of choice.

Portuguese Edging

This beautiful old pattern shows a dainty lagged cable with pivot points. It is appropriate for any article worked with cables, laggoting, or a combination of cables and lace.

NOTES: DL—Drop Loop; drop the yo of previous row off needle.

Inc—increase; knit into front and back of the same st (in this pattern it will be a yo of previous row).

Cast on 2 and bind off 2. Knit first st, leaving it on needle, and place new st on left hand needle, then knit this st and place next new st on left hand needle. Then k2 (the 2 new sts) and pass the first st over the second, then knit the third st (the original first st) and pass the second st over it. This completes one pivot point.

Cast on 18 sts and knit one row.

Mexican Edging

ABOVE: Mexican Edging
BELOW: Chinese Edging

Patterned with the same intricacy and boldness of design that can be seen in the finest Mexican silver, this beautiful edging adds a touch of elegance to any knitted article, plain or fancy. The concept is unusual, and the knitting is complex but can be followed by anyone with moderate experience in lace knitting and careful attention to the directions. See Special Note at the end of pattern rows.

Cast on 19 sts and knit one row.

"A" portion of pattern—worked on the first 8 sts of every odd-numbered row: Sl 1, k3, (yo, p2 tog) twice.

Row 1 (Right side)—A, k4, yo, ssk, (yo, p2 tog) twice, k1.

Row 2—K1, (yo, p2 tog) 3 times, k4, (yo, p2 tog) twice, k4.

Row 3—A, k3, k2 tog, yo, k1, (yo, p2 tog) twice, yo, (p1, k1) in last st.

Row 4—K1, yo, k2, (yo, p2 tog) twice, k2, yo, p2 tog, k2, (yo, p2 tog) twice, k4.

Row 5—A, k1, k2 tog, yo, k3, yo, p2 tog twice, yo, k3, (p1, k1) in last st. Turn. K1, yo, k2, yo, p2 tog. Turn. Yo, p2 tog, yo, k1, (p1, k1) in last st.

Row 6—Bind off 5, yo, p2 tog, k1, (yo, p2 tog) twice, k4, yo, p2 tog, 3 times, k1.

Row 7—A, yo, ssk, k4, (yo, p2 tog) twice, (p1, k1) in next st, yo, p2 tog, yo, (p1, k1) in last st. * Turn. K3, yo, p2 tog. Turn. Yo, p2 tog, yo, k2, yo, (p1, k1) in last st. * (Note: The directions between * and * in this row make the second and the next 8 of the 10 picot points, and are repeated at the end of every subsequent odd-numbered row through Row 25; hereafter written "rep * — *".

Row 8—Bind off 5, yo, p2 tog, yo, k2, (yo, p2 tog) twice, k3, p2 tog-b, yo, k1, (yo, p2 tog) twice, k4.

Row 9—A, k2, yo, ssk, k2, (yo, p2 tog) twice, k2, (p1, k1) in next st, yo, p2 tog, yo, (p1, k1) in last st. Rep * — *.

Row 10—Bind off 5, yo, p2 tog, yo, k1, (yo, p2 tog) twice, k1, p2 tog-b, yo, k3, (yo, p2 tog) twice, k4.

Row 11—A, k1, yo, ssk, yo, p2 tog twice, k4, (p1, k1) in next st, yo, p2 tog, yo, (p1, k1) in last st. Rep * — *.

Row 12—Bind off 5, yo, p2 tog, yo, k6, (yo, p2 tog) 3 times, k4, (yo, p2 tog) twice, k4.

Row 13—A, k3, k2 tog, yo, k1, (yo, p2 tog) twice, k6, (p1, k1) in next st, yo, p2 tog, yo, (p1, k1) in last st. Rep * — *.

Row 14—Bind off 5, yo, p2 tog, yo, k3, (yo, p2 tog) twice, k2, yo, p2 tog, k2, yo, p2 tog twice, k4.

Row 15—A, k1, k2 tog, yo, k3, yo, p2 tog twice, k3, (p1, k1) in next st, yo, p2 tog, yo, (p1, k1) in last st. Rep * — *.

Row 16—Bind off 5, yo, p2 tog, yo, p3 tog, k7, (yo, p2 tog) twice, k4, (yo, p2 tog) 3 times, k4.

Row 17—A, yo, ssk, k4, (yo, p2 tog) twice, k6, k2 tog, k1, yo, p2 tog, yo, (p1, k1) in last st. Rep * — *.

Row 18—Bind off 5, yo, p2 tog, yo, p3 tog, k5, yo, p2 tog twice, k3, p2 tog-b, yo, k1, (yo, p2 tog) twice, k4.

- Row 19—A, k2, yo, ssk, k2, yo, p2 tog twice, k1, k2 tog, k1, yo, p2 tog, yo, (p1, k1) in last st. Rep * — *.
- Row 20—Bind off 5, yo, p2 tog, yo, p3 tog, k3, (yo, p2 tog) twice, k1, p2 tog b, yo, k3, (yo, p2 tog) twice, k4.
- Row 21—A, k1, yo, ssk, (yo, p2 tog) twice, k2, k2 tog, k1, yo, p2 tog, yo, (p1, k1) in last st. Rep * — *.
- Row 22—Bind off 5, yo, p2 tog, yo, p3 tog, k1, (yo, p2 tog) 3 times, k1, yo, p2 tog) twice, k4.
- Row 23—A, k3, k2 tog, yo, k1, (yo, p2 tog) twice, k2 tog, k1, yo, p2 tog, yo, (p1, k1) in last st. Rep * — *.
- Row 24—Bind off 5, yo, (p2 tog) twice, (yo, p2 tog) twice, k2, yo, p2 tog, k2, (yo, p2 tog) twice, k4.
- Row 25—A, k1, k2 tog, yo, k3, (yo, p2 tog) twice, sl 1, k2 tog, pss0, k1.
- Row 26—K2 tog, (yo, p2 tog) twice, k1, (yo, p2 tog) 3 times, k4.
- Row 27—A, yo, ssk, k4, (yo, p2 tog) twice, k1.
- Row 28—K1, (yo, p2 tog) twice, k3, p2 tog b, yo, k1, (yo, p2 tog) twice, k4.
- Row 29—A, k2, yo, ssk, k2, (yo, p2 tog) twice, k1.
- Row 30—K1, (yo, p2 tog) twice, k1, p2 tog b, yo, k3, yo, p2 tog) twice, k4.

Repeat Rows 1-30.

SPECIAL NOTE on possible “mistake points.” Rows 16, 18, 20, and 22 have a “p3 tog” in place of the second “p2 tog.” Row 24 has a double “p2 tog” with no yo in between. When making the picot points as in Row 7, be sure to place a yo on the needle immediately after the *second* turning.

Chinese Edging

Whether this elaborate and beautiful pattern really originated in China is perhaps doubtful. But it was known as Chinese Edging to the European and American knitters of the 19th century, and so its name remains. Because the directions are long, each row is broken down here into various component parts, to prevent the knitter's getting “lost” in the middle of an interminable row. The Border, given separately, is worked on the first 12 sts of each odd-numbered row and the last 12 sts of each even-numbered row; the Border itself is a simple 6-row construction that is repeated 9 times throughout a single pattern repeat. The taggoted edge with its picot points incorporates three different “turning rows” which first appear in Rows 10, 12, and 14. The material between the asterisks of Row 10 is repeated in Rows 16, 22, 32, 38; the material between the asterisks of Row 12 is repeated in Rows 18, 24, 34, 40; the material between the asterisks of Row 14 is repeated in Rows 20, 26, 36, 42. It is important to notice that in the first two cases (Rows 10 and 12) this material *finishes with a yo*; in the third case (Row 14) it does not.

Note also that the direction (k1, p1), in parentheses, always means k1, p1 into the same single stitch, which will be sometimes a regular knit stitch and sometimes a yo.

Border—worked on 12 sts.

Border Row 1	K2, yo, p2 tog, k1, k2 tog, yo, k3, yo, p2 tog
Border Row 2	Yo, p2 tog, k1, yo, k2 tog, yo, p2 tog, k2

Great-Grandmother's Edging

This is the edging that goes with the famous antique bedspread pattern called Great-Grandmother's Bedspread, otherwise known as The Garden-Plot Square. The bedspread is knitted in squares, each square being worked diagonally from one corner to the opposite corner, with a single embossed leaf at the start and a row of embossed leaves across the widest diagonal. The squares are sewn or crocheted together with four of the single leaves adjoining, and thus can be made any size, depending on the number of squares worked. This beautiful bedspread was very popular around the turn of the century, and many American families still treasure one that came from the hands of a real great-grandmother.

Cast on 45 sts and knit one row.
